1. c List of other charters consulted. p. 411
Appendix I.a. Paul the Deacon's Book of the Bishops of Metz

Translation.

Here begins the little book of the number or order of bishops who, since the very beginning of preaching, succeeded each other in the city of Metz.

1). Afterwards, having completed all those things which he had agreed with the Father ought to be done for the salvation of the world, Christ the Lord passed away to Heaven. As soon as the blessed apostles were refined and strengthened by the promised gift of the Holy Spirit, according to divine provision and by communal advice they decided by lot the region or province to which each of them ought to be sent to preach. Thus, each one proceeding to the region delegated to himself, the blessed Peter, who was the first of their number and stood out like a very strong leader, hurried with all speed to that which was then the head of the whole world, that is the Romulean Town, a church having been founded at Antioch and dedicated in the name of his see.

2). When he had come to Rome he directed the best men and most learned men of his following to subjugate all those eminent towns situated in the west to Christ the Lord. And so he sent Apollonaires to Ravenna, Leucus to Frindisi and Anatolius to Milan. Indeed he appointed Marcus, who was held special among his disciples, to Aquileia, but when Marcus had put his companion Hermagoras in charge of those people he returned to the blessed Peter and was nonetheless sent to Alexandria.

3). Since at that time in Gallia Belgica the city of Mediomatricum which is now called Metz and which is situated on the very bank of the Moselle, abounded in copious crowds of people, the blessed Peter sent to that place an apostle named Clemens, an outstanding man and proven in merit, raised up with the dignity of bishop, with which equally other religious teachers were sent by the Prince of the Apostles, according to ancient tradition, to those principal towns of Gaul which were to be obtained through the word of faith.

4). When the blessed Clemens came to the city of Mediomatricum, he had lodging, as they say, in the grottoes of the amphitheatre which was situated outside the town, in which place he then built an oratory to the Lord; he set up an altar in it and consecrated it in the name of the blessed Peter the apostle, his teacher. Thus that worshipful priest then, zealous with the same admonition, preached to the people of the town, overcoming them with divine mercy he led most of that multitude, released from the sordid cult of idols and errors of blindness to the brightness of the true faith, and he shone as the first exhibitor of justice and infuser of truth in that region.

5). And then, those who have knowledge of that place affirmed that in the amphitheatre where, having first come to that place, he lived, not a snake can exist but indeed, right up to the present day, all
noxious pests flee altogether from that place whence once flowed the true signs of salvation.

6). To this man succeeded a man filled with God, Coelestis by name, who, leading a celestial life filled with the announcement of the celestial rule, enlarged the number of the believing by teachings and examples equally.

7). And then, after this man, Felix undertook the leadership of the church; Patiens was next. After these Victor was the fifth in order. Next was another Victor. After these Simeon was the seventh. After whom Sambatus (or Sambatius) was the eighth. It is certain of the zeal of all these to have increased the church of God. However, the deeds of these men are particularly hidden from us.

8). Rufus, indeed, and Adolphus, who are ninth and tenth in number, are believed to have shone without doubt with great merit in life since in fact after their death they also shone by this miracle: When their bodies were buried in the church of the blessed martyr Felix, thus the report has come down to us, there was a certain religious man, worried for the care of his soul, who used to go by night around the oratories which were sited beyond the walls of the city with incessant zeal in order to commend himself to the Lord by his individual prayers. This man, when he had come to the aforesaid church of the blessed Felix the martyr, approached the wall next to that part in which the bodies of the aforesaid priests were resting but he was not allowed to enter. This man, then, after effusive prayers, arose from his devotions, and in honour of those saints, he straight away prayed to their tombs in a small verse of the Psalms, that is he pronounced 'The saints will exalt in glory': soon he heard a responding voice from within, 'They will rejoice in their resting places'.

9). Firminius succeeded these holy men and then Legontius, concerning the vitae of whom ancient report has brought nothing beyond their names down to us.

10). Next the venerable thirteenth bishop, Auctor, received the governance of the church, at that time when not only Gaul but almost the entire west endured the ferocity of the raging Barbarians. Of this man, although other signs are believed to have been made by him, only two are made known to our memory. Thus at the time when this reverend bishop was leading a life adorned with all the virtues, Attila, King of the Huns, more fierce than all beasts, having many barbarous nations subjected to his domination, after driving away Gundigar, King of the Burgundians, who had attacked him, gave free reign to his ferocity in order to suppress all of Gaul. The blessed Servatius, Bishop of Tongres, having been forewarned of the approach of this man, proceeded to Rome to the most sacred bodies of the blessed apostles Peter and Paul, in order that, through their specially sublime merit, he should obtain a request from God that he might avert the indignation of His anger and free the people of Tongres from so much ruin. Then it was divinely revealed to this man through the same blessed Peter the Apostle that it had indeed been...
determined by the heavenly court that all Gaul was to be delivered to an infestation of Barbarians, except for the oracle of the blessed Stephen the Levite and Protomartyr, sited at Metz, in which was hidden his valuable blood without blemish of corruption. When this was revealed to the holy Servatius he went back to Gaul hastily and found that now swarms of Huns were raging furiously through all Gaul. When the Huns had withdrawn from the siege of Metz, because they had seen the city to be impregnable on account of the strength of those walls, it happened that at that very time the blessed Servatius, returning from Rome, arrived at Metz. He, when he had repeated to his holy fellow-priest Auctor all that he had learnt thus by divine revelation, returned to his own city, that is Tongres. Immediately after his departure the wall of the city of Metz collapsed and an inroad was opened up to the enemy by heavenly providence. Soon indeed the blessed Auctor, perceiving that the city was betrayed to the swords of the enemy, ordered all the little ones who had not yet felt the baptism of the holy font to be baptised. Therefore the Huns, who were besieging the fort which is called Scarponna, sited twelve miles from there, hearing that the walls of the town of Metz had collapsed, returned to that place with renewed and hurried speed, and, laying waste everything with fire and rapine, destroyed many little children of the citizens, together with those who had been baptised. They led away the remaining captives, who were able to survive the ruin, with the holy bishop Auctor. To be sure, that which the most blessed Peter, servant of Christ, had foretold before to Servatius at Rome, concerning the dwelling of the blessed Stephen the Levite and Protomartyr, was fulfilled. For when the Barbarians, being at a distance, caught sight of that church, they hastened quickly in order to capture the place, as if it were the opima spolia, but when they came nearer it appeared just as a huge rock and solid mass to their eyes. When as, blinded in the mind, they surrounded it with bands of men, felt their way and searched for an entry, absolutely nothing other than the natural hardness of rock was seen by them. Then, withdrawing and retreating backwards when they realised that they would profit themselves nothing, at last, tired, they went away and in effect they were frustrated in their iniquity.

I will not be silent about that which the blessed Gregory, Bishop of Tours, narrated in his books, concerning this oratory. For he reports "Before these enemies came, a faithful man saw in a vision the blessed Levite and Protomartyr Stephen as if in a conference with the holy apostles, Peter and Paul, concerning this destruction and saying: "I pray, my lords, that you will not permit by your pretext the town of Metz in your possession to be burnt up by enemies because there is a place there in which tokens of my humble self are contained; but rather let these people see me to be able to do something before the Lord. But if the crime of the people grows so much that it should not be able to be made otherwise than the city be betrayed to fire, perhaps at least this oratory could not be burnt." They said to him "Go in peace, most beloved brother. Your oratory alone will not go to the flames. But the rest of the town we will not hold back, because the sentence of the Lord's decree concerning it has already gone before. For the sins of the people grow stronger and the clamour of their malice has risen before the
Therefore this city will be burnt with fire," O which there is no doubt that through the request of these men, the town being laid waste, the oratory remained untouched.'

12). Therefore when the enemies had arrived at the fort which is called Decempagos which is thirty miles distant from Metz, because with our God there is always care concerning his slaves and, thus said the psalmist, in anger he repressed not mercy, suddenly such great darkness blockaded those Huns that they were altogether ignorant of what to do or where to turn. Then searching with care for the cause of so much calamity, for such was needed, they heard from one of the captives whom they were leading that they were so exposed on account of the servant of the Lord of Heaven, Auctor, who, he said, was to be seen in the number of captives. Soon therefore, inquiry having been made, they found out the blessed Auctor, who, when they asked him what he wanted to receive as a reward for freeing them from so much danger, replied to them that for himself no reward would be more pleasing than if all the captives they were leading should be allowed to return to their own homes, and that if they did this he promised that without doubt he would obtain from his lord that all those who were held by it would be freed from darkness. And it was done. And soon, in all their army, the Huns, seeking out the captives whom they were leading, returned them to the blessed Auctor. And thus this venerable servant of Christ, whilst for a while he shared the lot of the captives, he equally released many from captivity. O how much greater triumphed that glory concerning these released citizens than were able to triumph the crude Barbarians who earlier had led them away like victors!

13). We come to another miracle, which, by the merit of that same man, was obtained by heavenly virtue. At a certain time when in the oratory of the blessed Protomartyr Stephen, concerning which we referred above, a beam collapsed from the very gable of the roof, and the marble of especial brightness which was in the altar broke in pieces so that it split altogether into two parts. The blessed Auctor, with all those who were there, being saddened at the inflicted loss, ordered those same fractures to be joined together and repairs to be prepared; for which he offered the duty of divine sacrifice in the usual way. And thus he showed to all those who were astonished and wondering what he was going to do that he was soon about to make sacrifice to God for the purpose of salvation. Straight away all that wreck was made solid, as though it was not at all separated before. And that same marble is that which can be admired, not calmly, right up to the present day. For thus far it had appeared separated to those who were watching carefully; but touched by careful fingers it is proved solid, so that nothing in it is perceived as evidence of the split. There is no doubt that many miracles were achieved by this man but how great and what kind of man he was can be known from those which are fully related.

14). Apletius, the fourteenth, succeeded this man. Then Urbicius was the fifteenth. The sixteenth was Bonarius. The seventeenth was Torentius. The eighteenth was Consolinus. Then was Romanus. And then Fronimus was the twentieth. After these was Chroclitus.
Appendix I. A book of the bishop of Metz.

was Agathander. Thus three of those we describe, as is to be seen in their names, in origin are believed to have come from the Greeks.

15). After these Sperus ruled the church. Then was Villricus. Then Petrus was the twenty-fifth. Agiiulf was the twenty-sixth, who, as they say, was descended, by a noble father sprung from a family of senators, from a daughter of Clovis, King of the Franks. After this man was his nephew (or grandson), Arnald by name. Pappolus succeeded this man.

16). After these the most blessed Arnulf was summoned to the guidance of the church, a man made clear through all the light of sanctity and splendour of birth, who, originating from the pedigree of the most noble and powerful of the Franks, was thus set over the church, so that he should become governor of the palace. And then this man, whilst in this life as well as after its conclusion, perpetuated many miracles, about which if anyone wishes to learn let them read the little book which was specially composed concerning his acts. One wonderful deed of his, however, I will repeat, which I was amazed that he who composed his vita passed by. When this man was doing penance for some transgressions it happened that he was crossing the bridge over the river Moselle. And when he saw the deep waters, impenetrable by sight, no doubt with the assurance of hope in his mind, he pulled off a ring from his finger and threw it down into those deep waters saying "At the time when I have received that ring which I have just thrown down I will count myself absolved from the bonds of guilt." Indeed after some years, when he had ascended to the office of the episcopate, one certain day a fisherman brought a certain fish which he had caught himself, because he was abstaining from meat, ordered to be prepared for the evening meal. And when, in the usual way, the servant of that office (i.e. the cook) cleaned it out, he discovered the same ring in the intestine of the very fish. This man, amazed at this but ignorant of the thing, offered it to the blessed Arnulf. He, when he saw it, immediately recognised it and, now sure of the remission of his sins, he repeated thanks to omnipotent God, and thence on he led not an indulgent life but constrained himself with more restraint. This venerable father was not different to that Gideon who once asked for a sign from the Lord. As a matter of fact that man (Gideon) wished to gain evidence of whether he would be able to have the victory in battle over his enemies, through a fleece placed on the ground; this man (Arnulf), throwing a ring into the most deep waters of the river wished to make inquiry as to whether he had now gained the victory over the Enemy. Strong indeed were those which that man (Gideon) conquered but stronger were those whom this man (Arnulf) overcame. These things I learnt from no ordinary person, but I learnt them from the report of the champion of all truth himself, the most high King Charles who, descending in lineage from the same blessed Arnulf, stood as great-great-great-grandson to him in the line of generation. For this venerable man, to come back to the above subject, procreated from the coupling of marriage two sons in the time of his youth, that is Anschisus and Chlodulf, of whom Anschisus is believed to have taken his name from Anchisus, father of Aeneas who once came from Troy to Italy. For the people of the Franks, so is related by the ancients, draw the
beginning of their lineage from the Trojans. When therefore the venerable Arnult had these two sons, concerning whom we have spoken before, seeing that he was merciful and always attentive to works of piety, he began to urge both his sons to give about that he should distribute all of his means to the use of the poor. Then the elder son, Chlodulf, wholly refused to be able to do this, that is that he himself should give freely the portion (or the family inheritance) owed to him to his father; but indeed on the other hand the younger son, that is Anschisus, believing in the piety of Christ and that many things would be given to him if he did this willingly promised to be obedient in all things which his father wanted. The venerable father thanked his son, and foretold him that more than he had given he would have; besides, he blessed him and his whole lineage to be born in future. And it was done. For they acceded to more wealth than he left to Anschisus. And indeed in it was established paternal blessing, so that from his lineage were born such energetic and strong men that, not undeservedly, the kingship of the Franks was transferred to them.

17). And listen! that you may know this I will tell with few words. Anschisus begat Pippin, than whom nothing could ever be more daring. Pippin begat Charles, to be compared absolutely with the strongest men of all, who, among other great battles which he fought he chiefly crushed the Saracens, and up to this day that ferocious and perfidious race have been terrified of the arms of the Franks. This man begat Pippin, sufficiently distinguished with strength and wisdom nevertheless, who among other things which he did, with wonderful good luck wore down and subdued the Gascons, long rebellious to the power of the Franks, with Waifar their prince. The great king Charles, who expanded the kingdom of the Franks as it had never been before, was the son of this man. Among many admirable things which he did, he subdued to his power the Lombards, until then defeated by his father. The king of theirs, who was called Desiderius, was captured, and the other, who was called Adelgis, reigning with his father, was driven to Constantinople, and everything else was subdued without a serious battle and, which seldom happens, he tempered the victory with moderation. Besides, releasing from dire straits the Romans and that same Romulean Town which had desired his presence for a long time and which had once been the mistress of the whole world but then groaned, weighed down by the Lombards, he increased his own power and he became master of the whole of Italy, with mild domination nevertheless. Concerning this man you do not know whether you should wonder more at the warlike power that was in him or at his clarity of wisdom and knowledge of all the liberal arts.

18). This man produced four sons and five daughters by Hildegarde, his wife. However, he had before legal marriage, a son named Pippin by Hilditrude, a noble girl. These are the names of his sons which Hildagarde bore him. The first was called Charles, that is called by the name of his father and great-grandfather; the second, also, Pippin, like his brother and grandfather; the third was called Louis who was twinned with Lothar who died after two years. Concerning whom now, God willing, Pippin holds the kingdom of Italy and Louis the kingdom of Aquitaine.
19. Hildegard having died, the most excellent King Charles took Fastrada to wife. Hildegard found rest in the oratory of the blessed Arnulf in the town of Metz, because the kings drew the origin of their destiny (i.e., their ancestry) from the blessed Arnulf, they buried the dead bodies of their dear ones there. For there were buried two daughters of King Pippin, of whom one was called Rodthaid and the other Adelaid; there also were buried two daughters of the younger King Charles, namely Adelaid and Hildegard, who, called by the name of her mother, Hildegard, quickly followed her dying mother. So that the reader should be satisfied concerning them, I have bothered to note below the epitaphs of all these, composed by me by order of the glorious King Charles.

a). 

Epitaph of Rodthaid, Daughter of King Pippin.

Here I lie who am called Rodthaid by name,
Who draw my birth from a seed of too much fame,
For my brother is Charles who relied on the power
Of the Thunderer and subdued the western peoples by arms.
Pippin is my father, who was born of Charles the prince
Who overthrew with great slaughter the tyrant Aggerenus.
Pippin was my great-grandfather, than whom no one was more daring.
Then powerful Anchisus was my great-great-grandfather,
Who drew his name, long afterwards, from that Trojan Anchisus.
That blessed father and bishop, the blessed Arnulf,
Who shines everywhere with wonderful deeds, begat this man.
Here my relatives placed me, relying on the hope of him.

b). 

Epitaph of Adelaid, Daughter of the Above King.

You, whom undying love and the sake of obtaining salvation
Have caused to come here with a watchful heart,
Do you wish to know why this holy place holds numerous tombs,
This place where the hall of heaven is open?
That holy man who later tended the sheep-fold of the Lord,
Had earlier been the father of a legitimate stock,
Whose posterity, relying on their patron great-great-great-grandfather.
Wished to be able to place their limbs in this place.
Here lies Adelaid, pious virgin daughter of Pippin, at peace.
At the same time, Holy Father, look after her and the others.

c). 

The Epitaph of Queen Hildegard.

Golden letters with their reddish yellow shapes,
Teach how famous are the limbs buried here.
Here lies the most high Queen Hildegard,
Who was a good wife to the powerful King Charles,
Who transcended the children of her famous stock,
As much as an Indian pearl does the ground whence it came to light.
So outstanding in her was the grace of a flourishing form.
That no one in the west could be more beautiful than her.
whose tender beauty not ever 
Cardonix from France, 
Or lilies mixed with roses could equal.
Nevertheless the eyes [or "glory"] of her heart, the sweetness 
of her spirit, 
And her interior decorum surpasses this outward show.
You were gentle, wise, clever, merry, bountiful, 
And enhanced by all abundant goodness. 
But why say more when there can be no greater praise. 
Of you than that you pleased such a man!
And when that man, strong in battle, joined lands to his 
ancestral sceptres
Romulean Tiber and swan-bearing Po, 
You alone were found to be worthy to hold. 
The golden sceptres of many kingdoms in your hands. 
Now you are taken from us in the twelfth year. 
Since mellifluous love united you. 
The twelfth year took you back. 
O alas, mother of kings, alas, the glory and the pain!
The Frank, the Suebian, the German and the Briton too, 
The Spanish cohort together with the hard Goth, all mourn you. 
The inhabitant of the Loire laments you, and the land of Italy. 
And anxious Rome bewails your very death, 
You move the strong hearts of men to tears. 
And tears fall among weapons and shields. 
Alas, with what flames did you burn the masterful heart, 
Of your husband, which is always wise and firm with strength. 
But a certain hope consoles all grieving people, 
Because through your worthy deeds you hold holy kingdoms. 
Now, O Arnult, in your prayers, obtain of Jesus that this 
woman, 
Become your partner in them, kindly father.

d). Epitaph of Adelaid daughter of King Charles who was born in Italy, 
when he subdued that land.

In this tomb a pretty little girl lies buried, 
Who was called Adelaid of the Holy River, 
To whom Charles was the father, powerful by twin diadems, 
Noble by nature, sufficiently strong in arms. 
She assumed this origin near the lofty walls of Pavia. 
When her powerful father seized the Italian domains. 
But hastening to the Rhone she was carried off from the 
threshold of life. 
And the heart of her mother is wounded with sorrow from afar. 
She died on the point of seeing her father's triumphs. 
Now she holds the blessed domains of the Eternal Father.
e). Epitaph of Hildegard, daughter of the Above king.

Hildegard, bitter death suddenly snatched you, 
Just, indeed, as at the advent of Spring the North wind 
snatches away the privet.
And the course of your life had not yet completed a year. 
Nor came the light of a repeated [second] year to you.

-392-
Although a little virgin girl you leave no little mourning.
Piercing the royal heart of your father,
You renew the sorrow concerning the death of your mother who
had your name.

After you lived scarcely forty days.
With our sad hearts we shed rivers of tears.
You who are excessively fortunate now seek eternal bliss.

20). But from these things which you have tasted briefly, indeed
which were not to be omitted, I will return to the path of my
narrative.

21). And then after the most blessed Arnulf, Goeric, the thirtieth,
who was also called Abbo, took command of the church of Metz.

22). Then Godo, the thirty-first, took charge of the episcopal
office.

23). This man leaving the world, Chlodulf, of whom we made mention
above, the son, by birth, of the blessed father Arnulf, and brother-
too to Anschisus by whom the seed of kings was propagated, ascended to
the episcopal height because of his paternal sanctity, concerning whom
tradition brought to us nothing beyond the fact that he was sprung
from such a root.

24). This man withdrawing from the world, Abbo, the thirty-third, was
admitted, intending to govern the faithful people.

25). After whom, Aptatus, then Felix, arose as shepherds to the
Lord's flock.

26). Next Sigibald, from noble birth in origin, was brought as bishop
of that religious assembly, a man devoted to the usefulness of the
church in all things and also the most skilled restorer of holy
buildings. This man, anxious for the state of his soul, founded two
monasteries, of which one is called Eleriacum or Nova-cella, and
another which is called Novum Villare. Fearful pain of gout
vehemently afflicted this man but he, fixing his mind on eternal
joy, tolerated the bodily pains most patiently.

27). Next an outstanding man who should be praised by the clamour of
all, was chosen as bishop - Chrodegang from the pagus of Hesbaye,
descended, by Sigramn his father and Landrada his mother, from the
leading nobility of the Franks. This man stood out in the palace of
the mayor Charles, nourished by that man and referendary to him, and
by the time of King Pippin he deserved the glory of Bishop. He was
altogether the most bright, glittering by all nobility, adorned in
form, the most fluent in eloquence, steeped in his father's discourse
[i.e. in the vernacular] and in Latin, he was the teacher of servants
of God, and not only foster-father of widows and orphans but a most
clement guardian. Since he was reliable in all things, chosen by
King Pippin and a meeting of all the Franks, he was sent to Rome to
the venerable Pope Stephen and, just as everyone wished, he
summoned...
him to Gaul. This man united the clergy and made them to be converted to the appearance of monks of the cloisters and he instituted a rule for them, which they ought, naturally, to obey in church; to which clergy he gave freely and sufficiently supplies and relics so that they, having no need to pay attention to transient affairs, should be on the alert only with divine service. He ordered that same clergy, abundantly imbued with divine and Roman law, to serve the customs of the church of Rome with a chant, which up to that time had not been done in the church of Metz. With the help of King Pippin, this man ordered to be made a covering of the byre of the holy Stephen the Protomartyr, and an altar of the same saint, and chancels, and an arch of the presbytery. Similarly, in the church of the Blessed Peter 'Major' he commanded a presbytery to be made. He then built a pulpit decorated with gold and silver, and the arches of the throne in a circle before the altar itself. Besides, he built a monastery in the parish of the blessed Stephen in the Fagus Mosellensis, in honour of the most blessed Peter the Apostle, and enriched it with great means and settled monks there and joined them in one affections under the rule of the holy father Benedict. He then built another monastery which is called Gorze, where, in a like manner, he joined together no mean multitude of monks. Then he sought from Pope Paul in Rome the bodies of three holy martyrs, that is of the blessed Gorgonis, who rested at Gorze, and of the blessed Nabor, who was preserved in the monastery of Hileriacum [St. Avold], and of the blessed Nazarius, which was beyond the Rhine in the monastery which is called Lorisheim. Having built a church of those same martyrs with wonderful decoration, he brought them together. In fact, Chilliswindis, a religious woman, and Cancro her son, transferred their former estate to the same Bishop Chrodegang to the share of the blessed Stephen. This man was in fact blessed, liberal in aims, the most pure in charity, guardian of guests and strangers, but since it would take a long time to unravel the good things which he did, it should be enough to have sampled these few things of many. This man consecrated bishops, priests, deacons and other ecclesiastical orders of as many of the diverse sees as possible, four times a year on the sabbath day, as is the custom of the church of Rome. He ruled the church for twenty-three years, three months and five days. He died on 6th March in the days of King Pippin. He lies in the monastery of Gorze which he built from its foundations.

28). Here, now, most holy father Angilramn, your blessed place in the sequence of my narrative awaits you. But I, not forgetful of my insignificance, do not venture to try, less than suitably, to describe those things which are to be produced in writing concerning the very praiseworthy course of your life.

-394-
Appendix 1.b.

A Hand-list of Merovingian Charters of the Region of Metz.

No.: 1 (Wiss. 203).
Place Issued: ?
Date: 6 Kal. March, 6 Childebert (24 Feb. 661).
Parties: Boniface and Bishop Dragubod.
Purpose: -
Location of Grant: Villa Gairoldo (?Goerlingen, dép. Moselle).
Grant: The portion of Boniface’s dead son, Gundobald and the mill which belongs to it. Houses, lands, mancipii, vines, forests, meadows, pastures, waters and water-courses.
Terms: None.
Witnesses: Boniface, Teodbald, asked to write this by my father Boniface, CHRODOBER, GAISUER, CHRODOALD, LEDOALD, TEODOALD, CELLONE.
Scribe: Leodobert, asked by the above, wrote this.

No.: 2 (Wiss. 213).
Place Issued: Marsal.
Date: Kal April, 10 King Thudric (1 April 686-7).
Purpose: -
Location of Grant: 1. In the virus of Marsal.
   2. In another virus.
Grant: 1. Everything for making salt, with workshop, gate, canals, grades, and everything else which is necessary. Around this salt-pan are, on one side, Bertram’s land, on another Eobbo’s land, on one front runs the canal and on the other the gate on to the public road.
   2. That which Wangrulf obtained from Thetchar for making salt.
Terms: The Abbot to pay 50 solidi.
Witnesses: Duke Thetchar, Thetchar his son, Raderic, Adalaric, Godin, Madalbert, CHRODOBER.
Scribe: Babo.

No.: 3 (Pertz. Mayoral, 2).
Place Issued: Nivelles.
Date: 10 Kal. March, 12 King Thudric (20 Feb. 691).
Parties: Mayor Pippin II and Plectrude, and Abbot Romulfus of St. Arnulf’s, Metz.
Purpose: -
Location of Grant: Nugaretum in pago Wabrinse (Norroy-le-Sec).
Grant: Farm and buildings, fields, meadows, woods, cultivated and uncultivated, mancipii of both sexes, and everything else which Pippin has there.
Terms: None.
Witnesses: -
Scribe: -
No.: 4 (Wiss. 223 [= Wiss. 205 = Wiss. 252])
Place Issued: Wissembourg.
Date: Kal May, 5 king Childebert (1 May 699).
Parties: Ermbert and Otto, and Abbot Ratfrid of Wissembourg.
Purpose: -
5. Immanniullilla.
10. In villa Laumarigua.
11. In Munduni.
12. In Johanneullare.
Grant: 1. With the church of SS. Martin and Elarius (Hilary) & the relics of the saints, farms, houses, mancipii and accolae, fields, meadows, pastures, vines, woods, waters and watercourses, and appendices.
2. Similiter.
3. Similiter on both banks.
4. Similiter.
5. Similiter.
7. Similiter.
8. Similiter with all appendices.
10. Similiter.
11. Similiter.
12. The portion which Cuhnchryn their uncle gave them.
Terms: None.

3. in vico casellis (?)
Grant: 2. Lands, houses, basilicas, buildings, acoli, mancipii.
3. 5 Vines, with its seventeen masellis, woods, meads., pastures, mills, appendices, cultivated and uncultivated, waters and watercourses, mobile and immobile.
Whatever our ancestor Pippin held in the villa, inside the town and outside (infra urbem et extra).
Terms: None.
Witnesses: Hugo, Duke Arnulf, Milo, Count Wido, Count Rembert, Count Lambert, Count Warnar.
Scribe: -
Comment: Though Pertz reckons this charter to be spurious, G. thier (1980, p. xviii) thinks it is authentic. Its form is certainly very unusual for an early eighth-century charter and I would see it as interpolated, particularly the clause about Romana Sala (above, p. 203). Godefrid and Pippin are not known from any other sources.

No.: 24 (Pertz, Royal, 89).
Place Issued: Compiègne.

Leutrih with Amaldrude and their children.
Wolfger with his wife Amalsuind and their children.
Christian with his wife Baldhild and their children.
Ercanswind and her children.
Alihila and her children.
Amalgis, Eburoh, Chrosculif.
Tetta with her six children.
Terms: They serve Werald during his lifetime.
Witnesses: Werald.
Scribe: ?

No.: 39 (Wiss. 235).
Place Issued: Wissembourg.
Date: Kal. December our Lord Jesus Christ reigning in perpetuity, one year after the death of Mayor Charles, in the reign of Carlomann, Duke of the Franks (1 Dec. 741).
Parties: Rhebert and Abbot Weland of Wissembourg.
Purpose: -
Appendix 1.b.

Location of Grant: In Rimousière in pago Scarponinse (Gozo, near Hilbesheim (Glückner and Doll; Rimstorf). Grant: Field which Ribbert bought from Gertrude. The field over sixty perches long. The wood which Ribbert is seen to have in those sites or that marca.

Terms: None.

Witnesses: Ribbert (sic), Radulf, Theudald, Teudulf, Ermentert, Chrodoin, Boniface, Benedict, Gramgis, Folcold, Lantbert, Chardom, Arduin.

Scribe: Teutigar.

Comment: The six witnesses after Teudulf are borrowed from the previous charter, Wiss. 234 (above, no. 14). The charter ends moreover with the line ego hachicho hanc cartam rogitus scripsi, despite having already said that Teutigar wrote the charter. Hachicho the scribe has not been heard of since 713! Some doubt can be cast on the authenticity of the witness-list of this charter.

No.: 40 (Gozu-1).

Place Issued: Andernach.

Date: 10 May, 745.

Parties: Bishop Chrodeang and Gorza Abbey.

Location of Grant: 1. In fine haldoniaca in pago Scarponinse.
2. In loco nuncupato Siurone.
3. Godolino villa.
4. Bodelo curte and Haldiniaca.
5. Baudiciaca.
6. Aroniaga.
7. Tantulino villa.
10. Sigeio (Scy-Chazelles, dép. Moselle).
14. Prunido (Pény, dép.)
16. Supra Muselam villam Cluserado (Kluserath, Triererland).
17. Riviniacu.

Grant: 1. Whatever we have obtained by whatever means, and whatever St. Stephen's (cathedral, Metz) has.
2. Whatever Rigoald gave to St. Stephen's by charter, with the church of St. Paul.
3. Whatever belongs to the church of St. Paul.
4. Ditto.
5. Ditto.
6. Ditto, in all these places, that which Rigoald and his son gave to St. Stephen's.
7. That which Bavo gave to St. Stephen's.
8. That which St. Stephen's is seen to have.
9. St. Stephen's villa, with farms, courts, gardens, houses and buildings, lands, fields, meadows, vines, woods, cultivated and uncultivated, waters and watercourses, mancipii, illi, accise, epistolarii, private property, both sexes, mobile or immobile, and whatever else belongs to St. Stephen's there.
10. Half of the wood so that the brothers can make mecbamen there.
11. The property of St. Remigius (St. Remy-de-Scy) with his church and whatever belongs to it; what Adventius holds as benefice of St. Stephen's; four vines, with vintners and their wives, farms and their shares. These are their names: Harduin and his wife, Erliorca, Raganlind his wife, Erlulf and his wife, Wandalbert and his wife. Ancillae called Amalberga, Rigoberta and Eminane. One tenth of a demesne vineyard.
12. 3 vineyards with their vintners, their wives, farms and shares. Here are their names: Adelfrid and Gaucla his wife, AngLiirid and his wife; another Adelfrid, Wandelberga his wife, his sister.
13. The oratory of St. Andrew and whatever belongs to it, which Teuduin holds of St. Stephen's as a benefice.
14. The church of St. Martin and whatever belongs to it. Candidianus the conciliarius holds of St. Stephen's as a benefice.
15. One tenth of Fruindu, in grain, hay, cows, pigs, wethers, pack animals and so on.
16. One tenth of the produce of a vineyard, to be collected yearly.
17 and 18. Farms, courts, gardens etc., as for 9 Whatever St. Stephen's has there.
19. One tenth of the produce of a vineyard, to be collected yearly.
Terms: None.
Witnesses: Pippin the Mayor.
Scribe: -
Comment: The charter almost certainly does not represent an original eighth-century document. It seems to be a later medieval compilation. There is, however, no reason to doubt that the individual grants included are based upon authentic documents. The language of the charter is consistent with such a supposition.
Appendix 1.c.

List of other Charters Consulted.

This appendix simply contains a list, in chronological order, of the reference numbers and dates of the later eighth- and earlier ninth-century charters consulted in the preparation of this work.

the civitas of Metz: Chaouilley, Lavoye, Dieue-sur-Meuse and Audun-le-Tiche. p. 538
Appendix 2.a. Catalogue of Merovingian Cemetery Sites in the Civitas of Metz.

This catalogue contains all the cemetery sites known to this writer which are located within the civitas of Metz and which can be dated to the period from 450 to the later seventh century, that is between Ament's (1977) periods AM I to JM II, Böhner-Périn, periods II-IV. Ament's JM III (Böhner-Périn period V) is not well represented in the archaeological cemetery evidence in this region. Böhner-Périn period I (Böhme's (1974) periods I, II and III) is represented on a few sites but cemeteries belonging exclusively to this phase are also excluded.

It is the first catalogue of Merovingian sites which covers the whole of the civitas. Toussaint's works (1938a, 1938b, 1938c and 1938d) only dealt with Lorraine, and Hurstel's survey only covers the west of the diocese. This is the first survey to include all of the areas of the civitas now in the département of Bas-Rhin (Alsace) and in the Federal Republic of Germany. Although some technically lie outside the area of the civitas of Metz, the discoveries at Dieulouard (Meurthe-et-Moselle; nos. 83-84) have been included since they are probably associated with the castrum-site of Scarponne.

The records for each cemetery are placed under the following, generally self-explanatory headings:

No: Simply the number representing the site's place in the alphabetic sequence, referring to diagram 1.3. Different campaigns of excavation, or different discoveries, are differentiated by the use of letters.

Site: The name of the commune in which the site is found, followed by the département (France) or Kreis (West Germany), and finally, if possible, by a more specific geographical or field-name.

Year: The year in which the discoveries or excavations took place.

Excavator: Simply enough, the name of the excavator of the site, the discoverer of chance-finds or, in some cases, the man who brought them to the attention of the local museum, historical or archaeological society.

Quality: A number representing the quality of the data. This ranges from 5 (the lowest quality) to 1 (the highest) as follows:

5. A chance discovery or excavation, from which no information except, at most, the whereabouts of the site, the nature of the grave goods, perhaps the number of graves, some data on grave-construction and funerary practice, can be gleaned.
4. More or less as 5, but, either because of better recording or because only one or two graves were found, grave-inventories can be established for individual burials.
3. A site which has been excavated, usually planned, and inventories recorded. However, either the graves on the plan are not numbered, or no information on the integrity is given, or occasionally no site plan is given. There will usually be no data on variables such as skeletal position, grave-layout, -size or -shape.
2. A site excavated not quite to modern standards, or which has been published badly or in an incomplete form, so that a complete picture has to be built up from several separate records. All graves have separate inventories, the site will be planned (with the graves numbered), and at least some data on the
Appendix 2.a.

integrity of the graves and in other variables (skeletal position, grave-shape, size and construction) will exist.

1. A site excavated to (for instance) modern standards. The cemetery is well-planned and the graves are well-recorded, with information on the integrity of the burial. All have detailed inventories, and, presumably, data exist on variables such as grave-shape, size and construction, even if they are not published. Occasionally a site has been down-graded from 1 to 2 if the data remain unpublished after an excessive time-lag.

Publication: The works consulted by this writer, in which information about the site is to be found.

Numbers: The number of graves (not burials) on the site.

Grave-Goods: The types of grave-goods found on the site. Wherever possible, cursory inventories have been included.

Comments: Any other relevant information concerning grave-size, grave-construction, orientation, funerary customs and so on.

Plan: Whether or not a plan exists for the site. The entry 'Yes' means that a schematic plan can be produced for the site, from the records, but not one which could really satisfy modern archaeological standards of accuracy. An entry of '0' means that a plan is referred to in the literature but has not been seen by this writer. 1 indicates that the graves are not numbered on the known plans. 'Photo' means that, where the discovery is of a single grave, a published photograph of the grave exists.

Distance from modern settlement: How far the site is from a modern settlement or chateau. In cases where the entry reads 'within 2 km.' or some other large distance, this usually indicates that the location of the site is unknown but that the dimensions of the commune mean that it must lie within x km. of a modern village.

-415-
No. 1
Site: Achen (Moselle).
Publication: WG, map 6; i.FS pp. 7-8, p. 155; Toussaint 1938d, p. 18.
Numbers: ?
Grave-Goods: ?
Comments: No other information.
Plan: No. Distance from modern settlement: -

No. 2.
Site: Altheim (Saar-Pfalz-Kreis) 'am Knopp'.
Numbers: 116.
Grave-Goods: Scramasaxes, swords, francisca, shield-boss, spears, belt-sets, necklaces, pendants, earrings, pins, Merovingian coins.
Comments: Graves 1.6 - 3.5m. long, 0.5 - 1.6m. deep. Traces of wooden coffins.
Plan: Yes. Distance from modern settlement: 300m.

No. 3.
Site: Altrippe (Moselle). 'L'Eglise'.
Numbers: 1+
Grave-Goods: Coin and silvered buckle. M.M. has a vase fragment (C.J. no. 959).
Comments: Skeleton in churchyard. Church on site of villa.
Plan: No. Distance from modern settlement: In village.

No. 4.
Site: Altvillen (Moselle).
Publication: Salin 1949, map III.
Numbers: ?
Grave-Goods: ?
Comments: Apart from on Salin's map, this site finds no other mention. Possibly an error.
Plan: No. Distance from modern settlement: ?

No. 5.
Site: Amanvillers (Moselle).
Publication: Toussaint 1938d, p. 5; WG, map 5.
Numbers: ?
Grave-Goods: ?
Comments: Between Amanvillers and St.-Privat, discovery of a cemetery. No further details.
Plan: No. Distance from modern settlement: ?
Appendix 2.a.

No: 6.
Site: Amelécourt (Moselle) 'Le Haut des Vignes'.
Year: 1870  
Numbers: 1.
Grave-Goods: Scramasax and Roman coin.
Comments: No other information.
Plan: No.  
Distance from modern settlement: 500m.

No: 7.
Site: Ancy-sur-Moselle (Moselle).
Year: 1913.  
Publication: Toussaint 1938d, p. 5.
Numbers: 1
Grave-Goods: Buckle and three bronze plaques.
Comments: Cross decoration on dorsal plaque.
Plan: No.  
Distance from modern settlement: Within 2 km.

No: 8
Site: Angevillers (Moselle).
Year: 1969  
Publication: Simmer 1987, p. 337.
Numbers: 9
Grave-Goods: 1 flint (in grave 2), a ring and a knife in a female grave, and some sherds of pottery in the child-grave.
Comments: S.L. graves in three rows. In general the arms were placed by the sides and the legs were straight. One grave was that of a child. In another grave, the head rested on the chest, and in another it had been removed. Two skeletons were sent for physical anthropological study to a laboratory in Caen. One was of a man of over fifty. The other (the grave without the skull) revealed mongoloid characteristics. Simmer dates the site to the end of the seventh century.
Plan: No.  
Distance from modern settlement: ?

No: 9.
Site: Arnaville (Meurthe-et-Moselle).
Year: ?  
Publication: Hurstel 1984, II, p. 10; Benupr 6 Repertoire.
Numbers: ?
Grave-Goods: ?
Comments: Discovery of a cemetery in the fields below the village. S.L. graves. No other information. Possibly not Merovingian.
Plan: No.  
Distance from modern settlement: Within 1 km.

No: 10a.
Site: Arracourt (Meurthe-et-Moselle). 'La Haute Riouville'.
Year: 1844  
Numbers: 2
Comments: At least one S.L. grave.
Plan: No. Distance from modern settlement: In village.

No: 10b.
Site: Arracourt (Meurthe-et-Moselle). 'La Haute Rouville'.
Year: 1846 Excavator: ? Quality: 4
Numbers: 1
Grave-Goods: Scamasax, knife, francisca.
Comments: Grave found under a stone (maybe an S.L. grave).
Plan: No. Distance from modern settlement: In village.

No: 11.
Site: Arry-et-Han (Meurthe-et-Moselle) 'Le Tomboux'; 'Le Pré Soldat'.
Year: 1899 Excavator: ? Quality: 5
Publication: Beaupré Rép., p. 17; Toussaint 1938a, p. 33; Toussaint 1943-45, p. 520; Salin 1949, map III.
Numbers: ?
Grave-Goods: 'Helmet' (prob. shield-boss) and horse-bit from 'Le Pré Soldat'. Weapons and diverse objects.
Comments:
Plan: No. Distance from modern settlement: 400m.

No: 12.
Site: Arry (Meurthe-et-Moselle).
Publication: Salin 1949, map III.
Numbers: ?
Grave-Goods: ?
Comments: Apart from on Salin's map, the site finds no mention. Possibly a confusion with Array?
Plan: No. Distance from modern settlement: ?

No: 13.
Site: Ars-Laquenexy (Moselle).
Numbers: ?
Grave-Goods: 2 swords (C.J. nos. 593-4).
Comments: M.M. acquired objects. No other information.
Plan: No. Distance from modern settlement: ?

No: 14.
Site: Athienville (Meurthe-et-Moselle).
Year: 1820 Excavator: ? Quality: 5
Numbers: ?
Grave-Goods: Weapons and belt-fittings; pottery.
Appendix 2.a.

Comments: S.L. graves.
Plan: No.  Distance from modern settlement: 200m.

No: 15a.
Site: Attilloncourt (Moselle).
Year: 1887  Excavator: ?  Quality: 5
Publication: WG, map 6; Clermont-Joly 1978.
Numbers: ?
Comments: Objects acquired by the M.M.
Plan: No.  Distance from modern settlement: ?

No: 15b.
Site: Attilloncourt (Moselle).
Year: 1889  Excavator: Dr. Mouchot.  Quality: 5
Numbers: ?
Comments: Grave-goods went to the Musée Lorrain.
Plan: No.  Distance from modern settlement: ?

No: 16.
Site: Atton (Meurthe-et-Moselle) 'Cimetière des Allemands'.
Publication: Beaupré Rep. p. 18; Toussaint 1938a, p. 34.
Numbers: ?
Grave-Goods: ?
Comments: Beaupré claims it was here that the Germans killed by Jovinus in 367 were buried. Presumably this indicates local discoveries of weapon-graves.
Plan: No.  Distance from modern settlement: ?

No: 17a.
Site: Atton (Meurthe-et-Moselle) 'Sous le chemin ferrée'.
Year: 1950  Excavator: ?  Quality: 5
Numbers: ?
Grave-Goods: 3 small scramasaxes, scabbard buttons, 'demi-lame'.
Comments: S.L. graves.
Plan: No.  Distance from modern settlement: 300m.

No: 17b.
Site: Atton (Meurthe-et-Moselle) 'Sous le chemin ferrée'.
Year: 1967  Excavator: ?  Quality: 5
Numbers: ?

-419-
Civitas Mediomatricorum.

Grave-Goods: None.
Comments: Skeleton and grave-goods (if any) had been destroyed.
Plan: No. Distance from modern settlement: 300m.

No: 18.
Site: Auboué (Meurthe-et-Moselle) 'Cimetière'.
Year: 1888 Excavator: ? Quality: 5
Numbers: 1
Grave-Goods: ML has a pitcher from Auboué.
Comments: Sarcophagus grave.
Plan: No. Distance from modern settlement: 1 km.

No: 19a.
Site: Auersmacher (Kr. Saarbrücken) '23 Ringstrasse'.
Year: 1925 Excavator: W. Held. Quality: 5
Numbers: ?
Grave-Goods: Weapons, including a sword.
Comments: No other information.
Plan: No. Distance from modern settlement: In village.

No: 19b.
Site: Auersmacher (Kr. Saarbrücken) 'Ringstrasse'.
Year: 1932 Excavator: ? Quality: 5
Numbers: ?
Grave-Goods: Swords, rings and buckles.
Comments: No other information.
Plan: No. Distance from modern settlement: In village.

No: 19c.
Site: Auersmacher (Kr. Saarbrücken) '32 Ringstrasse'.
Year: 1974 Excavator: J. Gries Quality: 5
Numbers: 1 (2 bodies).
Grave-Goods: Glass fragments & bronze wire loop (? earring). There had been other discoveries in the area in 1961-2 and 1973.
Comments: Reused S.L. grave. 'Probably Merovingian.'
Plan: No. Distance from modern settlement: In village.

No: 20.
Site: Augny (Moselle) 'Ferme Grosyeux'.
Year: 1834 Excavator: ? Quality: 5
Publication: Simon 1834-5.
Numbers: ?
Grave-Goods: Axes, spear, two chains.
Comments: The lance was folded in two. Simon says that the weapons were identical to those found in 'Gallo-Roman' graves in the
Appendix 2.a.

arrondissement of Briey. At this date this is probably a reference to a Merovingian cemetery.

Plan: No. Distance from modern settlement: ?

No: 21.
Site: Aulnois-sur-Seille (Moselle).
Year: 1906 Excavator: ? Quality: 5
Publication: Toussaint 1938d, p. 9; REL, p. 43; WG, map 6; Clermont-Joly 1978; Hurstel 1984, II, p. 17.
Numbers: ?
Comments: No further information.

Plan: No. Distance from modern settlement: 7

No: 22.
Site: Autreville-sur-Moselle (Meurthe-et-M' 11e) 'Champ des Prussiens'.
Year: 1888 Excavator: ? Quality: 5
Numbers: ?
Grave-Goods: ?
Comments: S. L. graves and bones. No other information.

Plan: No. Distance from modern settlement: ?

No: 23.
Site: Baerendorf (Bas-Rhin).
Publication: WG, map G.
Numbers: ?
Grave-Goods: ?
Comments: The site finds no mention except in Wolfram & Gley.
Plan: No. Distance from modern settlement: Within 1 km.

No: 24.
Site: Bambiderstroff (Moselle).
Year: 1802-5 Excavator: ? Quality: 5
Numbers: ?
Grave-Goods: 'Arrows and axes'. 'Weapons, bones and necklace beads'.
Comments: Discovered during excavations for the foundations of a convent near the church, at the entrance to the village.
Plan: No. Distance from modern settlement: In village.
Civitas Mediomatricorum.

No: 25.
Site: Baronville (Moselle) 'Bois du Patural'.
Year: 1820 Excavator: ? Quality: 5
Numbers: One or more.
Comments: Report says one grave but this seems an unlikely inventory.
Plan: No. Distance from modern settlement: ?

No: 26.
Site: Basse-Ham (Moselle).
Publication: Simmer 1987, pp. 357-8, planche X.
Numbers: 12+.
Grave-Goods: (1st group) Vase, comb, flint, spearhead. (Grave 2.1) Pot sherds, tile fragments, glass-sherds. (Grave 2.2) Bronze brooch. (Grave 2.3) Pot sherds, nails, iron point. (Grave 4.2) 2 earrings, 20-bead necklace, bronze chain, spindlewhorl.
Comments: Four groups of graves. The first, of four burials, was not excavated properly. Three graves yielded the artefacts listed above. A fourth, S.L. grave contained no grave-goods.

The second group of three burials, found some way from group 1, were all S.L. graves, with flagstone bases, oriented W-E, and had an average width of 0.8m and an average depth of 0.9m. All three had stone pillows. Graves 2.1 and 2.3 contained ashes, and grave 2.3 also contained animal bones. Grave 2.1 was that of an adult male. Simmer's arguments that these are not late Roman burials are not very convincing. All the features which he claims are typically (late) Merovingian (few grave-goods, S.L. graves, ashes, stone pillows, and a possible coffin {grave 2.3}) can also be observed in late Roman inhumation cemeteries. Grave 2.2 appears to have contained a Roman brooch, and a pit containing a 4th-century pitcher was found nearby. Of course, Roman artefacts are reused in Merovingian graves, but the undoubtedly Merovingian groups 1 and 4 were found some way from group 2. Whilst they are probably Merovingian, the date of these graves remains unclear and we cannot rule out the possibility of a late Roman cemetery used into the Merovingian period.

The third group of graves, some distance from group 2, comprised 3 disturbed S.T. graves, oriented N-S. One was the subject of any observations. It was the grave of an adolescent. Apparently no remaining grave-goods. The date of the graves remains impossible to establish.

The fourth and final group, discovered in a different area of the site, contained 2 S.T. graves oriented N-S. One was a disturbed grave of a male. The other (grave 4.2) was that of a young woman. The grave-goods are illustrated by Simmer. These graves seem clearly Merovingian. The presence of a strongly feminine artefact-kit in grave 4.2 adds some support to the hypotheses outlined in chapters 10-12.

Plan: No. Distance from modern settlement: Within 1 km.

No: 27a.
Site: Basse-Yutz (Moselle).
Year: 1900 Excavator: ? Quality: 5
-422-
Appendix 2.a.

Numbers: ?

Grave-Goods: Scramasax.

Comments: Chance find by 'brasserie'.

Plan: No. Distance from modern settlement: In village.

No: 27b.

Site: Basse-Yutz (Moselle).

Year: 1904 Excavator: J.-B. Keune. Quality: 3

Numbers: ?

Comments: Probably an extension of a Gallo-Roman cemetery. Excavations continued in 1906 and afterwards. S.L. graves, covered with tiles. Two at least were oriented W-E. Simmer illustrates some grave-goods.

Plan: No. Distance from modern settlement: In village.

No: 28.

Site: Baudrecourt (Moselle).

Year: 1893 Excavator: ? Quality: 5

Numbers: 1.

Grave-Goods: Scramasax.

Comments: No further information.

Plan: No. Distance from modern settlement: ?

No: 29.

Site: Bayonville-sur-Mad (Meurthe-et-Moselle).

Year: 1840 Excavator: De Beure. Quality: 5

Numbers: ?

Grave-Goods: S.L. graves and bones.

Plan: No. Distance from modern settlement: Within 3 km.

No: 30.

Site: Bébing (Moselle) 'La Hutte'.

Year: 1840 Excavator: ? Quality: 5

Numbers: More than one.

Grave-Goods: Weapons which 'all crumbled away'. MS has some beads. MS also has two earrings and two small fibulae (Lütz 135c).

Comments: The earrings and brooch apparently came from a child's grave.

Plan: No. Distance from modern settlement: 400m.
No: 31.
Site: Belleau (Meurthe-et-Moselle) 'Sur le Grand Pré'.
Numbers: 1.
Grave-Goods:
Comments: S.I. grave with zig-zag decoration on the cover.
Plan: No. Distance from modern settlement: Within 1.5 km.

No: 32.
Site: Bénestroff (Moselle).
Numbers: ?
Grave-Goods: Shield-boss, three knives, arrow head.
Comments: Maybe all from one lavish grave.
Plan: No. Distance from modern settlement: In village.

No: 33.
Site: Berg (Bas-Rhin) 'Berg-Kirch'.
Publication: Forrer 1934, map opp. p. 230; Salin 1949, map III.
Numbers: ?
Grave-Goods: ?
Comments: Appears only on these maps. No further details.
Plan: No. Distance from modern settlement: Within 1 km.

No: 34a.
Site: Berthelming (Moselle) 'Alt-Schloss'.
Year: 1051 Excavator: ? Quality: 5
Publication: Bénoit 1862, p. 3 (special pagination); Toussaint 1938d, p. 14.
Numbers: ?
Grave-Goods: Spearheads.
Comments: Found in Sarre during bridge-building.
Plan: No. Distance from modern settlement: 500m.

No: 34b.
Site: Berthelming (Moselle) 'Alt Schloss'.
Year: 1854 Excavator: ? Quality: 5
Publication: Bénoit 1862, p. 3 (special pagination); Toussaint 1938d, p. 14.
Numbers: 1
Grave-Goods: Scramasax.
Comments: S.L. grave.
Plan: No. Distance from modern settlement: 500m.
Appendix 2.a.

No: 34c.
Site: Berthelming (Moselle) 'Alt Schloss'.

Numbers: 24.

Site: Clémery (Meurthe-et-Moselle) 'Terres Noires'.
Publication: Gallia 18, 1980; Cuvelier 1988a; Cuvelier 1988c; Guillaume et al 1988, pp. 76-77.
Numbers: 4.
Comments: Still not properly published.  One man c. 40 yrs. old, 2 women aged between 20 and 30 and one child of 8-10 yrs.  Only one grave had grave-goods, presumably that of the adult male.
Plan: Yes.  Distance from modern settlement: 1 km.

No: 68.
Site: Clémery (Meurthe-et-Moselle) 'Bénicourt'.
Year: 1869  Excavator: ? Quality: 1

-435-
Publication: Hurstel 1984, II, pp. 60-61; Cuvelier 1988c, p. 5-.

Numbers: ?

Comments: Tradition in 1889 reported that great battle had been fought here, between Swedes and Lorrains, hence the discovery of weapons and bones. Cuvelier reports the discovery of a cemetery site other than 'Terres Noires' in the commune, at 'Bénicourt'. It is difficult to decide whether this is what is referred to in the 1889 tradition.

Plan: No. Distance from modern settlement: In village.

No: 69.
Site: Cocheren (Moselle) 'Le Héraple'.
Year: 1881-1904 Excavator: E. Huber. Quality: 5

♀ 40-60  Orange/red bowl (C. J. 873).  

63  
♂ 40-60  Silvered bronze plaque-buckle (C. J. 107), knife (C. J. 656) and comb (C. J. 443).  

63bis.  ? Child.  

64  
♂ 40-60  2 iron buckles (C. J. 82), iron buckle (C. J. 79), 2 fragments of bone pins (C. J. 446), flint flake (C. J. 474), purse-fastener (C. J. 506), knife (C. J. 657), scramasax, coin, 'belt-hooks' and a second knife.  

65  
♂ 22-40  2 iron buckles (C. J. 87), knife (C. J. 658), fine red/orange pot (C. J. 867) and a 'belt-hook'.  

66  
♂ 22-40  Halstatt.  

67  
♀ 40-60  No11e. Hands on the chest.  

68  
♂ 60+  None.  

69  
♀ 40-60  None.  

70  
♂ 0-7  Silvered bronze plaque-buckle and dorsal plaque (C. J. 108), large iron nail (C. J. 772), iron object (C. J. 762), knife (C. J. 660), knife (C. J. 659), javelin and scramasax (? C. J. 533).  

71  
♂ 60+  Axe (C. J. 613), flint (C. J. 479), bronze tongue (C. J. 147), bronze dorsal plaque (C. J. 135), 2 knives (C. J. 661), purse-fastener (C. J. 503), plaque of buckle (iron with bronze rivets) and scramasax (? = the larger of the 2 knives).  

72  
♀ 22-40  Disturbed.  

73  
♀ 22-40  Disturbed.  

74  
♂ 40-60  Disturbed.  

75  
♂ 60+  Bronze belt buckle and dorsal plaque (C. J. 152), flint (C. J. 475), bronze needle (C. J. 457), comb, knife and 3 coins.

**Grave-Goods:** swords, saxes, axes, spears, knives, buckles, necklaces, bracelets, rings, earrings, combs, hairpins, brooch, red- and grey-ware ceramics, flints, Gallo-Roman artefacts.

**Comments:** V. near the site of a large Gallo-Roman settlement. 2 S.L. graves, the rest S.T. One double-grave. A pit containing bones on E. edge of cemetery. Site was excavated in a somewhat unusual manner, with graves left on 'plinths' of earth and area around excavated. Most artefacts went to the M.M. but some went to the M.S. The publication of the site leaves much to be desired, but contrasting all the published data, including Clermont-Joly's excellent drawings and descriptions of those finds in the M.M., a consistent inventory can be reached. Alain Simmer now has Delort's notes and is working on a definitive publication.

**Plan:** Yes. Distance from modern settlement: 500m.

Appendix 2. a.

Publication: Notes of S.K.S.
Numbers: 3.
Grave-Goods: None were seen.
Comments: S.L. graves. No further information.
Plan: Yes*. Distance from modern settlement: In village.

No: 98b.
Site: Eschiringen (Saar-Pfalz-Kreis) 'Auf dem Schneidersberg'.
Year: 1950 Excavator: B. Hartz. Quality: 2
Publication: Notes of S.K.S.
Numbers: 7.
Grave-Goods: (Grave 1) Scramasax & some iron traces; (grave 4) Sword, belt fittings, bronze plaque; (grave 6) Scramasax, spearhead, bronze object, ?knife, ?purse-fastener, iron belt buckle, 3 other iron objects.
Comments: Only three graves had grave-goods. Graves 30-50cm. deep. WE orientation. Grave 3 partly S.L. Graves damaged by foundation trenches and robbed by workmen.
Plan: Yes#. Distance from modern settlement: In village.

No: 98c.
Site: Eschiringen (Saar-Pfalz-Kreis) 'Auf dem Schneidersberg'.
Year: 1953 Excavator: C. Reheis Quality: 3
Publication: Notes of S.K.S.
Numbers: 1.
Grave-Goods: Knife.
Comments: 50cm. deep. S.L. grave.
Plan: No. Distance from modern settlement: In village.

No: 98d.
Site: Eschiringen (Saar-Pfalz-Kreis) 'Auf dem Schneidersberg'.
Year: 1957 Excavator: B. Hartz. Quality: 2
Publication: Notes of S.K.S.
Numbers: 3.
Grave-Goods: (Grave 1) Scramasax, knife, belt buckle and plaque; (grave 2) Scramasax, iron buckle and iron plaque, with silver inlay, 3 arrow heads, knife, iron objects; (grave 3) Light grey pot fragments.
Comments: Graves 55-60 cm. deep. WSW-ENE orientation. Traces of a coffin in grave 2. Grave 3 apparently damaged.
Plan: No. Distance from modern settlement: In village.

No: 99.
Site: Euvezin (Meurthe-et-Moselle) 'À Côte Belle Tâche' 'La Meisse'.
Year: 1861 Excavator: A. Lequy & C. Louste Quality: 5
Numbers: 1.
Grave-Goods: Scramasax, vase.
Comments: S.L. grave. A hoard of 140 coins, up to Constantine I, found nearby.
Plan: No. Distance from modern settlement:
No: 100.
Site: Eywiller (Bas-Rhin).
Year: ?
Excavator: ?
Quality: 5
Publication: Forrer 1934, map opp. p. 230; Salin 1949, map III.
Numbers: ?
Grave-Goods: ?
Comments: Site finds no mention apart from on these maps. Possibly an error.
Plan: No.
Distance from modern settlement: ?

No: 101.
Site: Fameck (Moselle) 'Morlange'.
Year: 1875
Excavator: C. Abel
Quality: 5
Numbers: ?
Comments: Abel dated the graves to the fifth century and attributed them to Ripuarian Franks.
Plan: No.
Distance from modern settlement: ?

No: 102.
Site: Farebersviller (Moselle) 'Jardin, Egloff'.
Year: 1854
Excavator: ? A. Dufresne
Quality: 5
Numbers: ? ('Several').
Comments: The spur was found in the same grave as a sword.
Plan: No.
Distance from modern settlement: In village.

Farschweiler: Linckenheld (LFS, pp. 47-48) describes a cemetery discovered here. It is, however, clearly an error for Farebersviller, which he describes in identical terms later on! WG map 6 appears to make the same error.

No: 103.
Site: Faulcrey (Moselle).
Year: 1838
Excavator: ?
Quality: 5
Publication: Benoit 1862, p. 36 (special pagination); Kraus 1889, p. 147; LS, p. 40; Toussaint 1938d, p. 16.
Numbers: ?
Grave-Goods: ?
Comments: 'Barbarian' S. L. R. graves, 1.6 x 0.8m., in 'several' rows. Gold coins found nearby. Cemetery on hill to S. of village.
Plan: No.
Distance from modern settlement: Within 1 km.
Appendix 2.a.

No: 104.
Site: Faulquemont (Moselle).
Year: ?
Excavator: ?
Publication: M.A.M. 1840-41, p. 155 (Toussaint gives reference as p. 515; this is an error); LB, p. 31; Toussaint 1938d, p. 7.
Numbers: ?
Grave-Goods: Necklace.
Comments: No other information.
Plan: No.
Distance from modern settlement: ?

No: 105.
Site: Feulx (Meurthe-et-Moselle) 'Salle d'Asile'.
Year: ?
Excavator: ?
Numbers: ?
Grave-Goods: ?
Comments: Cemetery on site of St. Stephen's church. Several stone coffins 'which must have been the graves of Gaulish chiefs', according to a notice of 1889 (this identification usually implies furnished burial).
Plan: No.
Distance from modern settlement: In village

No: 106.
Site: Fechingen (Saar-Pfalz-Kreis).
Year: 1870s
Excavator: ?
Publication: Records of S.K.S.
Numbers: 3.
Grave-Goods: ?
Comments: No other information.
Plan: No.
Distance from modern settlement: ?

No: 107.
Site: Flévy (Moselle) 'Campenu'.
Year: ?
Excavator: ?
Publication: Kraus 1889, p. 144; REL, p. 296; Salin 1949, map III; Hurstel 1984, II, p. 93.
Numbers: ?
Comments: No other information.
Plan: No.
Distance from modern settlement: Within 2 km.

No: 108.
Site: Flévy (Moselle) Chelaincourt.
Year: 1842
Excavator: ?
Publication: Simon 1842-43 (Schlaincourt); Simon 1843-44, p. 256; Simon 1859, p. 68; Kraus 1889, p. 66.
Numbers: ?
Comments: No other information.
Plan: No.
Distance from modern settlement: ?
No: 109a.
Site: Florange (Moselle) 'Moulin de Daspich'.
Year: 1827 Excavator: ? Quality: 5
Numbers: ?
Comments: No other information (see below).
Plan: No.
Distance from modern settlement: Within 1 km.

No: 109b.
Site: Florange (Moselle) 'Le Kem'.
Year: 1828 Excavator: Vicomte de Cussy. Quality: 5
Numbers: 14
Comments: A Gallo-Roman cremation was also discovered. Indications of S.L. graves. Many S.T. graves. EW orientation, + one NS grave. Some confusion about the nature of the discoveries. L'Austrasie 1841 mentions weapon-graves, and de Cussy himself alludes to such when quoted by Clercx, Dufresne & D'Huart (1843-44, p. 272), though he qualifies it with 'they said'. De Cussy makes it clear that he found no weapons himself in his letter to L'Austrasie 1842 (see below).
Plan: No.
Distance from modern settlement: Within 1 km.

No: 109c.
Site: Florange (Moselle).
Year: 1843 Excavator: J. Clercx Quality: 5
Numbers: ?
Grave-Goods: 100 coins of Valens and Valentinian. 'Gallo-Roman' one-edged sword ('scramasax'), bronze circular brooch with blue glass incrustations, 'filigree' brooch, belt buckle, bronze bracelet and necklace.
Comments: No other information (see below).
Plan: No.
Distance from modern settlement: Within 1 km.

N.B. The Florange discoveries are somewhat confused. The 1827 discoveries are referred to as having been found by the moulin(s) de Daspich and the 1828 finds at 'Le Kem' (which could be very close by). Toussaint was confused by the fact that de Cussy's letter to L'Austrasie 1842 appears to refer to discoveries at the Château de Bettange. In fact they refer to the finds at Le Kem, as is made clear by a quote from de Cussy's report to the Société des Antiquaires de France (Clercx, Dufresne & D'Huart 1843-44, p. 272), though he qualifies it with 'they said'. De Cussy makes it clear that he found no weapons himself in his letter to L'Austrasie 1842 (see below).

The date of the site is somewhat vexed. Simmer (citid.) states that no Merovingian graves have been found at Florange. He argues that the site is a late Roman inhumation cemetery. Certainly, the grave with the early fifth-century coin hoard belongs to the last phase of Roman rule in Gallia Belgica, the existence of a NS grave fits the
hypothesis and the graves which de Cussy excavated himself sound like classic late Roman inhumations. De Cussy makes it clear that he found no weapons. However, the other reports of weapons, in 1827, 1828 and 1843, are hard to dismiss, as is the 1827 account of balances, brooches and jewellery, which are uncommon in late Roman graves in Lorraine. Moreover, Clercx’s descriptions sound more like typical Merovingian burials than late Roman graves. His description of a circular brooch with glass incrustations tallies exactly with seventh-century Merovingian disc brooches (cp. Périn’s [1980] type 31; Delestre (ed) 1988, plates XXII & XXIV), and his ‘filigree’ brooch also sounds Merovingian. It would seem that at Florange we may have an example of a cemetery used without break from the early Roman period through to the Merovingian era. This might well have serious implications for the question of continuity of occupation of the vicus-site of Florange.

No: 110.
Site: Folkling (Moselle).
Year: 1827 Excavator: The mayor of Folkling. Quality: 5
Publication: Altmayer 1828-29; Toussaint 1938d, p.12.
Numbers: 1.
Grave-Goods: ?
Comments: EW orientation. Grave cut into the rock. Skeleton 6½ ft. long. The grave was smashed up by a superstitious local woman! Funeral urns and some holes with traces of fire were found nearby.
Plan: No. Distance from modern settlement: ?

No: 111.
Site: Fraquelfing (Moselle) ‘Haut de Cabès’.
Year: 1902 Excavator: T. Welter. Quality: 4
Numbers: 4.
Grave-Goods: (Grave 1) Red-ware pot, scaramasax, knife. (Grave 2) knife and scaramasax. (Grave 3) scaramasax and knife. (Grave 2 or 3) shield-boss, belt-buckle, iron ring, strike-light. (Grave 4) 2 earrings, small arrowhead.
Comments: Graves 2 and 3 were superimposed and 4 seems clearly to be disturbed. All the graves were S.L., 2 m. deep. The bottom of grave 2-3 was reddened by fire.
Plan: Yes*. Distance from modern settlement: ?

No: 112.
Site: Freistroff (Moselle).
Publication: WG map 6; Salin 1949, map 3; Clermont-Joly 1978.
Numbers: ?
Grave-Goods: Plaque-buckle (C.J. no. 55), bronze earring (C.J. no. 318) and knife (C.J. no. 690).
Comments: All from one grave? No further information.
Plan: ? Distance from modern settlement: ?
Civitas Mediomatricorum.

No: 113a.
Site: Fribourg (Moselle).
Year: ?
Excavator: M. Karst.
Numbers: 1.
Grave-Goods: ?
Comments: A small grave.
Plan: No.
Distance from modern settlement: ?

No: 113b.
Site: Fribourg (Moselle).
Year: 1927-28
Excavator: ?
Numbers: 4.
Grave-Goods: Late Roman pottery.
Comments: No other dating evidence. The graves could well therefore simply be late Roman inhumations.
Plan: No.
Distance from modern settlement: ?

No: 114.
Site: Gersheim (Saar-Pfalz-Kreis).
Year: 1866 onwards
Excavator: A. Damm.
Publication: M.H.V.P. 1871, p. 132 ff.; Mehlis 1877, p. 70; Mehlis 1879, p. 61; Schäffle 1965, p. 107; Reinhard in Bertemes et al 1988, pp. 187-190.
Numbers: 20+.
Grave-Goods: Swords, spearheads, knives, shield-bosses, arrowheads, scramasaxes, buckles, belt-fittings, combs brooches, beads, pottery.
(Grave 1) Pot, beads.
(Grave 2) buckle, sax.
(Grave 5) sax, knife, belt-set.
(Grave 6) scramasax, knife, buckle, shield-boss, comb, belt-fittings.
(Grave 9) Shield-boss comb, arrowheads, belt-buckle, belt-fittings.
(Grave 10) disc brooch, pot.
Comments: Clearly a very large, rich and important cemetery, unfortunately discovered before archaeological techniques were advanced enough to extract the information which we might wish. Even so, six partial inventories can be reconstructed. One female grave was reported to have been buried face-down with hands behind back and feet crossed. This burial was also the only grave to be oriented EW rather than WE.
Plan: *
Distance from modern settlement: Within 500m.

No: 115.
Site: Giraumont (Meurthe-et-Moselle).
Year: c. 1845
Excavator: ?
Numbers: ?
Grave-Goods: Spearhead.
Comments: No other information.
Plan: No.
Distance from modern settlement: ?
Appendix 2. a.

No: 116a.
Site: Goerlingen-Hilbesheim (Moselle) 'Le Vieux Moulin'.
Year: 1902 Excavator: ? Quality: 5
Numbers: 2.
Grave-Goods: None.
Comments: Partial S. L. graves inside a square construction 3m. x 3m.
Plan: No. Distance from modern settlement: 1 km.

No: 116b.
Site: Goerlingen-Hilbesheim (Moselle) 'Le Vieux Moulin'.
Year: 1959 Excavator: M. Lutz. Quality: 3
Publication: Gallia 22, 1964, p. 361.
Numbers: 1.
Comments: Charcoal in the grave-fill. Traces of a fibrous covering, perhaps a grass mat, above the body. SW-NE orientation.
Plan: no. Distance from modern settlement: 1 km.

No: 116c.
Site: Goerlingen-Hilbesheim (Moselle) 'Le Vieux Moulin'.
Year: 1962 Excavator: M. Lutz. Quality: 3
Publication: Gallia 22, 1964, p. 361.
Numbers: 1.
Grave-Goods: 10-bead necklace, iron buckle.
Comments: 4 skulls in the grave. Obviously reused.
Plan: No. Distance from modern settlement: 1 km.

No: 117.
Site: Goin (Moselle).
Publication: Clermont-Joly 1978.
Numbers: ?
Grave-Goods: Scramasax (C-J no. 552).
Comments: No other information.
Plan: No. Distance from modern settlement: ?

No: 118.
Site: Gondrexange (Moselle).
Year: 1901 Excavator: ? Quality: 5
Publication: Welter 1902, p. 475; LS, p. 45; Toussaint 1938d, p. 16.
Numbers: ?
Grave-Goods: ?
Comments: Discovery of a Merovingian cemetery on the territory of the village. It is unclear whether or not this site = Gondrexange 'Haut Dessponck'.
Plan: No. Distance from modern settlement: ?
No: 119.
Site: Gondrexange (Moselle) 'Haut-Dessponck'.
Year: 1931  Excavator: E. Linckenheld  Quality: 4
Publication: Linckenheld 1932b; Linckenheld 1932-33; Toussaint 1938, p. 17; Salin 1957, pp. 18-19.
Numbers: 5.
Grave-Goods: Sword.
Comments: One double grave containing a dog's skull. The cemetery was on the site of a Roman villa.
Plan: Yes*. Distance from modern settlement: 1.5 km.

No: 120a.
Site: Gorze (Moselle) 'Auconville - Chemin des Mortes Gens'.
Year: 1859  Excavator: ?  Quality: 5
Numbers: ?
Grave-Goods: ?
Comments: No other information.
Plan: No. Distance from modern settlement: Within 1 km.

No: 120b.
Site: Gorze (Moselle) 'Auconville - Sentier de Mortes Gens'.
Year: 1950  Excavator: ?  Quality: 5
Numbers: 1.
Grave-Goods: A sarcophagus grave. A manuscript of the local curate also mentions a cemetery.
Comments: No other information.
Plan: No. Distance from modern settlement: Within 1 km.

No: 121.
Site: Gorze (Moselle) 'Source des Bouillons'.
Publication: Clermont-Joly 1978.
Numbers: ?
Grave-Goods: 1 key (C-J no. 765).
Comments: No other information.
Plan: No. Distance from modern settlement: 

No: 122.
Site: Gravelotte (Moselle).
Year: 1842  Excavator: ?  Quality: 5
Numbers: ?
Comments: Several graves in similar sarcophagi.
Plan: No. Distance from modern settlement: Within 1.5 km.
Appendix 2.a.

No: 123.
Site: Grigy (Moselle).
Publication: WG, map 6.
Numbers: ?
Grave-Goods: ?
Comments: Finds no mention except on this map. Possibly an error.
Plan: No. Distance from modern settlement: ?

No: 124.
Site: Grosbliederstroff (Moselle) 'Forêt de Grosbliederstroff'.
Year: 1842 Excavator: M. Girgois. Quality: 5
Publication: M.A.M. 1042-43, pt.1, p.351; WG, map 6; LFS, p.59; Toussaint 1938d, pp.18-19; Rohr n.d., p.198; Clermont-Joly 1978.
Numbers: 'A large number'.
Grave-Goods: Spears, scramasaxes, Roman coins, plaque-buckle (C.J. no. 66), 13-bead necklace (C.J. no. 360, provenanced as from grave 8).
Comments: S. T. graves. WE orientation.
Plan: No. Distance from modern settlement: ?

No: 125.
Site: Gros-Recherching (Moselle).
Year: Excavator: Quality: 5
Publication: Clermont-Joly 1978.
Numbers: ?
Grave-Goods: 1 plaque-buckle (C-J no.33).
Comments: No other information.
Plan: No. Distance from modern settlement: ?

No: 126a.
Site: Güdingen (Kr. Saarbrücken) 'Fronfeld'.
Year: 1933 Excavator: ? Quality: 5
Numbers: 1.
Grave-Goods: Spearhead.
Comments: Circumstances of the discovery were unclear.
Plan: No. Distance from modern settlement: In village.

No: 126b.
Site: Güdingen (Kr. Saarbrücken) 'Fronfeld'.
Numbers: 3.
Grave-Goods: (Grave 1) antler pendant, necklace (inc. 4 pierced coins), dress-pin, pol, glass goblet, bread-cutter.
(Grave 2) beads, disc brooch, 2 box-trechoes, rock crystal amulet, comb, bronze bowl, bucket.
(Grave 3) bronze belt buckle.
Comments: All the graves were damaged and/or robbed by the workmen.
Civitas Mediomatriorum.

Grave 1 was at least 1.5m. wide, 2.5 - 2.8m. long and 2.0m. deep. Grave 2 was at least 1.8m. wide (no other measurements).

Plan: * Distance from modern settlement: In village.

No: 126c.
Site: Güdingen (Kr. Saarbrücken) 'Fronfeld'.
Year: 1965  
Excavator: W. Schöhle  
Numbers: 6.
Grave-Goods: (Grave 4) horse-bit, balances, silver coin, sword, scramasax, 2 spearheads, shield-boss, belt-fittings, tweezers, purse-fastener, comb, shears, 3-4 knives, bronze needle, bronze bowl, bucket.
(Grave 5) scramasax, knife, strike-a-light, coin, buckle and belt-set, knife, 23 unidentifiable iron fragments.
(Grave 6) knife, strike-a-light, scramasax, shears, bronze buckle.
(Grave 7) buckle, coins, 3 brooches, beads, iron fragments.
(Grave 8) about 40 beads.
(Near grave 5) a biconical vase.

Comments: All the graves were damaged, grave 4 the least. Grave 9 was simply an empty trench, with neither bones nor grave-goods. Grave 4 was 2.5 - 3.0m. long, 2.0m. deep and at least 1.2m. wide. The others were 1.05 - 1.60m. deep. S.T. graves.

Plan: * Distance from modern settlement: In village.

No: 127.
Site: Québestroff (Moselle).
Year: ?

Inventory:
Grave:
Grave-Goods.
1. Spearhead.
2. Scramasax (C.J. 550), buckle and dorsal plaque (C.J. 73) and ‘belt-hook’ (C.J. 486).
4. Triangular plaque-buckle, scramasax, rivets from the scramasax scabbard and oval belt buckle.
5. Knife (C.J. 674) and plaque-buckle (C.J. 65).
6. Knife (C.J. 675) and belt buckle (C.J. 88).
7. Knife (C.J. 676), disc brooch (C.J. 282), bronze ring (C.J. 336) and earrings.
8. 31-bead necklace (C.J. 356) and earring (C.J. 317).
9. 2 knives.
14. 43-bead necklace (C.J. 357), bronze ring (C.J. 332),...
Appendix 2.a.

earrings (C.J. 314 + 1 disappeared).

15. Sword (pommel C.J. 514), scramasax, rivets from scramasax scabbard (C.J. 517 & 276), Kn'le (C.J. 680) and 2 belt-sets (C.J. 24, a counter-plaque, is the only surviving element.

17. Knife (C.J. 681), bow-brooch (C.J. 301), 2 earrings (C.J. 315), large plaque-buckle (C.J. 20) and an iron nail (C.J. 771).

Grave-Goods: (Out of context) Spears, scramasaxes, flints, necklace, key, hammer, buckles and knives.

Comments: Grave-goods to M.M. No pottery apparently. Most graves intact. Some reuse of graves (none of those inventoried, though). Graves cut into the rock. Simmer illustrates the finds not in the MM collection, from old photos.

Plan: Yes  Distance from modern settlement: 350m.

No: 136.
Site: Heckendalheim (Saar-Pfalz-Kreis) 'In den Runggärten'.

No: 143b.
Year: 1882 **Excavator:** R. Dupriez. **Quality:** 5
Numbers: ?
Grave-Goods: 3 scramasaxes, 5 knives, 3 buckles, 3 appliqué buttons (?), 2 flat bronze objects, a flint, nails and iron coffin-fittings.
Comments: Objects to M. L. No further information.
Plan: No. **Distance from modern settlement:** Within 1 km.

No: 143c.
Year: 1888 **Excavator:** ? **Quality:** 5
Publication: Wiener 1888; Salin 1937, p. 214; Toussaint 1938a, p. 39;
Appendix 2.a.

Hurstel 1984, II, p. 130.

Numbers: c. 50.
Grave-Goods: 3 vases, arrowhead, spear, scramasax, iron buckles and belt fittings, bronze hook, 2 coins.
Comments: S.L. graves, some made of upright flagstones, others of masonry. One grave was 1.5m. long, 0.4m. (head) and 0.35m. (feet) wide and 0.38m. deep. This contained a red-ware pot. It seems likely from the dimensions that this was not the grave of an adult. The inventory is quite typical for a child's grave, if the analyses performed in chapters 10 and 11 are anything to go by. Some graves were reused and contained several bodies.

Plan: No. Distance from modern settlement: Within 1 km.

No: 143d.
Site: Homécourt (Meurthe-et-Moselle) 'Plateau les Roches'.
Year: 1889
Excavator: ?
Publication: J.S.A.L. 1889, p. 120; Toussaint 1938a, p. 39; Hurstel 1984, II, p. 130.

Numbers: ?
Grave-Goods: 3 scramasaxes, 1 knife, axe, francisca, bronze buckle, strike-a-light, flint, 'pierre à aiguiser', bronze needle.
Comments: Objects to M.L. No other information.
Plan: No. Distance from modern settlement: Within 1 km.

No: 143e.
Site: Homécourt (Meurthe-et-Moselle) 'Plateau les Roches', 'La Côte'.
Year: 1897
Excavator: ?

Numbers: ?
Grave-Goods: Pottery, scramasaxes, spearheads.
Comments: S.L. graves.
Plan: No. Distance from modern settlement: Within 1 km.

No: 143f.
Site: Homécourt (Meurthe-et-Moselle) 'Plateau les Roches'.
Year: 1907
Excavator: ?

Numbers: ?
Grave-Goods: Sword, knife, round decorated buckle.
Comments: No further information. Homécourt was clearly a large and important cemetery in use for a long time. It is unfortunate that it was discovered and destroyed so early.
Plan: No. Distance from modern settlement: Within 1 km.

N.B.: The M.L. has the following grave-goods from Homécourt, but it is unclear from which series of discoveries they came:
Spearheads (ML. 33.07, ML. 41.07, ML. 42.07), Scramasaxes (ML. 60.07, ML. 61.07), knives (ML. 69.07), razor (ML. 74.07), axe (ML. 82.07), plaque-buckles (ML. 177.07, ML. 178.07, ML. 224.07, ML. 225.07, ML. 226.07, ML. 227.07; the windows catalogue lists eight plaque-buckles: N-1, N-3, N-12, N-31, N-32, N-36, N-39, N-51; which, if any, of these, correspond to the above numbers is unclear), strike-a-light -466-
No: 144.
Site: Imling-Xouaxange (Moselle) 'Le Moulin Zarixin'.
Publication: Linckenheld 1930-31; LS, p. 68; Toussaint 1938d, pp. 17-18.
Numbers: ?
Grave-Goods: Sword, scramasaxes, knives, spearheads, grey and red ware ceramics, belt-buckles, hooks, coins, glass beads.
Comments: Fires apparently lit in and around graves. Traces of food offerings. Clearly a large and very important site in an area which otherwise has had no large cemeteries excavated. We can only express dismay at the almost criminal ineptitude of its excavation and destruction.
Plan: No. Distance from modern settlement: 1 km.

No: 145a.
Site: Ittersdorf (Kr. Saarlouis) 'Am Leichweg'.
Year: 1912 Excavator: ? Quality: 5
Numbers: ?
Grave-Goods: Roman coins, spur, buckle, scramasax.
Comments: Rheinisches Landesmuseum Trier received Roman coins in 19:3 from Mayor of Ittersdorf, but there is no other record of these discoveries. Site near parish church.
Plan: No. Distance from modern settlement: In village.

No: 145b.
Site: Ittersdorf (Kreis Saarlouis) 'Am Leichweg'.
Year: 1954 Excavator: ? Quality: 3
Numbers: 1.
Grave-Goods: 14-bead necklace.
Comments: S. L. grave, semi-circular at head-end. SW-NE orientation. The head was turned to the left, and the incisors were apparently missing at death.
Plan: Photo. Distance from modern settlement: In village.

No: 146.
Site: Jeandelaincourt (Meurthe-et-Moselle) 'Ville de Bloquemont'.
Numbers: 1.
Grave-Goods: ?
Comments: 3 skeletons in one stone coffin (sarcophagus?). No other information. May well = Sivry 'Mont-St.-Jean' (q.v.).
Plan: No. Distance from modern settlement: Within 1.5 km.

No: 147a.
Site: Juvelize (Moselle).
Appendix 2 a.

Year: 1861  
Excavator: Dr. Ancelon.  
Publication: J.S.A.L. 1861, p. 170; WG, map 6; Toussaint 1938d, p. 11. 
Numbers: 1.  
Grave-Goods: Gold coin, allegedly of Justinian, pierced for use as a necklace, together with 2 other small gold plaques.  
Comments: A child's grave.  
Plan: No.  
Distance from modern settlement: 'Near the village'.

No: 147b.  
Site: Juvelize (Moselle).  
Year: 1869  
Excavator: Dr. Ancelon.  
Publication: J.S.A.L. 1869, p. 84; WG, map 6; Toussaint 1938d, p. 84. 
Numbers: ?  
Grave-Goods: Merovingian triens.  
Comments: This seems to be a separate coin to that found in 1861. It is said to have been found between Juvelize and Donnelay. The two discoveries almost certainly represent a single cemetery, and one apparently well-furnished with Merovingian dating evidence.  
Plan: No.  
Distance from modern settlement: ?

Numbers: 150+
Comments: Site frequently, but ought not to be, confused with Métrich. Charcoals and ashes in graves. Charon's obol. Shells in graves. S.L. graves. WE orientation. One grave contained boss, comb and vase. Linckenheld noted that in the three rows of graves he saw, only one contained weapon graves. One grave face-down with legs bent. Apparently numerous 'sitting burials'. A pit containing a Mayen ware pitcher was also found on the site. Site implanted in the ruins of a villa. Objects scattered between M.T., M.S. and various local people. The site continued to be destroyed until the '60s, and Merovingian objects could be bought in antique dealers in Thionville until 1970. Yet another large and important site completely destroyed. Perhaps the most intriguing fact is that the site would have been carefully excavated had it been located only 10 km. further north, in Germany, where there was coherent organisation of ancient monuments in the 1930s (cp. the contemporary records of the
Civitas Mediomatricorum

Plan: No. Distance from modern settlement: Within 2 km, but on the site of 'deserted medieval village' of Danheim.

Grave-Goods: Pottery, spearhead.
Comments: Difficult to sort out these different sites. Most appear only on the maps in the B. S. C. M. H. A. in 1864 and 1865. ‘Galgenberg' and the single grave E. of the Roman baths are referred to simply as ‘tombes anciennes' and so may not be Merovingian. The others are referred to as ‘tombes franques'. The spearhead was found on the site of the Roman baths, suggesting the presence there too of graves. The graves seem to be S.L. One used a fragment of a Roman frieze. Todtenberg cemetery lies next to a prehistoric tumulus cemetery.
Plan: Yes.
Distance from modern settlement: 2 km.

No: 177a.
Site: Mazières-lès-Vic (Moselle) ‘Le Sternberg'.
Year: 1864
Excavator: Abbé Guillaume.
Quality: 5
Numbers: 100+.
Grave-Goods: Brooches, belt-buckles, shoe/garter-buckles, coins, key, beads, grey-ware ceramics, tweezers, spearheads, combs, arrowheads, scramasaxes (C.J. no. 551), axes (C.J. nos. 620 & 622), angon, knives, possible fragments of bronze wares.
Comments: Very irregularly arranged. WE orientation. Weapon graves were deeper than other burials (1.0-1.2m. deep as opposed to 0.6-0.8m. deep). Clearly a large and well-furnished cemetery.
Plan: No.
Distance from modern settlement: 200m.

No: 177b.
Site: Mazières-lès-Vic (Moselle) ‘Le Sternberg'.
Year: 1949
Excavator: M. Lutz.
Quality: 5
Appendix 2.a.

Numbers: ?
Grave-Goods: None.
Comments: Marcel Lutz found bones on the site. No other information.
Plan: No. Distance from modern settlement: 200m.

No: 178.
Site: Malleloy (Meurthe-et-Moselle).
Year: c. 1869 Excavator: ? Quality: 5
Numbers: 3.
Grave-Goods: None.
Comments: S. L. graves. Possibly not Merovingian.
Plan: No. Distance from modern settlement: ?

No: 179.
Site: Manhoué (Moselle) 'Four-A-Chaux'.
Publication: Lepage 1843, p. 345; Toussaint 1943-45, p. 519.
Numbers: 1+
Comments: One sarcophagus grave as well as others nearby (the grave-goods were in the latter).
Plan: No. Distance from modern settlement: ?

No: 180.
Site: Manom (Moselle).
Publication: Simmer 1987, p. 368.
Numbers: ?
Grave-Goods: Pottery and 'sabres' (scramasaxes?).
Comments: One or more cemeteries which have somehow escaped mention in the general literature for the region, except in a local Thionvillois periodical, Hemechtsland a Sprouch, no. 1, May 1983, p. 11.
Plan: No. Distance from modern settlement: ?

No: 181a.
Site: Manoncourt-sur-Seille (Meurthe-et-Moselle) 'Moulin de Brionne'.
Year: 1825+ Excavator: ? Quality: 5
Publication: Lepage 1843, p. 347; Toussaint 1938a, p. 33; Toussaint 1943-45, p. 528; Salin 1949, map III; Hurstel 1984, II, p. 169.
Numbers: 1+.
Grave-Goods: Scramasax, axe, sword.
Comments: 1 Sarcophagus grave contained the scramasax.
Plan: No. Distance from modern settlement: 1 km. (but Brionne was the site of a village; the site lies around its ruined chapel).
No: 181b.
Site: Manoncourt-sur-Seille (Meurthe-et-Moselle) 'Brionne'.
Year: 1920  Excavator: H. Renault.  Quality: 5
Publication: B. S. A. L. 1920, p.122; Toussaint 1938a, p.33.
Numbers: ?
Grave-Goods: Sword and scramasax.
Comments: No other information.
Plan: No.  Distance from modern settlement: 1 km. (see above.)

N.B. This cemetery is located on the boundary between the communes of Manoncourt and Nomeny and thus may equate with Nomeny 'Malnoy' (q.v.).

No: 182.
Site: Mars-la-Tour (Meurthe-et-Moselle).
Year: 1853  Excavator: ?  Quality: 5
Numbers: ?
Grave-Goods: ?
Comments: S. L. graves.
Plan: No.  Distance from modern settlement: In village.

No: 183.
Site: Marsal (Moselle) 'Maison Blanche'.
Year: 1902  Excavator: Abbé Merciol.  Quality: 5
Numbers: ?
Grave-Goods: Swords, scramasaxes, Roman coins, fragment of 'mola militaris', small bronze cross (C. J no.417), bronze pendant (C. J no.424), bronze ring (C. J no.829).
Comments: S. L. graves. NS orientation. Apparently face-down. 2 sarcophagi. The graves were all destroyed by workmen by the time Merciol arrived on the scene.
Plan: No.  Distance from modern settlement: 1 km.

No: 184.
Site: Marsal (Moselle).
Year: 1897  Excavator: J. Beaupré.  Quality: 5
Publication: J. S. A. L. 1897, p.120; Toussaint 1938d, p.12; Hurstel 1984, II, pp.172-3.
Numbers: ?
Comments: Pottery found in 'briquetage'. Unclear whether this = settlement or cemetery, and whether it represents the 'Maison Blanche' site.
Plan: No.  Distance from modern settlement: ?

No: 185.
Site: Marthille (Moselle).
Year: 1892  Excavator: ?  Quality: 5
Publication: REL, p.633; Salin 1949, map III; Hurstel 1984, II, -476-
Appendix 2.a.

pp. 174-5.

Numbers: 15+
Grave-Goods: ?

Site: Metz (Moselle) 'Lunette d'Arçon' & 'Rue de l'Évêché'.  
Year: 1840s - 1910.  
Excavator: ?  
Quality: 5
Appendix 2. a.

Toussaint 1938d, pp. 4-5.

Numbers: ?

Comments: The lunette d'Arçon was also called the lunette de Montigny (cp. Simon 1848-49, p.51, 'la lunette d'Arçon dite de Montigny'), which has led some authors (eg. Toussaint) to think that they were two separate sites. This cemetery was on the site of a Gallo-Roman cemetery, and there is little reason to suppose that there was any hiatus in its use between the early Roman period and the seventh century. A late fourth- or fifth century weapon burial has been found there. Some S.L. graves reusing Roman building stones. Sarcophagi. WE orientation. Some skeletons had teeth filed down 'comme chez certaines tribus de l'Océanie'. Horse skeleton. Nailed skull. It is difficult to date these practices, since the site was excavated so long ago and was in use for such a long time.

Plan: No. Distance from modern settlement: In town.

No: 193b.
Site: Metz (Moselle) 'Lunette d'Arçon', 'St. Arnoul'.
Publication: Keune 1905; Toussaint 1938d, pp. 4-5; Clermont-Joly 1978, pp.32-33; Clermont-Joly 1980, pp.75-76; Guillaume et al. 1988, p.93.

Numbers: ?
Comments: Crypt discovered when Lunette d'Arçon was demolished.
Plan: Yes. Distance from modern settlement: In town.

No: 194.
Site: Metz (Moselle) 'Place St.-Jacques'.

Mondelange (Moselle) ‘Mondelange-Richemont’: See Richemont ‘Lalach’.

No: 204–205.
Site: Mondelange (Moselle).
Year: 1894
Publication: Clermont-Joly 1978, p. 34; Simmer 1987, p. 350, planche VII.
Numbers: ?
Comments: Clermont-Joly states that these objects came from an unknown site. It is almost certain, however, that they came from one of the two sites listed below.
Plan: No. Distance from modern settlement: ?

No: 204.
Site: Mondelange (Moselle).
Year: 1912
Publication: LT, p. 79; Toussaint 1938d, p. 25; Clermont-Joly 1978, p. 34.
Numbers: ?
Grave-Goods: Ceramics and ‘chiselled’ buckle.
Comments: No other information.
Plan: No. Distance from modern settlement: In village.

No: 205.
Site: Mondelange (Moselle).
Year: 1929
Numbers: ?
Grave-Goods: Ceramics and ‘chiselled’ buckle.
Comments: No other information. May or may not = no. 197. Simmer (1987, p. 350) says there are at least two cemeteries at Mondelange.
Plan: No. Distance from modern settlement: In village.

Comments: No other information. Most of the cemetery apparently remains untouched.
Plan: No. Distance from modern settlement: Within 1 km.

N.B. The M.L. has the following artefacts from Moineville, but it is unclear from which series of discoveries they came:
Cloisonné disc-brooch (ML. 107.07 = O 3-38), iron key (ML. 286.07), 1 bead (O 1-23).
Appendix 2.a.

No: 206.
Site: Montois-la-Montagne (Moselle) 'La Patricie'.
Year: 1823  Excavator: Mme. de Niel.  Quality: 5
Numbers: 'A large number' (Kraus).
Grave-Goods:
Comments: Graves 0.5 - 0.6m. deep. Arranged in lines. An important cemetery which, thankfully, has again apparently remained unexcavated for the most part.
Plan: No.  Distance from modern settlement: Within 1.5 km.

No: 207.
Site: Montsec (Meuse) 'Le Grand Tombois'.
Publication: Toussaint 1938b, p. 34.
Numbers: ?
Grave-Goods: Swords, scramasaxes, spearheads, pottery and glassware.
Comments: Some graves, some with coffins. No other information.
Plan: No.  Distance from modern settlement: ?

No: 208.
Site: Morhange (Moselle).
Year: 1875  Excavator: ?  Quality: 4
Numbers: c. 20.
Grave-Goods: 2 'sabres or swords' (prob. scramasaxes), 1 spear, 1 vase, a pendant, a pin, 6 'chatons ou pierres communes'.
Comments: No other information.
Plan: No.  Distance from modern settlement: ?

No: 209.
Site: Morsbach (Moselle).
Year: 1993  Excavator: Abbé Bour  Quality: 5
Publication: LFS, pp. 120-1; Toussaint 1938d, p. 12; Clermont-Joly 1978, p. 35.
Numbers: ?
Grave-Goods: Spears, glassware, 2 knives, 10 brooches, a boss (C. J. no. 636), a key, a comb, a bracelet (C. J. no. 322), 5 necklace beads, ?a pot (C. J. no. 955).
Comments: Cemetery excavated but never published. Probable extension of a Gallo-Roman cemetery.
Plan: No.  Distance from modern settlement: ?

No: 210.
Site: Morville-lès-Vic (Moselle) 'La Louvière'.
Year: 1885  Excavator: Abbé Merciol  Quality: 5
Numbers: ?
Grave-Goods: Cuirasses, 2 coins, buckles (C. J. nos. 4, 13, 70), -483-
pottery fragments (C.J. nos. 967-71), vase (C.J. no. 877).

Comments: No other information.

Plan: No.  Distance from modern settlement: Within 1 km.

No: 211.
Site: Moucourt (Meurthe-et-Moselle) 'Monticule de Champcourt'.
Year: 1870  Excavator: ?  Quality: 5
Numbers: ?
Grave-Goods: Swords, scramasaxes, vases, strike-a-lights, prob. scabbard-fittings.
Comments: No other information.
Plan: No.  Distance from modern settlement: ?

No: 212a.
Site: Mousson (Meurthe-et-Moselle).
Year: 1895  Excavator: M. Robert.  Quality: 5
Numbers: ?
Grave-Goods: Bronze buckle.
Comments: Given to M.L.
Plan: No.  Distance from modern settlement: ?

No: 212h.
Site: Mousson (Meurthe-et-Moselle) 'Le Château'.
Year: 1987  Excavator: P. Cuveller.  Quality: 1
Numbers: 7
Grave-Goods: Knife, belt-set, vase.
Comments: 3 sarcophagi, 1 S.I. graves, 3 S.T. graves (2 cut into the rock). Grave-goods in 4 burials. Diagram in Cuveller, Delestre & Heber-Suffrin 1988 (p. 46) appears to show 4 sarcophagi rather than 3. The cemetery is associated with a Merovingian church.
Plan: Yes.  Distance from modern settlement: In village.

No: 213.
Site: Moyenvic (Moselle) 'Cimetière du Village'.
Year: 1901  Excavator: ?  Quality: 5
Numbers: 2
Grave-Goods: ?
Comments: 2 sarcophagi. The decorated cover of one was given to the M.M.
Plan: No.  Distance from modern settlement: In village.
Appendix 2.a.

No: 214.
Site: Moyeuvre-Grand (Moselle) 'Kleiner Vogesenberg'.
Year: 1901  Excavator: J.-B. Keune. Quality: 3
Numbers: 23.
Grave-Goods: (Grave 1) Scramasax, knife (C. J. no. 662), dorsal plaque; (Grave 10) knife (C. J. no. 665). (Grave 13) Knife (C. J. no. 663), disc brooch (C. J. no. 26), bronze pendant (C. J. no. 416), 21-bead necklace (C. J. no. 356). (Grave 14) silver inlaid plaque-buckle (C. J. no. 2). (Grave 17) knife (C. J. no. 664), tweezers (C. J. no. 426 or 427). (Grave 23) knife, comb, tweezers (C. J. no. 426 or 427).
Comments: 19 S. L. graves. 4 sarcophagi. Cemetery organised into groups. WE orientation. 19 of child's sarcophagi. Grave-goods to M.M. Only 6 or 7 graves had grave-goods. The graves yielding these have recently been re-numbered and the revised inventory is that given above.
Plan: Yes. Distance from modern settlement: Within 1 km.

No: 214a.
Site: Niedergailbach (Saar-Pfalz-Kreis) 'Die untere Sperre'.
Year: 1828  Excavator: ? Quality: 3
Publication: Records of S. F. S.
Numbers: 1.
Grave-Goods: Sword & scramasax (to the right of the body), spearhead (to the left of the body), bronze buckle (at the waist), bone comb (at the feet).
Comments: S. L. grave.
Plan: No. Distance from modern settlement: 500m.

No: 214b.
Site: Niedergailbach (Saar-Pfalz-Kreis) 'Die untere Sperre'.
Year: 1897  Excavator: ? Quality: 5
Publication: W. C. 17, 1898, p. 367; M. H. 17, 1898, p. 172; M. H. 18, 1899, p. 279 (f.); Schuhle 1965, p. 107.
Numbers: 2 swords, 3 scramasaxes, 1 spearhead, 3 knives, 1 shield-boss, 10 pieces of inlaid belt-fittings, 3 bowl-fragments.
Comments: No other information.
Plan: No. Distance from modern settlement: 500m.

Site: Ormesheim (Saar-Pfalz-Kreis) 'Pfarrhaus'.
Year: 1950 Excavator: Quality: 5
Publication: Records of S.K.S.
Numbers: ?
Grave-Goods: ?
Comments: S.L. grave with almost N-S orientation. Others were S.T. graves. Found during demolition of the Pfarrhaus of the Catholic church. People had found graves here since 1870.
Plan: No. Distance from modern settlement: In village.

No: 225.
Site: Ormesheim (Saar-Pfalz-Kreis) 'Ponsheimer Hof'.
Year: 1962 Excavator: W. Schöhle. Quality: 2
Numbers: 7.
Grave-Goods: (Grave 1) Francisca, scaramasax, scabbard-fittings, knife, 3 arrowheads, knife, purse-fastener, belt-hook, plaque-buckle and dorsal plaque. (Grave 2) 49-bead necklace, iron buckle. (Grave 3) Shield-boss and grip, spearhead, belt-fittings. (Grave 4) No grave-goods. (Grave 5) Spearhead, scaramasax, knife, scabbard-fittings, plaque-buckle, belt-hook. (Grave 6) 30-bead necklace, disc-brooch, knife, belt-hook, châtelaine. (Grave 7) Fragments of an iron shield-grip, iron peg, ?knife-handle or buckle-tongue, pot-sherds, ?scabbard-fittings. (Out of context) Sword and scaramasax.
Comments: S.L. graves. Graves 1 and 5 had traces of a wooden coffin. Gravels 2 and 7 were robbed. 7 was cut by 4. WSW-ENE orientation.
Plan: No. Distance from modern settlement: 420m.

No: 226.
Site: Orny (Moselle) 'Herbaucourt'.
Year: 1985 Excavator: C. Lefebvre. Quality: 1
Numbers: 10.
Grave-Goods: ? ('classique').
Comments: Perhaps 30 graves were destroyed before the excavation could begin. Only three of the excavated graves were intact (5, 7 and 8). Half of the excavated graves were orientated NW-SE, the other were at right-angles, SW-NE. They were aligned with an old road. All were S.T. graves, but number 8 had traces of upright planks placed on each side of the grave and revetted with stones on the inside. Stones were also found near graves 9 and 10.
Plan: Yes. Distance from modern settlement: Within 2 km.

Civitas Mediomatricorum.

No: 232.
Site: Pont-à-Mousson (Meurthe-et-Moselle) 'La Vitrée'.
Guillaume et al. 1988, p. 98.
Numbers: N/401 (site in use until the thirteenth century).
Grave-Goods: Bow brooch, necklace, scramasax, vase.
Comments: One double-grave wherein the subjects had linked arms, as at
Ennery, Audun-le-Tiche etc. 13 7th-century sarcophagi, reused in later middle ages. 2 S.L. graves, with grave-
goods. Graves around a church and in the remains of a Gallo-
Roman settlement. The corresponding early medieval
settlement has also been partly excavated. Orientation
could be W-E or N-S. Cuvelier says the latter are later
medieval. This is a vitally important complex which
demands publication to a modern standard.

Distance from modern settlement: Within 3 km.

No: 233.
Site: Pontpierre (Moselle).
Year: 1840. Excavator: Quality: F,
Publication: Simon 1840-41, p. 155; LB, p. 66; Toussaint 1938d, p. 8;
Hurstel 1984, II, p. 263.
Numbers: 1.
Comments: No other information.

Grave-Goods: ?
Comments: No other information.

Distance from modern settlement: ?

No: 235.
Site: Puttigny (Moselle).
Year: 1863. Excavator: M. Carmentrez. Quality: 5
Publication: J. S. A. L. 1863, p. 206; Toussaint 1938d, p. 9; Hurstel
1884, II, pp. 256-7.
Numbers: 1.
Comments: Found at shoulder of large male skeleton in S.L. grave in
the top of a mound.

Distance from modern settlement: Within 2 km.

No: 236.
Site: Puxieux (Meurthe-et-Moselle) 'Côte de Chambley'.
Year: 1865 Excavator: Dion, Dion, Bouteiller & Faultrier. Quality: 5
Publication: de Bouteiller 1866-67; B. S. A. H. M. 1867, pp. 96-97;
Appendix 2 a.

Numbers: 100+.

Comments: Traces of wooden coffins. Pottery placed at the feet.

Graves, some with covers. A sarcophagus was also apparently found. Graves in rows, with the burial 30 - 40cm apart.

In zone furthest from village there were no swords or bosses (because, saisi de Bouteiller B.S.A.H.M. 1868, p. 131, 'nous sommes ici en pleine démocratie'). It may well be that this zone is, rather, the latest, seventh-century phase. In a probably accurate statement to this effect, reached by bizarre logic, de Bouteiller (ibid.) adds that Roman coins 'permettent de dater l'époque des sépultures du septième siècle'. Clearly a huge and very important cemetery.

Plan: No. Distance from modern settlement: 200-1500m.

Puxieux (Moselle): Appears on WG map 6 and on Salin's map of cemeteries (1949, map III). There is, however, no record of any finds here (though Salin and the others may have been misled by the accounts of finds by Abbé Paulus of Puxieux; cp. Laneuville-en-Saulnes). Its appearance on maps is, however, most probably an error for Puxieux, which is spelt Puxieux in some reports (cp. J.S.A.L. 1885, p.102).

That this does not refer to the Moselle village is made clear by the fact that the donor is the curate of Trouville, a village close to Puxieux.

No: 237.

Site: Ratzwiller (Bas-Rhin) 'Heidenkirche'.

Numbers: ?

Comments: Near an old chapel, which served the deserted village of Birsbach, Frankish graves were discovered. One was a S.L. grave containing pottery. In 1915 a sarcophagus was placed on the plan of the old church.

Plan: No. Distance from modern settlement: 1 km.
No: 238a.
Site: Raucourt (Meurthe-et-Moselle) 'Sur la Pralotê'.

No: 246a.
Site: Richemont (Moselle) 'Lalach'.
Year: c. 1850  Excavator: ?  Quality: 5
Numbers: ?
Grave-Goods: Scramasax.
Comments: Some S.L. graves, made from upright flagstones. May = Mondelange 'Mondelange-Richemont'. Is associated with the abandoned village of Pépinville.
Plan: No.  Distance from modern settlement: Within 1 km.

No: 246b.
Site: Richemont (Moselle) 'Lalach'.
Year: 1932  Excavator: ?  Quality: 5
Numbers: 2+
Grave-Goods: Francisca, spears (C.J. nos. 521 & 532), scramasax (C.I. no. 554)
Comments: S.L. graves. W-E orientation. The francisca was apparently thrown in the Orne by a workman, and a third spear also disappeared. This cemetery is located on the very edge of the commune, with the result that some writers (Toussaint 1938d; Clermont-Joly 1978) place it in the commune of Mondelange. It seems that this is one large cemetery.
Appendix 2.a.

rather than two facing each other across the Or.
Plan: No. Distance from modern settlement: Within 1 km.

No: 247.  
Site: Richemont (Moselle) 'Rue des Vignes'.  
Year: 1972  Excavator: G. Stiller.  Quality: 5  
Numbers: 1.  
Grave-Goods: None.  
Comments: S. L. grave.  
Plan: No. Distance from modern settlement: In village.

Distance from modern settlement: In town.

No: 265a.
Site: Schalbach (Moselle) 'Schalbach-Bas', 'Die Stuben'.
Year: 1886
Excavator: ?
Numbers: 2.
Grave-Goods: Comb.
Comments: 1 sarcophagus (containing the comb) and a S.L. grave nearby. The Société pour la Conservation des Monuments Historiques D'Alsace found itself in some trouble with the Société de d'Histoire et d'Archéologie Lorraine for acquiring the sarcophagus, which was found in Lorraine rather than Alsace. However, it defended itself by saying that the sarcophagus had already been moved to Rauwiller (Bas-Rhin) when it was bought! The foundations of a church were found on the site in 1887. These were surrounded by bones. Schalbach-Bas, or Niederschalbach appears to have been a deserted village.
Plan: No.
Distance from modern settlement: ?

No: 265b.
Site: Schalbach (Moselle) 'Schalbach-Bas'.
Year: 1898
Excavator: T. Welter.
Publication: J. G. L. G. A. 1899, p. 383; LS, pp. 121-2; Toussaint 1938d, p. 15.
Numbers: 71.
Grave-Goods: Knife.
No: 266.
Site: Schwabenhof (Bas-Rhin).
Year: 1864  
Publication: Forrer 1934, p. 226, fig. 1, map opp. p. 230; Salin 1949, map III.
Quality: 5
Comments: Knife given to the M. M. No further information.
Plan: No.  
Distance from modern settlement: ?

No: 267.
Site: Scy-Chazelles (Moselle) 'Scy-Chazelles-le-Haut'.

Comments: 12-head necklace.
Plan: No.  
Distance from modern settlement: ?

No: 269.
Site: Sivry (Meurthe-et-Moselle) 'Mont-St.-Jean'.
Year: 1915  
Quality: 5
Comments: Apparently the beads, hook and sword were in a sarcophagus. If so it must have been reused. The graves were discovered during the digging of trenches, so it is somewhat amazing that we even have this information. This site probably = Jeandelaincourt 'Bloquemont'.
Plan: No.  
Distance from modern settlement: 1.5 km.

No: 270.
Site: Sivry (Meurthe-et-Moselle).
Year: 1968  
Quality: 4
Appendix 2.a.

Numbers: 2.
Grave-Goods: Buckle.
Comments: One adult, one child, buried by the N. wall of a villa.
Plan: No. Distance from modern settlement: ?

No: 271.
Numbers: ?
Comments: No other information.
Plan: No. Distance from modern settlement: 1 km.

No: 272.
Site: Tarquimpol (Moselle).
Year: 1067 Excavator: Mme. Henriot. Quality: 5
Numbers: ?
Grave-Goods: 10 scramasaxes, 7 spears, a dagger, 2 ‘sickles’ (?)
Comments: Not clear exactly where these were found. May or may not be part of Tarquimpol ‘L’Église’.
Plan: No. Distance from modern settlement: ?

No: 273.
Site: Tarquimpol (Moselle) ‘L’Église Paroissiale’.
Year: 1884 Excavator: ? Quality: 4
Publication: Wichmann 1892; Hoffmann 1893, p. 179; Schaudel 1894; Toussaint 1936d, pp. 10-11; Stein 1974, pp. 583-4; Clermont-Joly 1978, pp. 39-40; Guillaume et al. 1988, pp. 104-5.
Numbers: 40+.
Comments: Under the parish church and aligned with it. Much damaged. 9 sarcophagi, 29 S.L. graves and 3 less well-made S.L. graves. A horse’s skull was found quite near the scramasax. The less well-made S.L. graves may perhaps be the earliest on the site. 2 of them are at opposite corners of the church. One of these was intact and was a well-furnished female grave, containing the rings, the necklace, the comb, a belt-set and the rouelle.
Plan: Yes. Distance from modern settlement: In village.

No: 274a.
Site: Terville (Moselle) ‘Route de Verdun’.
Year: 1933 Excavator: ? Quality: 5
Numbers: ?
Grave-Goods: Buckle, spindle-whorl, glassware, bronze pin, francisca, 2 spearheads.
Comments: Axe, buckle, vase and 4 coins were in the grave. Reusch interpreted the decoration on a scutiform buckle-tongue as a man-rune.
Plan: No. Distance from modern settlement: In village.

No: 274b.
Site: Terville (Moselle) 'Route de Verdun'.
Year: 1958-60 Excavator: ? Quality: 5
Numbers: 4
Grave-Goods: Sword, bronze 'cauldron' fragments.
Comments: No other information.
Plan: No. Distance from modern settlement: In village.

No: 274c.
Site: Terville (Moselle), 'Rue Haute-de-Terville'.
Year: 1962 Excavator: ? Quality: 5
Publication: Cahiers Lorrains 1963, p.7; Simmer 1987, p.377 & planche XIV.
Numbers: 4
Comments: Probably S. T. graves.
Plan: No. Distance from modern settlement: In village.

No: 275.
Site: Tétin (Moselle).

Site: Tritteleng (Moselle) 'Sur le Chemin de Laudrefang'.
Year: 1938-9 Excavator: ? Quality: 5
Numbers: 5 or 6
Grave-Goods: 2 scramasaxes, 1 spearhead, 1 knife, 1 inlaid plaque-buckle and belt-set, 1 undecorated plaque-buckle and counter-plaque, pottery, purse-fastener.
Comments: Discovered during the construction of the Maginot line. Much of the material was lost during the war. WE orientation. 0.3-0.4m. -deep graves.
Plan: No. Distance from modern settlement: 200m.

No: 281.
Site: Tronville (Meurthe-et-Moselle) 'Près de l'Eglise'; 'Place Morée'.
Publication: Beuopré Rép., p. 137; Toussaint 1938a, p. 40; Hurstel 1964, II, p. 311.
Numbers: 'A large number' (Place Morée).
Grave-Goods: 'Medals objects and weapons' (Près de l'Eglise).
Comments: Graves at Place Morée were identified as Gallo-Roman. There was at least one sarcophagus grave at Place Morée.
Plan: No. Distance from modern settlement: In village.
No: 282.
Site: Uckange (Moselle).
Year: 1947
Excavator: ?
Numbers: ?
Comments: Found near a Gallo-Roman temple (Simmer). No other information.
Plan: No. Distance from modern settlement: ?

Utweiler (Saar-Pfalz-Kreis): The S. L. graves found here, containing no grave-goods are apparently Carolingian (Prof. F. Stein, verb. com. July 1989).

No: 283.
Site: Val-Ebersing (Moselle) 'Frankenberg'.
Year: ?
Excavator: ?
Numbers: ?
Grave-Goods: 
Comments: Small walls (S. L. graves? A villa?) and a 'grave of the migration period'.
Plan: No. Distance from modern settlement: ?

No: 284.
Site: Varize (Moselle) 'Heiligenbronn'.
Year: ?
Excavator: ?
Numbers: 1.
Grave-Goods: Knife, 2 beads, silver coin of Vespasian, 2 iron buckles, a pitcher and two other pots.
Comments: The grave was apparently that of an adolescent. Given the beads this was evidently an adolescent woman, and, according to the results of the analyses carried out above, in chapters 10 and 11, an assemblage such as this should be expected for a female of this age.
Plan: No. Distance from modern settlement: ?

No: 285.
Site: Varize (Moselle).
Year: ?
Excavator: ?
Numbers: ?
Grave-Goods: 
Comments: According to J. Schneider, before the 1914-18 war, by a curve in the road to Boulay, to the NE of Varize, a Frankish cemetery was discovered.
Plan: No. Distance from modern settlement: ?
No: 286.
Site: Varsberg (Moselle) 'Wingerlsberg'.
Year: 1880  Excavator: ?  Quality: 5
Numbers: ?
Comments: No other information.
Plan: No.  Distance from modern settlement: Under château.

No: 287.
Site: Varsberg (Moselle).
Year: 1888  Excavator: ?  Quality: 5
Numbers: ?
Grave-Goods: 3 scramasaxes, knife, 2 spearheads, hooks, beads and a francisca.
Comments: All acquired by the MM. May or may not = Varsberg 'Wingerlsberg'.
Plan: No.  Distance from modern settlement: ?

N.B.: The MM holds 1 inlaid plaque-buckle (C. J. 10), one other plaque-buckle (C. J. G3), a plaque (C. J. G6), a buckle tongue (C. J. 90) and 2 knives (C. J. G91-2) from Varsberg but it is unclear to which of the above discoveries these relate.

No: 288.
Site: Vergaville (Moselle).
Year: 1881  Excavator: ?  Quality: 5
Publication: T. S. A. L. 1861, p. 62; Toussaint 1938d, p. 11.
Numbers: 12.
Grave-Goods: Gold disc brooch with inlaid stones (ML. 106.07).
Comments: Apparently all the graves were face-down. Graves were 0.6m. deep, S.L. graves. Cemetery in an orchard east of the village.
Plan: No.  Distance from modern settlement: Near the village.

No: 289.
Site: Vic-sur-Seille.
Year: ?  Excavator: Garde Champêtre de Vic.  Quality: 5
Numbers: ?
Grave-Goods: A scramasax.
Comments: The scramasax was given by the Garde Champêtre to Abbé Harter, who gave it to the MS.
Plan: No.  Distance from modern settlement: ?

No: 290.
Site: Vir-sur-Seille (Moselle) 'Près de l'Église'.
-505-
No: 291.
Site: Vigny (Moselle).
Year: ?
Excavator: ?
Publication: WG map 6.
Numbers: ?
Grave-Goods: ?
Comments: Finds no mention except on Wolfram & Gley’s map. Possibly an error.
Plan: No. Distance from modern settlement: ?

No: 292.
Site: Ville-au-Val (Meurthe-et-Moselle) 'Chapelle de Villers le Prud'honnet'.
Year: ?
Excavator: ?
Numbers: ?
Comments: S.L. graves found under the nave and choir of the church. Hurstel says they are medieval, but with this form of construction they could well be Merovingian.
Plan: No. Distance from modern settlement: In village.

No: 293.
Site: Villers-lès-Moivre (Meurthe-et-Moselle) 'Place du Chemin de Gonhaie'.
Year: ?
Excavator: ?
Numbers: ?
Grave-Goods: Rusted weapons.
Comments: No other information.
Plan: No. Distance from modern settlement: 150m.

No: 294.
Site: Villers-lès-Moivre (Meurthe-et-Moselle) 'Près de l'Église'.
Year: ?
Excavator: ?
Numbers: ?
Grave-Goods: Gold ring.
Comments: S.L. graves behind the church. Skeletons much damaged, and the graves were evidently reused. One contained two skulls. Possibly not Merovingian.
Plan: No. Distance from modern settlement: In village.
Appendix 2.a.

No: 295.
Site: Vitré-sur-Orne (Moselle) 'Wallange'.
Year: 1910
Excavator: ?
Publication: I. O. L. G. A. 1910, pp. 528-9; WG, map 6; LT, p. 115; Toussaint 1938d, p. 25; Simmer 1987, p. 357.
Numbers: ?
Comments: S. L. graves, mostly without grave-goods. Linckenheld considered them to be late, and Simmer concurs. One grave contained a reused fragment of Gallo-Roman sculpture.
Plan: No.
Distance from modern settlement: ? (Nr. D. M. V. of Wallange)

No: 296.
Site: Vittonville (Moselle) 'Cimetière'.
Year: 1969
Excavator: M. Charles
Numbers: 1
Grave-Goods: None.
Comments: Sarcophagus with a lid. Possibly not Merovingian.
Plan: No.
Distance from modern settlement: In village.

No: 297.
Site: Volmérange-les-Mines (Moselle) Hundsloch.
Year: 1937
Excavator: M. Pié rant
Numbers: 1+.
Grave-Goods: Axe, shield-boss, carinated vase, 2 spearheads and a spur.
Comments: Burial apparently in a cave. Delort drew the objects before they disappeared, fortunately, and Simmer reproduces these. All the grave-goods apparently came from a single grave, although the inventory is manifestly incomplete (there are, for instance, no buckles or belt-fittings), and the actual number of burials on the site is unknown.
Plan: No.
Distance from modern settlement: Within 1 km.

No: 298.
Site: Volstroff (Moselle) 'Château de Vinsberg'.
Year: 1864
Excavator: ?
Numbers: ?
Grave-Goods: Scramasax, spearheads and belt-buckles.
Comments: Simmer considers some of the discoveries from the château to be 'probably medieval' (i.e. later medieval).
Plan: No.
Distance from modern settlement: In village.

No: 299.
Site: Walsheim (Saar-Pfalz-Kreis) 'San Dur'.

-507-
Civitas Mediomatricorum.

Year: 1936-7
Excavator: J. Keller.
Quality: 3
Publication: Germania 21, 1937, p.197; Schähle 1965; above, pp.293-4.
Numbers: 17.

Grave-Goods:
(Grave 1): 98-bead necklace.
(Grave 2): None.
(Grave 3): No information.
(Grave 4): None.
(Grave 5): Sword, shield-boss, spearhead, sword-sheath fittings, 3 knives, 72 inlaid iron buckles (?plaque-buckles), iron buckle, belt-fittings.
(Grave 6): No information.
(Grave 7): Iron buckle and knife.
(Grave 8): 44-bead necklace, disc-booch, spindlewhorl, plaque-buckle.
(Grave 9): Scramasax and sheath-fittings, spearhead, knife, plaque-buckle, iron buckle, belt-fittings.
(Grave 10): 38-bead necklace, 2 earrings, Bracelet, belt-fittings.
(Grave 12): Sword, Plaque-buckle and belt-fittings, knife and shears.
(Grave 13): None.
(Grave 14): Sword and scaramasax.
(Grave 15): No information.
(Grave 16): No information.
(Grave 17): (Multiple burial): Scramasax, 2 knives, plaque-buckle, 2 buckles, belt-fittings, 2 bronze disc brooches, 2 finger rings, 2 earrings, châtelaine, key, 185 beads, 77 beads.
(Found of which the context is no longer known): Plaque-buckle and counter-plaque, belt-fittings, disc-brooch, back-plate of a second disc-brooch, earring, spindlewhorl, iron hook, strike-a-light, knife (these all illustrated by Schähle); knife, fragment of a sword-hilt, iron buckle, belt-fittings, 99 beads, 42 beads (not illustrated).

Comments:
Graves were of WE orientation, usually SL graves. Graves were about 50cm deep and the dead lay on their backs. The graves 1-16 were excavated in 1936, grave 17 in 1937. Much information was lost during the war, but it seems that the multiple burial, grave 17, contained 3 burials. Burial I was probably of a woman, with a finger ring. Burial II was a man, to which the scaramasax belongs. Burial III was a second woman with beads and rings (though which rings remains unclear; contemporary notes say that rings lay at her chest, the beads at her waist).

Plan: No.
Distance from modern settlement: In village.

---

No: 300a.
Site: Waville-sur-Mad (Meurthe-et-Moselle) 'L'Annonerie'.
Year: ?
Excavator: ?
Quality: 5
Numbers: ?

Grave-Goods: None.
Comments: Bones, near an old monastery. Could well not be Merovingian. Could = Waville 'Sur la Citadelle', 'Sous Riche en Côte' and 'Le Vieux Cimetière.'

Plan: No.
Distance from modern settlement: Within 1 km.

---

No: 300b.
Site: Waville-sur-Mad (Meurthe-et-Moselle) 'Sur la Citadelle'.

---
Appendix 2. a.

No: 300c.

**Site:** Waville-sur-Mad (Meurthe-et-Moselle) 'Sous Riche-en-Côte'.

**Year:** ?

**Excavator:** ?

**Publication:** Hurstel 1984, II, p. 335.

**Numbers:** ?

**Grave-Goods:** None.

**Comments:** Bones. No other information. Site probably = Waville 'Le Vieux Cimetière' and 'Sur la Citadelle'.

**Plan:** No.  
Distance from modern settlement: Within 1 km.

No: 300d.

**Site:** Waville-sur-Mad (Meurthe-et-Moselle) 'Le Vieux Cimetière'.

**Year:** c. 1850

**Excavator:** ?

**Publication:** Hurstel 1984, II, p. 355.

**Numbers:** 4 or 5.

**Grave-Goods:** None.

**Comments:** Sarcophagi, 50-80cm. deep. Nearby were several small ditches, 50-60cm. in diameter x 1 m. deep and, 2 large ditches 4-5m², 1.8-2.0m. deep. Stones, flat bricks and large bones were found. Probably = Waville 'Sur la Citadelle and 'Sous Riche en Côte'.

**Plan:** No.  
Distance from modern settlement: Within 1 km.

No: 301.

**Site:** Wiesviller (Moselle).

**Year:** 1948

**Excavator:** J.-P. Obry.

**Publication:** Gallia 6, 1948, p. 238; Lutz 1956, pp. 18-19.

**Numbers:** ?

**Grave-Goods:** Scramasax, silver earring, red-ware ceramics.

**Comments:** On the site of a Gallo-Roman villa.

**Plan:** No.  
Distance from modern settlement: ?

No: 302a.

**Site:** Wittersheim (Saar-Pfalz-Kreis) 'Heidenkopf', 'Am Lett'.

**Year:** ?

**Excavator:** ?

**Publication:** M. H. V. P. 12, 1888, p. 57; F. M. R. D., p. 260 ff.

**Numbers:** ?

**Grave-Goods:** Speyer Museum has a spearhead possibly from Wittersheim.

**Comments:** Two Reihengräberfelder, possibly different cemeteries from 'vor dem langen Zaun'. No other information.

**Plan:** No.  
Distance from modern settlement: ?
No: 307h.
Site: Wittersheim (Saar-Pfalz-Kreis) 'Vor den langen Zäun'.
Year: 1929-30 Excavator: C. Klein Quality: 2

Numbers: 6.

Grave-Goods: (Grave 1) Shield-boss, spearhead, knife, scramasax, belt-fittings.
(Grave 2) Scramasax, spearhead, 2 knives, plaque-buckle, belt-fittings, glassware fragments and a carinated vase.
(Grave 3) Scramasax, knife, plaque-buckle and belt-fittings, scabbard-fittings.
(Grave 4) Disc brooch, bead waist-band and necklace, 4 rings (one with decoration).
(Grave 5) Scramasax, knife, strap-end, belt-buckle and a 'sword-loop or hook' (Schwertläufe).

Comments: Grave 6 was unfurnished. WNW-ENE orientation. Graves 2, 3 and 5 were S. L. graves, the others were S. T. graves.
A equal-armed, cross-shaped brooch was found near grave 5, very similar to that found at Lorentzen. The excavation of the cemetery of Wittersheim, undertaken in rescue conditions, serves as a depressing lesson of just how much information has been lost in the French areas of the civitas, where many important sites (above all Koenigsmacker and Imling-Houyarch) were being destroyed at this time, without any adequate records being made, despite the presence of so-called archaeologists.

Plan: Yes. Distance from modern settlement: In village.

No: 302c.
Site: Wittersheim (Saar-Pfalz-Kreis) 'Vor den langen Zäun'.
Year: 1912 Excavator: ? Quality: 5
Publication: Records of S.K.S.

Numbers: ?

Grave-Goods: Brooch.

Comments: Found 200m. north of the 1929-39 discoveries. All these records probably = one large cemetery.

Plan: No. Distance from modern settlement: 200m.

No: 303.
Site: Woippy (Moselle).
Year: 1909 Excavator: M. Becker Quality: 5

Numbers: ?

Grave-Goods: Gold Merovingian triens, bearing legend NANCIACUM, usually thought to be Nancy, but this is disputed by Stahl (1982).

Comments: Acquired by M. M. May or may not = a cemetery.

Plan: No. Distance from modern settlement: ?

No: 304.
Site: Wolfskirchen (Bas-Rhin) 'Anciennne Église de Diedendorf'.
Year: 1884 Excavator: Schlosser Quality: 3
Publication: Schlosser 1886; B. S. C. M. H. A. 2nd ser., 17, 1886, 510-
Numbers: 2+.
Grave-Goods: None.
Comments: 2 S.L. graves in the corner of a square stone building of bizarre plan, allegedly the old church of Diedendorf. One grave reused a Roman inscription and contained 3 skeletons. Like the building, the graves were oriented W-E. Many bones were found scattered around the area. Schlosser is quite certain that the burials are Merovingian.
Plan: Yes. Distance from modern settlement: 1 km.

No: 305.
Site: Wuisse (Moselle) 'Bride'.
Year: 1876 Excavator? Quality: 5
Numbers: ?
Comments: S.L. graves. May be a Gallo-Roman cemetery. Ashes were found too, perhaps indicating cremation. The site is associated with a deserted village.
Plan: No. Distance from modern settlement: 1.5 km.
Appendix 2.b. Early Medieval settlement sites in the civitas of Metz.

This appendix contains all the evidence which I have been able to locate concerning post-Roman rural settlement in the civitas of Metz. Much of the data is post-Merovingian, but is included because of a) the vagueness of the dating of most of these sites and b) the possibility that these sites may overlie Merovingian habitations. It should also be noted that, with the exception of the stone fragments from Cheminot, the brooch and coin from Erfweiler, none of these sites has been fully published. The numbers refer to diagram app. 2.b.1.

No.: 1.
Site: Corny-sur-Moselle (Moselle) 'Rue de la Fontaine'.
Discussion: Under the modern village and on top of the 4th-century levels of a Roman settlement, Ottonian 'cabanes' and one store-lined SFB. The dating evidence is unclear and the site is not yet published properly.

No.: 2.
Site: Cheminot (Meurthe-et-Moselle) 'L'Eglise St. Maurice'.
Discussion: Late Merovingian carved stone architectural fragments were discovered on the site of the modern church. This in turn stands on the site of some Gallo-Roman occupation, as attested by a coin of Probos.

No.: 3.
Site: Clémery (Meurthe-et-Moselle) 'Terres Noires'.
Publication: Cuvelier 1988a; Cuvelier 1988c; Cuvelier, Delestre and Heber-Suffrin 1988 [unpublished]; Guillaume et al. 1988, fig. 43.
Discussion: Merovingian settlement located by survey next to an important Roman villa and a small Merovingian cemetery. Close to a modern commune boundary. Not yet properly published.

No.: 4.
Site: Clémery (Meurthe-et-Moselle) 'Bénicourt'.
Publication: Cuvelier 1988a, p. 68, p. 72; Cuvelier 1988c, p. 68; Cuvelier, Delestre and Heber-Suffrin 1988 [unpublished].
Discussion: Early Medieval settlement located by survey, 200m. away from a lesser Roman settlement and a Merovingian cemetery.

No.: 5.
Site: Clémery (Meurthe-et-Moselle) 'Quatorze Jours'.
Publication: Cuvelier 1988a p. 68, p. 72; Cuvelier 1988c, p. 68; Cuvelier, Delestre and Heber-Suffrin 1988 [unpublished].
Discussion: Early Medieval settlement located by survey, 200m. away from a lesser Roman settlement. 400m. from a modern commune boundary but, since this is the river Seille, this is probably not too significant.

No.: 6.
Site: Dieulouard (Meurthe-et-Moselle) 'Scarponne'.

-512-
Discussion: To the east of the Roman castrum was found an ESE. The upper occupation level of this was dated to the Carolingian or possibly Merovingian period by sherds of coarse black ware of the Kugeltopf type, and a large bronze key. The lower occupation level belonged to the later 4th and possibly 5th centuries, being dated by numerous coins of Constantius II, Valentinian, Valens, Gratian and Arcadius.

No.: 7.
Site: Erfweiler (Sar-Pfalz-Kreis).
Discussion: On the site of a villa otherwise apparently abandoned in the 4th century, a bracteate brooch and a gold triens struck at Mainz were found as stray finds, probably indicating some form of settlement, though the possibility of a cemetery on the site is not altogether to be excluded.

No.: 8.
Site: Eply (Meurthe-et-Moselle).
Publication: Cuveller 1988a, p. 72; Cuveller 1988c, fig. 25.
Discussion: Early Medieval settlement close to small Roman establishment and not far (500m) from modern village and Merovingian cemetery, located by survey. Evidence not yet published.

No.: 9.
Site: Eply-Raucourt (Meurthe-et-Moselle) 'Le Haut de Villers'.
Discussion: The only certainly Merovingian settlement in the region to have been excavated and published in any detail, the site contained a central, post-built house with three ancillary sunken-featured buildings, one of which contained a hearth. Close to a modern commune boundary.

No.: 10.
Site: Florange (Moselle).
Discussion: Two rubbish pits dated to the Merovingian period were excavated, which contained pottery fragments and numerous animal bones. The latter suggested that tanning was carried out on the site. More extensive remains may since have been discovered, as communication on the settlement is advertised in the programme for the 1990 congress of the A.F.A.M.

No.: 11.
Site: Labry (Meurthe-et-Moselle)
Discussion: On the edge of the modern settlement, near the church, a defended site, with a ditch preserved on its northern and eastern sides, was sampled in rescue excavations directed by Satine Baeye in 1988. The only dating evidence was pottery of Kugeltopf type, which permits only very wide date brackets of the 9th to 15th centuries.
No.: 12.
Site: Lesménils (Meurthe-et-Moselle).
Discussion: Early medieval settlement site located by aerial survey. Evidence not yet published.

No.: 13.
Site: Mousson (Meurthe-et-Moselle).
Discussion: Excavations on the site of this central medieval hill-top castle and village revealed seventh-century burials (see app. 2.a) and an accompanying Merovingian church.

No.: 14.
Site: Nomeny (Meurthe-et-Moselle) 'A'.
Discussion: Field survey revealed a later Merovingian (7th/8th-century) settlement just to the east of the Roman vicus. Close to a modern commune boundary. No more evidence is as yet available.

No.: 15.
Site: Nomeny (Meurthe-et-Moselle) 'E'.
Discussion: Field survey revealed a larger nucleated settlement of the 8th/9th centuries onwards, which succeeded the earlier settlement at Nomeny 'A'. No further information is as yet available.

No.: 16.
Site: Pont-à-Mousson (Meurthe-et-Moselle) 'Côte de Mo'm'.
Discussion: Excavations in the early 1980s recovered a church of early medieval date (any time between the seventh century, when nearly burials begin, and the ninth, when the church finds its first written mention). Another zone of the excavation revealed an early medieval settlement, consisting of wooden cabins, 10-12m. x 4-6m. In certain places, either inside or outside the huts, there were traces of cooking and metal-work. A rubbish pit was also found. The site's date remains obscure and, despite its importance, the site complex remains unpublished.

No.: 17.
Site: Port-sur-Seille (Meurthe-et-Moselle).
Publication: Cuvelier 1988a, p. 68, p. 72; Cuvelier 1988c, p. 57 & fig. 25.
Discussion: An early medieval settlement located by survey. Close to Roman settlements and to a modern commune boundary. No further details yet available.

No.: 18.
Site: Rouvres (Meurthe-et-Moselle).
Publication: Cuvelier 1988a, p. 68, p. 72; Cuvelier 1988c, p. 57 & -514-
Discussion: Early medieval settlement located by survey, close to a small Gallo-Roman settlement, and to a modern commune boundary. Evidence not yet published.

No.: 19.
Site: Saarbrücken (Kr. Saarbrücken) 'Marktplatz St. Arnual'.
Publication: Germania 1927, p. 290.
Discussion: In 1927 two fragments of wells made from oak trunks were found under the modern market-place. These contained pottery of the late Merovingian period. It is unfortunate that these remains were discovered before the development of C14 and dendrochronological dating systems.

No.: 20.
Site: Saint-Avold.
Publication: Cuvelier, Delestre and Heben-Suffrin 1988.
Discussion: Excavation by R. Hoffmann uncovered the plan of a late Merovingian stone church, but apart from this brief notice the site remains unpublished.

No.: 21.
Site: Sainte-Ruffine (Moselle) 'Grande Rue', 'Rue du Temple Romain'.
Discussion: Under the modern village, and above a Roman settlement including a villa and a fanum, a settlement of the 'Haut Moyen-Âge' (which could mean anything between the 9th and 12th centuries) was located. The dating evidence is unclear and the site is not yet published.

No.: 22.
Site: Salommes (Moselle).
Discussion: Hurstel reports that early medieval pottery was found near the village church during rescue excavations led by J.-P. Bertaux in 1975. However this report is sufficiently similar to that for Vic-sur-Seille (q.v.; see also ch. 5, section 4.c) for suspicion to be cast on the authenticity of Hurstel's report.

No.: 23.
Site: Thionville.
Publication: None (N. Dautremont verb. comm., 17.7.89).
Discussion: A Carolingian settlement has recently been discovered in excavations in the town.

No.: 24.
Site: Vic-sur-Seille (Moselle).
Discussion: In 1975, says Hurstel, 8th-century pottery was found in rescue excavations by J.-P. Bertaux, near the village church. Whether this represents a cemetery or a settlement is unclear. The note is also uncannily similar to that for Salommes (q.v.; see ch. 5, section 4.c for doubts about this evidence).
Civitas Mediomatricorum.

No.: 25.
Site: Woippy (Moselle)
Publication: None (N. Dautremont verb. comm., 17.7.89)
Discussion: A Carolingian settlement has recently been located under the modern village.

No.: 26.
Site: Yutz (Moselle)
Publication: None (N. Dautremont verb. comm., 17.7.89).
Discussion: A Carolingian settlement, so far comprising only post-built structures, has recently been found next to the site of a Roman villa, under the site of the medieval village of Yutz. Further details will apparently be published at the 1990 congress of the A.F.A.M.
Appendix 2.c. Catalogue of Sites in Metz.

This appendix contains information on all the urban excavations in Metz since 1942, about which I have been able to find information. Also included are all the coin finds listed by Toussaint (1948) which recovered coins of the reign of Diocletian or later. As was stated in ch. 6, section 5, caution should be borne in mind regarding extra-mural late-Roman coin-finds made in the last century, some of which may represent cemeteries, and possibly Merovingian cemeteries at that, rather than late Roman settlement. Consequently coin-finds which were recognized as coming from cemeteries even at the time of their discovery, at the Rue des Allemands and in the 'Sablon', have been omitted. Numbers refer to fig. 2.c.1, which is the key-plan for all the archaeological maps of Metz accompanying chapters 6, 7 and 8.

No.: 1
Site: Rue du Pontifroy.
Publication: Toussaint 1948, p. 91.
Discussion: Coins up to Constantine I were discovered.

No.: 2
Site: Pontifroy 'S.1'.
Publication: Schlernaire 1974.
Discussion: No 4th century evidence was located at all.

No.: 3
Site: Pontifroy 'S.2' & 'S.3'.
Publication: Schlernaire 1976.
Discussion: Excavations at 'S.2' revealed buildings abandoned at the end of the 3rd century. The excavation of 'S.3' unearthed summary reoccupation after the late 3rd-century abandonment.

No.: 4-11
Site: Pontifroy 'S.4' to 'S.11'.
Publication: Schlernaire 1978.
Discussion: Trenches 'S.5', 'S.6', 'S.10' and 'S.11' revealed 1st-century occupation whilst 'S.8' showed 3rd-century habitation. In 'S.7' and 'S.8' 3rd- or 4th-century occupation was attested, and in 'S.4' 4th-century settlement was attested by a building containing coins up to Constantine II (340). The excavators concluded that the last, summary, phases of occupation lasted until the troubles of the mid-fourth century.

No.: 12
Site: Pontifroy 'Choir of church of St Livier'
Discussion: Excavations by Lefebvre revealed occupation from the 2nd half of the 2nd century to the 5th century. The 1984 report modifies this to occupation from the 2nd to the 4th century.

No.: 13
Site: Pontifroy 'Hôtel de Police / Moulin des Thermes'.
Discussion: At this point occupation up to the 4th century was attested, showing that some extra-mural areas were reoccupied after the abandonment and destruction of the later 3rd century. During the 4th century, however, the area returned to agriculture or even went wild. The zone was even used for burial (one grave covered by tile was found). There was no Merovingian evidence at all, but 10th-11th-century residual pottery was found in the north of the site, and a 11th-12th-century wall in the south.

No.: 14.
Site: Pontifroy 'Salle de Conseil'.
Discussion: After being occupied by a 1st-2nd-century stone building, this zone was abandoned at the end of the 3rd century. The subsequent levels were severely cut about but one coin of Crispus was found in a robber trench. There was, importantly, no evidence of any roads, forcing the idea that the extra-mural areas were governed by a strict road network to be abandoned. After the Roman period, the next certain occupation comprised 12th-14th-century structures including a kiln.

No.: 15.
Site: Pontifroy 'Jardin de Mail'.
Discussion: Excavations by M. Georges revealed more late medieval kilns, dated to the 13th or 14th centuries.

Site: Rue St. Medard.
Publication: Toussaint 1948, pp. 82-83.
Discussion: Coins up to Constantine I were found.

No.: 19.
Site: Rue des Bénédictins.
Publication: Toussaint 1940, p. 90.
Discussion: Coins of Constantine I, Gratian and Theodosius were found alongside objects of 'Frankish date' in 1868. Possibly a Frankish cemetery.

No.: 20.
Site: Rue des Bénédictins.
Discussion: Occupation of the 2nd-3rd centuries was unearthed.
Appendix 2.c.

No.: 21.
Site: Rue Belle-Isle.
Publication: Toussaint 1948, p. 85.
Discussion: Coins up to Constantine I were discovered.

No.: 22.
Site: Rue Merchant.
Publication: Toussaint 1948, p. 86.
Discussion: Coins of Constantine I, Constantius II and Gratian were found.

No.: 23.
Site: Rue Marchant.
Discussion: No evidence of occupation in the later empire was discovered. However, 2 sunken-featured buildings were located, which yielded vaguely-dated Carolingian pottery.

No.: 24.
Site: Rue St. Ferroy.
Publication: Toussaint 1948, p. 78.
Discussion: Rubble with traces of fire, and a coin of Tetricus, was found.

No.: 25.
Site: Église Ste. Ségolène.
Publication: Toussaint 1948, p. 81.
Discussion: Coins up to Constantine I were found.

No.: 26.
Site: Rue des Trinitaires.
Publication: M.A.M. 1875-6, pp. 375-86; Toussaint 1948, pp. 94-5.
Discussion: Early Roman evidence was covered with a black earth layer including Roman fragments.

No.: 27.
Site: Chantier de la Visitation.
Publication: Gallia 16, 1956, p. 323-9; Hatt 1959; Gallia 18, 1960, p. 213 ff.
Discussion: Excavations in 1956-7 by A. Bellard and then J.-J. Hatt found evidence of Hallstatt occupation and Roman occupation from the 1st to the 4th centuries. The important 4th-century buildings were covered by a 9cm.-deep burnt level, in turn sealed by a thick (24+cm. deep) destruction level containing Argonne ware. At Point D a building post-dated this destruction. The building encroached upon the Roman road and was dated to the end of the 4th century. Hatt claimed this was the latest evidence of Roman Metz.

No.: 28.
Site: Thermes du Carmel.
Publication: Hatt 1959.
Discussion: Excavations revealed early Roman evidence ending with a destruction level in c.250 A.D. Above this there was later Roman
occupation, dated by a coin of Crispus to the early 4th century. This in turn was covered by another destruction level.

No.: 29.
Site: Grenier de Chèvremond.
Discussion: Roman levels were, again, sealed by a 10cm-deep level of rubble from a fire of the mid-fourth century, dated by Hatt to 350. Above this, however, were rough stone foundations and course pottery which Hatt claimed was Merovingian. He argued that this was the palace of the kings of Austrasia, but the idea has found little support in either historical or archaeological circles.

No.: 30.
Site: Rue du Haut-Poirier.
Discussion: Excavations unearthed Roman walls. No dating evidence was given.

No.: 31.
Site: Rue des Recollets.
Publication: Toussaint 1948, p. 85.
Discussion: Coins of Constantine I, Constantius (II?), Valentinian I, Valens and Gratian were found.

No.: 32.
Site: Rue de la Basse-Seille and Jardin Botanique.
Publication: Toussaint 1948, p. 86.
Discussion: Coins of Constantine I and Helen were found. N.b A Merovingian cemetery existed on this site.

No.: 33.
Site: Cathédrale St. Etienne.
Publication: Toussaint 1948, 55.
Discussion: Under the foundations of the tower were found coins of Trajan, Antoninus, Claudius II, Constantine I, Constans I and Valens, as well as a small lead medallion of Justin I or Justinian.

No.: 34.
Site: Rue du Chanoine-Collin.
Discussion: Rescue excavation in March-May 1973, by Biehler, Jolim, Schlemaitre and Wagner uncovered a series of early Roman walls. The latest evidence, more or less uniformly across the site, was mid-4th-century. In the sector of walls I, III and V, the latest occupation was covered by a thick ashy layer containing Argonne ware and twenty-five coins dating to 300-350, including one of Constantius II. The 1973 ground-level covered a mass of tiles, bricks and reddened clay.

No.: 35.
Site: Rue Four-du Cloître
Publication: Gallia 22, pp. 349-50.
Discussion: Stratification only as far as the 3rd century, the last phases using much reused material.
Appendix 2.c.

No.: 36.
Site: Hauts-de-Sainte-Croix.
Discussion: Excavations uncovered La Tène and 1st- to 3rd-century Roman occupation.

No.: 37.
Site: Hauts-de-Sainte-Croix.
Discussion: Excavations by Ph. Brunella uncovered 1st-century occupation, followed by a hiatus before reoccupation in the 3rd century. The early/mid-4th-century fire revealed by excavations in the '60s was confirmed. A 9th-century Carolingian square building was found, with masonry walls, and dated by pottery. This was possibly a cellar. After this there was a 13th-century pit and a 15th-century latrine. Other pits were destroyed without being examined.

Site: Rue des Clercs.
Publication: Toussaint 1948, p. 56.
Discussion: Coins were found dating from Domitian to Valentinian II.

No.: 53.
Site: Rue des Clercs.
Discussion: 2 Gallo-Roman altars were discovered. Above these a debris layer contained 4th-century objects and, above all, 16th- and 17th-century vases.

No.: 54.
Site: 19 Rue des Clercs.
Publication: Jolin 1977.
Discussion: Jolin was able to plan some still standing Roman walls, and combine these with earlier discoveries in the region to propose the plan of a large Roman building, parallel with the probable axis of the decumanus. He suggested this was the Romana sala, 'Rome-Salle', known since the tenth century (ch. 8, section 2).

No.: 55.
Site: Rue des Clercs.
Publication: Wagner 1967; Verdel unpublished.
Discussion: Sondages in the Rue des Clercs showed that, after the 4th century the area was abandoned or at best given over to horticulture.

No.: 56.
Site: 61 Rue Serpinoise.
Publication: Bellard 1964.
Discussion: The decumanus maximus was repaired here in the 10th and 16th centuries, according to coin finds.

No.: 57.
Site: L'Espace Serpinoise.
Discussion: Excavations by E. Verdel examined a very important site. The area was occupied between the 1st and the 4th centuries. The precise details of the site's history thereafter are a little blurred. A very thick organic layer covered the occupation level associated with fourth-century Argonne ware (Verdel 1986, p. 357). The summary in Archéologie Médiévale states that a 6th- or 7th-century cup was found. This is not mentioned in Verdel's more detailed unpublished account of the site, although he mentions fragments of carinated fifth- or sixth-century pottery being found on the site.

Into this layer were cut two post-Roman features. The dating of these is somewhat confused, with the notice in Archéologie Médiévale placing one in the eighth or ninth century and the only publication dating them as ninth-century (Verdel 1986). The unpublished, more detailed, report describes these features as ninth-century, one with fourteenth-century recutting. The features were refuse or latrine pits cut into an unoccupied zone. A thick, possibly ninth-century
Civitas Mediomatricorum.

A wall was found, probably the boundary wall of an urban property (Verdel 1986, p. 356). The zone was, however, unused except for gardens before the late middle ages.

Wagner's footnote to his article in *La Lorraine Mérovingienne* describes one of these pits as seventh- or eighth-century. This note, drawing information from a communication of M. Colardelle, is a strange piece, and is worthy of note for the insights it gives into some drawbacks with urban archaeology in Metz. Whilst dating the pits to the late Merovingian or Carolingian periods, it states that they yielded late Roman pottery, 'jusqu'à présent daté des IVe-Ve siècles plutôt que des VIe-VIIIe siècles.' Even the note in *Archéologie Médiévale* (1985), suggests that the Argonne pottery found here should perhaps be re-dated to a later period. But is this really necessary? Surely these sherds are more likely simply to be late Roman. The Espace Serpenoise was occupied by buildings until the late 4th century, if not slightly later. These pieces of Argonne ware must be residual. The excavation showed that these early medieval pits were refuse- or latrine-pits cut into an area which was abandoned or at best used for gardens between the 4th century and the late middle ages, a conclusion supported by sondages in the Rue des Clercs (no. 55).

Until a satisfactory publication of this interesting site appears, the scattered snippets of information remain confusing and contradictory in detail.

**No.:** FG

**Site:** Chanter du Parking Souterrain de l'Esplanade et rue Poncelet.

**Publication:** Collot 1964; *Gallia* 24, 1966, pp. 290-3.

**Discussion:** A series of small trenches sampling quite a wide area, showed that the area was settled from the 1st century. Much of the site was destroyed or abandoned between the end of the 3rd and the beginning of the 4th century. In the northern area a destruction level containing Argonne ware decorated 'à la molette' covered the latter of two hypocausts found. Above this was a thick debris level, containing residual items from all periods up to the 19th century. At point 'F' a flagstone-paved courtyard was found, the flagstone layer including Argonne ware and a 4th-century goblet. Collot believed that this phase only just predated the site's destruction.

In the southern area, again, ceramic evidence suggested a sequence of occupation up to the 4th century. Thereafter the next datable evidence belonged to the late middle ages (the 15th and 16th centuries).

**Site:** Rue de l'Évêché (Rue Dupont des Loges).

**Publication:** *Gallia* 25, 1967, pp. 289-3.
Appendix 2.c.

Publication: Toussaint 1948, pp. 90-91.
Discussion: 2 coins of Constantine I and one of Gratian were found.

No.: 65.
Site: Rue Dupont-des-Loges.
Discussion: Excavations by C. Lefebvre revealed two levels of occupation, one of the 1st century, the other of the 3rd. Burnand & Collot claim that a partial stratigraphy 'du Ier au VIe siècle' was found. This is surely a misprint for 'du Ier au IVe siècle'. The Gallia reference which they quote is quite spurious in any case.

Site: Rue Lasalle.
Publication: Gallia 40, 1982, p. 325.
Discussion: Excavation revealed Roman walls and 3rd-4th-century evidence, but no information on the city walls, known in the nearby Church of St. Martin, or on the environment of the Rue Maurice-Barrès mosaic, as had been hoped.

No.: 69.
Site: Place Coislin.
Discussion: An early Roman mosaic was found.

No.: 70.
Site: Place de la République.
Publication: Clermont-Joly 1970.
Discussion: A fragment of a grey-ware vase (C-J no. 972) was found, probably indicating settlement.

No.: 71.
Site: Chantier de l'Ecole des Arts Appliqués.
Discussion: Excavations suggested that here occupation may have continued beyond the mid-4th century. A late Merovingian vase (C-J no. 973) and a Carolingian black pot were found in very disturbed layers. Nothing was found, however, to bridge the gap between the mid-4th and 7th centuries.

No.: 72.
Site: St. Pierre-aux-Nonnains.
Publication: Reusch 1941-2; Reusch 1943.
Civitas Mediomatricorum.

Discussion: Excavations carried out by W. Reusch, with the help of the occupying Wehrmacht, in 1942, uncovered early Roman occupation underneath the later Basilica. The construction of the latter was placed by Reusch 'without doubt' in the 4th century. Reusch also uncovered Merovingian modifications to the basilica, chiefly comprising the conversion of the building from one of apsidal plan to one of simple rectangular plan.

No.: 73.
Site: St. Pierre-aux-Nonnains.
Discussion: Excavations near the basilica revealed the latter to have been built on top of the remains of a mid-3rd-century fire. The excavations uncovered a bath complex, sharing the same orientation as, and connected to, the basilica. The connecting corridor was stratigraphically later than the latter and was dated by a coin of Valentinian I (364-75) in the foundation trench. This is probably the latest known, securely-dated piece of Roman building in Metz. This level was covered by a 'Merovingian' layer containing animal bones, 7th-century pottery, an iron knife and remains of Roman marble and frescos. Whether this is representative of some form of settlement or the cemetery associated with St. Pierre-aux-Nonnains is unclear.

No.: 74.
Site: St. Pierre-aux-Nonnains.
Publication: Delestre 1988a; 1988b.
Discussion: Excavations in the 1980s confirmed the general outlines of the basilica's history, suggested by earlier campaigns. A pottery workshop of the early empire was eventually succeeded by the apsidal basilica, which Delestre suggests was part of a thermal complex. Whilst this is reasonably plausible, his proposed date of c. 400 for the building cannot go unchallenged (ch. 6, section 4) and the early/mid-4th-century date must remain most likely. Delestre recognizes two Merovingian renovations of the building, one in the 7th century, involving the abandonment of the apse, and one in the 8th century, involving the creation of the chancel, the fragments of which were found early this century.

No.: 75.
Site: L'Arsenal Ney.
Discussion: Early Roman occupation was attested and habitation continued until the site was partially destroyed in the late 3rd century. After this the site was used for metal-working. The site was covered by a complex series of fine strata, often ashy spreads. Some post-holes and ditches were cut into this, most apparently being rubbish pits, containing horse and cow skeletons, tiles, building blocks, mortar, vases and pitchers of the 13th to 15th centuries, glassware and environmental evidence. However, these later features were not really datable since most post-Roman evidence had been destroyed during the levelling of the site for the construction of the citadel.
Appendix 2.c.

Site: 'Rome Salle.'
Discussion: A coin of Magnentius (349-53) was found.

No.: 82.
Site: Amphithéâtre.
Discussion: The amphitheatre was excavated in the early years of the century. Apart from early Roman evidence, the site showed traces of early fourth-century renovation, after late third-century abandonment, in the central pit. This is probably to be associated with the construction of Metz's oldest church St. Pierre-aux-Arènes, though this is far from certain. Argonne ware allowed occupation in or around this site to be pushed into the later fourth century at least.
Appendix 2.d. Methodology used in the Analysis of Cemetery Sites.

1. Determining Sex from Grave-Assemblages.

In the analysis of the cemetery sites of the region of Metz, it was thought best to begin by examining what the data tells us through its own patterns of association. This approach was motivated by a desire to examine whether or not there were distinct groups of masculine and feminine artefacts, as in Anglo-Saxon England, and to question the popular notion that weapons are always an indicator of a male grave whilst items of jewellery are always a mark of a female burial.

With the first site studied, Ennery, every occurring type of grave-good was included in the analysis. In all later analyses this was modified so that only types of object found in two or more intact graves containing two or more types of grave-good (which in turn had to be found in two or more such graves) were included. The types of grave-good thus included have been called 'object-types' or 'artefact-types' in the text, whilst the term 'grave-goods' has been used to refer, more generally, to any and all objects placed with the dead. Thus a grave containing three spears contained three grave-goods but only one object-type. In later analyses, too, the object-types were given a numerical code (diagram app. 2.d.1) which, it was hoped, would reduce preconceptions about the expected strength of the gender-related messages of, for example, weapons such as scramasaxes.
The method next involved drawing a diagram wherein the object-types were plotted in identical order on X- and Y-axes. Weaponry was placed at one end of the axes, in this case nearest the origin, and jewellery at the other, according to the preconceived notions about their gender-specific message, noted above. Other items were placed in between them. In some cases their position was governed by results of analogous work on Anglo-Saxon cemeteries (e.g. Shephard 1979). When this was done the number of times object-type A was associated with object-type B was plotted at the intersection of the two types. Since, obviously, A was associated with B as many times as B was associated with A, and since the types were plotted in identical order on both axes, the resultant diagram had reflective symmetry about the line X=Y (c.p. diag. 10.4; 11.4 etc.).

After the first test, which at Ennery showed no very clear patterns, the order of the objects was adjusted to bring groups of associated items together. As Ennery, after seven tests, the results shown in diagram 10.4 were produced, revealing three groups of object-types, two of which are never associated with each other. In later tests the final order of object-types revealed at Ennery was used as a starting point, so that fewer adjustments were necessary.

The Ennery results were later modified to bring them into line with subsequent analyses. Firstly, in later tests, it was found sufficient simply to reduce the test to an 'is associated with/is never associated with' division. It was held that if an object-type was found in two or more intact graves furnished with two or more
object-types, then its 'message' was sufficiently strong across the
cemetery-using community (or the sample thereof revealed by
excavation) for any association to be significant. This was felt to
be particularly true in cases such as those discussed here, where the
overall samples were so small, and where two intact graves containing
two or more object types constituted over 1% of all intact graves in
the largest sample (the 198 later sixth-century graves at Lavoye),
well over 1% of furnished graves in that sample, and higher
percentages still on the other sites (around 4% of all intact graves
at Ennery, sixth-century Dieue-sur-Meuse and Audun-le-Tiche). With
larger sites, it should be recommended that the criteria for inclusion
as an object-type be that it is found in 1% of the total sample of
intact graves (and never less than two burials), counting only intact
graves with two or more object-types. Thus, in a sample of 500, an
object-type would only be counted as such if found in five or more
intact graves containing two or more object-types. A problem would
arise, theoretically, if a type of grave-good was repeatedly found on
its own in burials, but this never occurred in practice during the
analyses carried out here.

The Ennery results were modified, therefore, by excluding types of
grave-good which were not found in the requisite two intact graves
containing two object-types. Tiles, sherds and animal bones were
also withdrawn from the tests, as it was not certain that these were
not residual from the nearby Gallo-Roman settlement. The result of
these modifications now makes diagram 10.4 appear unrefined, but it
was felt reasonable to leave it in this state, firstly because the
Appendix 2.d.

groups of associated object-types were sound, and secondly as an illustration of the development of the tests through the time spent on this project.

In later analyses, an even more problematic area in which the Ennery test was not modified was in the fact that the weapons were kept grouped together at one end of the axes. This was not done in later tests, for the very good reason that some kinds of weapon seemed to have stronger gender-specific messages than others (as at Lavoye), and some object-types seemed to be at least as strongly male-specific as, and occasionally more so than, certain weapon-types. However, the Ennery system did make it easier to produce diagram 10.6, since all the AB.1 graves were grouped together.

After the object-types were arranged into the series shown in diagram 10.4, it was felt that one ought to be able, if the two unrelated groups did refer to gender-differences, to predict the sex of the deceased. Consequently a new diagram was produced (diagram 10.5), in which the sorted order of object-types was placed on the Y-axis and the number of the intact grave on the X-axis (in the computer-produced final form, this has been reversed). Then the object-types in grave X were plotted in the order indicated by the Y-axis. If a grave assemblage fell towards the end of the Y-axis nearest the origin then the subject of that grave should have been male, if it fell towards the other end of the Y-axis then it ought to have been female.
Comparing the Ennery results with the physical anthropological study made by Marcel Heuzé revealed that the predictions were correct, where they could be checked, in 82% of cases (diag 10.5). In later analyses, an even higher percentage accuracy was recorded. It was also confirmed that weaponry was indeed male and jewellery female. Later analyses, however, did show that some brooch-forms could have a masculine context (cp. Lavoye), and that some forms of jewellery were only very weakly feminine, such as necklaces, which were quite often a child attribute. On the other hand it was shown that some forms of weaponry could be the weakest of the male attributes (eg. the scramasax and the spear at sixth-century Lavoye), whereas other items, not commonly thought of as masculine, could be the most strongly male grave-goods. Consequently, while a weapon or an item of jewellery might single out an individual as male or female, the strength of the gender-related message of that person's grave could often be determined by quite other object-types.

2. Determining Age from Grave-Assemblages.

In the analyses of the cemeteries of the wider region of Merz (chapter 11) an attempt was made to test the results of the Ennery analyses by attempting to predict the age of the deceased from his or her grave-assemblage. This has been discussed in detail in chapter 11 and only a few words need to be said here.

The means of estimation were generally simple but followed no hard and fast rule. In general however, AB.1 graves were predicted to be males of between twenty and sixty years of age, and AB.2 burials to be...
males above twenty years of age. With AB.1 graves containing unusually low numbers of object-types, a similar prediction of 'general adult' was made. Occasionally, some more precise prediction was made, where the assemblage allowed. For example, graves lavishly provided with male goods but few or no weapons were sometimes predicted as being of men between forty and sixty years of age, and graves with weapons but only a smaller number of other grave-goods were occasionally predicted as being of males between twenty and forty years old.

E, B, Bx and X graves were predicted as being of either old people or children. BC graves were predicted as being of women between their early teens and forty years old.

The systems of marking these age-predictions are shown in diagram 11.15. For ease of reference a numerical coding system for age-groups or predicted alternative age-groups was created. This is shown in diagram app. 2. d. 2.

3. Prestige Graves.

At Lavoye, as discussed in chapter 11, the number of intact burials was large enough for some attempts to be made at finding prestige burials through the number of grave-goods or object-types in them.

This is fully discussed in chapter 11, so here it is necessary only to say a few words about how the prestige graves were determined. As mentioned in chapter 11, separate bar-charts were produced showing,
along the X-axis, the number of object-types or the number of grave-goods, and along the Y-axis the number of graves containing X grave-goods or object-types. Separate charts were made examining gender-specific objects only, neutral objects only and the total numbers of grave-goods or object-types.

In some diagrams (e.g. diag. 11.20a, b and f; 11.22f) a group of more lavishly-furnished burials was clearly revealed by these tests. In others one was not, so in these cases, the top 10% was taken. This was defined on the charts by calculating 10% of the sample. In diagram 11.22, the sample was thirty-eight, which, rounding up, gave 10% as four. In this case the top four graves in each chart constituted the prestige burials. In diagram 11.22a this was easy enough since there were indeed four graves with four female-specific object-types, the most found in any female burial. However, in the other charts, the top four graves straddled the bars for the two or three highest numbers of grave-goods or object-types. In these cases the graves represented by these bars were included in the 'prestige' group if the top graves constituted half or more (rounding up) of them. To take an example; diagram 11.22b shows that one grave had six female-specific grave-goods (this clearly was one privileged grave), and four graves had five female-specific grave-goods. Three graves were still required to make up the full 10% and since three represents over half of the four graves represented by the bar, all graves with with five female-specific grave-goods were included in the prestige group.
Appendix 2.c.

4. Conclusion.

The sites at Lavoye and Dieue-sur-Meuse were divided into chronological phases and separate plans for each were produced for ease of analysis. How this phasing was accomplished receives further attention in appendix 2.d. I hope to provide lengthier treatment and discussion of the methods of analysis described above in a future article.

The spelling of the Latin names of sanctuaries is usually as in the stational list.

EM = Early Medieval, M = Merovingian, LR = Late Roman, PC = 'Palaecristian', C = or earlier, C = century (followed by number of century in Roman numerals).

Archaeology excludes the date of earliest architectural fragments except where they date to the period under review.
Appendix 2.f. The Excavation of the Selected Cemeteries from Outside the Civitas of Metz: Chaouilley, Lavoye, Dieue-sur-Meuse and Audun-le-Tiche.

Chaouilley 'Aux Écaillés.'

The cemetery of Chaouilley, lying on the edge of a plateau near the village, was discovered in 1902 when a local man, collecting stones from a field, found a sword. He notified a M. Parisot of the Société d’Archéologie Lorraine.

Parisot excavated twelve graves, the news of which led Dr. Joseph Voinot and his brother Léo to the site, where they excavated a further twenty-eight graves. Parisot recovered little information beyond the individual grave inventories, and even the integrity of the graves is not always secure. However, the Voinots were, for their day, excellent excavators and recovered not only inventories but the dimensions of graves, skeletal position and the positioning of the grave-goods. They also recognized disturbed graves. Voinot used his medical training to estimate the sex and age of the deceased from the bones. Whilst old people are probably under-represented, as is often the case, his study tallies quite well with the information of the grave-goods (as far is gender is concerned; the age also tallies with the patterns which this thesis would argue one would expect from the grave-goods, but here we are on the verge of a circular argument).
Appendix 2.4.

The publication gives all of this information etc., apart from the absence of grave-plans and of detailed finds illustrations (the Voinots preferred photography but not all of the objects they illustrated can be linked with individual graves), its quality remains, for the most part, unsurpassed in cemetery reports from Lorraine, to this day. The site plan (reproduced in diagram 11.3) is somewhat suspicious, however, and is not, pace Voinot's claims, to scale.

More recently, as Guillaume states (Guillaume et al. 1980, p. 74) a seventh-century scaramasax was found suggesting that a later phase of the cemetery remains unexcavated. Nonetheless, the excavated area, centring on an important young man and his followers, must form a high proportion at least of the sixth-century phase, if not of the whole cemetery.

Lavoye 'Le Haie des Vaches'.

This cemetery, lying some 500m from the parish church of Lavoye, was also discovered in 1902 and excavated by a doctor, this time Dr. Meunier. He was excavating the large villa which lies next to and under the south-west edges of the cemetery, when he found the unfurnished burial of what he thought was a Roman slave. The excavation of the cemetery, by Meunier, his nephew Mr. Mouton and Chenet, later to become his son-in-law (though more famous for his work on Argonne ware), continued sporadically between 1905 and 1914 (275 graves were excavated between 1905-6; there were no excavations...
in 1907-9; 84 graves were excavated in 1910; one burial was excavated in 1911 and two in 1912, the remaining 17 being uncovered in 1914).

The course of the excavation was erratic, being constrained by agriculture taking place in the fields. Like the Voinots, Meunier's team were extremely good archaeologists for their day. Observations on skeletal position were not frequent but were made, the positioning of the grave-goods was noted far more often and complete inventories were kept. No grave dimensions were given except the depth, which might argue that the edges of features were not noted. This is argued against by the fact that the graves were generally stone-lined and that the only published grave-plan, that of grave 319, does show an edge to the burial. The excavators also appear to have been able to judge the integrity of the graves.

After the very first excavations, Meunier began to use his medical knowledge to estimate the sex of the dead, and, later on, the age as well (the same comments apply here as applied to the work of the Voinots, given earlier, except that Meunier evidently did not estimate the age except were he felt sufficiently confident to do so, and, apart from the children and one or two adults, only used very broad age-groupings, young or old, which probably represent the extremes of adulthood).

All of this information was noted and a good plan kept, so that a long time later, R. Joffroy could publish (Joffroy 1974) the site to as high a standard as that of the reports of much more recent
Appendix 2.1.

excavations (see below). The illustration of finds is not of particularly high quality, though clear, and the site plans are somewhat unclear.

The edges of the cemetery appear to have been located, judging from the excavation of the villa to the south-west and the large empty spaces along the eastern edge of the cemetery.

The chronological phasing of the site was worked out from Périn's (1980) study and some refinement of this, dividing the graves of Böhner-Périn period III (Ament's AM III) from those of period IV (Ament's JM I). This has been discussed, generally, in terms of dividing sixth- from seventh-century graves though it must be acknowledged that the dividing line between these two phases spans the decades between c.560 and 610. One group of about 30 burials between sixth-century group 2 and seventh-century group 1, to the south-west of the former, straddle this broad dividing line and could not, it was felt, be placed in either group. They were thus left undated and excluded from analysis, as were a number of unfurnished graves around the eastern edges of the site.

Dieue-sur-Meuse 'La Potence'.

One of several Merovingian cemeteries in the commune of Dieue-sur-Meuse, and one of two excavated in the late sixties and early seventies (the other, 'Thumelou' is not discussed here). 'La Potence' is located less than 100m. to the east of the village. The cemetery was known in the nineteenth century and a further grave was reported
Ci vitas Mediomatricorum

by G. Chenet in 1941. Chenet dated this to the late fourth century on account of the Argumun ware vessels contained in the burial. The comb and bone amulet which accompanied these give rise to the suspicion that, given the unusual frequency of such objects on this site (leading one to suppose, as noted in chapter 11, that the Dieze community was involved in bone working), the grave could have been Merovingian.

In 1968 A. Janot reported the discovery of several graves during surface survey, which were destroyed the same evening, probably by local children. Though Guillaume states that a rescue excavation was necessary, it is difficult to see what threat the site was under. The digging up of the site on a large scale by local children cannot seriously be envisaged and could have been deterred by a simple police guard until interest waned.

The excavation nevertheless went ahead, under the direction of Guillaume and Janot for the first 55 graves, and of Janot alone for graves 56 to 186. The excavators noted the dimensions of the grave, and, usually, the positioning of artefacts and the skeletal position. No physical anthropological survey was carried out, for reasons which remain unclear (the bones certainly appear to have survived reasonably well). The late Roman origin of the site was confirmed but much of the site had been damaged by reuse and violation of graves, as well as agriculture. The edges of the site appear to have been located.
Appendix 2.f.

The publication of the site (Guillaume 1974-5) leaves much to be desired, and, especially given the lack of real urgency noted above, these shortfalls cannot all be put down to having to excavate in 'rescue' conditions. The site plan (Guillaume 1974-5, fig. 4) is too small and closer examination reveals that many graves are not numbered whilst some have the same numbers as others. This poses a number of problems concerning the location of graves, which have not been able to be resolved here. The illustration of finds is excellent but there are only a few grave plans and no detailed account of the Ottonian settlement which overlay part of the cemetery. This time probably reflects the artefact-based, descriptive archaeology, obsessed with chronology which Merovingian archaeology was in the seventies and, for the most part, still is today.

The phasing of the site is based on Guillaume's work and Périn's more detailed study (Périn 1980).

Audun-le-Tiche 'Bois de Butte'.

Like Dieue-sur-Meuse, the cemetery at Audun-le-Tiche had been known for many years before systematic excavations began. These lasted for a few weeks each year between 1970 and 1984, when they were terminated on the orders of M. Colardelle, then Directeur des Antiquités de la Lorraine. Alain Simmer took over sole direction of the excavation in 1979.

The excavations were of uneven quality, for which Simmer cannot be blamed, but usually recovered information on grave-layout and skeletal...
position, and the integrity of the grave contexts seems to have been assessed fairly well. However, the fact that the few ST graves have no given dimensions does lead one to wonder whether the edges of the feature could not be recognized where the grave was not stone-lined. The site was, like Dieue, much damaged by violation and reuse.

The cemetery was very fully published, and Alain Simmer deserves high praise for the regular appearance of interim reports in Gallia and Archéologie Médiévale, periodic more detailed accounts (including full inventories) in A.S.H.A.L. and Cahiers Lorrains, and studies of individual features of the site (cf. Simmer 1982; 1983). This is an example which could be followed more often, particularly, in Lorraine, by those responsible for the important Seille valley sites and those at Mousson and Pont-à-Mousson. Only the excavations by Claude Lefelvire et al at Châtel-St.-Germain have reached a similar level of interim information.

The final publication (Simmer 1988) gives all the information recorded during the excavation. The physical anthropological report has, however, still not appeared, apparently as much to the annoyance of Simmer as of ourselves. Some information is given in the site-report. The shapes of the graves and the plans of their construction and any surrounding features are given, albeit in a much reduced scale, on the general site-plan. The quality of finds illustration is poor though they are clear enough, and no detailed recording is given for the Roman fanum. Furthermore, only twelve grave plans are given; those graves considered by Simmer to be interesting. This is
something of a drawback. Singer makes more detailed attempts to extract information on society from the cemetery than is common in cemetery reports, and deserves credit for doing so, although, as outlined in the text of this thesis, his analyses are highly flawed.

Column A = Predicted sex. Column B = Sex according to Heurtz. Column C = Predicted Age. Column D = Age according to Heurtz.

1 = 0-7 yrs.; 2 = 7-14 yrs.; 3 = 14-22 yrs.; 4 = 22-40 yrs.; 5 = 40-60 yrs.; 6 = 60+ yrs.
10.9 Ennery: Analysis of Pot-Shape & Gender.

Hilli profiles of pots found in female graves are found on the left of the diagram and those of pottery found in male burials, on the right. Hilli profiles of pots found in graves which were anthropologically unsexed are drawn on both halves of the diagram.

The number of the grave is followed by the anthropological sex of the subject. Where the artefactual sex of the deceased was different, this follows in square brackets. The dotted areas indicate the pot shapes for anthropologically sexed graves only.
10.10. Ennery 'Les Trois Arbres'. Relationship Between Grave Groups and Grave Layout etc.

Object-types (see diag. App. 2.D.1 for key).

- = Object-type X occurred with object-type Y in one or more intact graves containing two or more object-types.

0 = As above, but at least one of the object-types involved occurred in only one grave (and thus would usually have been excluded from the seriation).
Wittersheim 'vor dem langen Zaun.'

After Klein 1932 Taf.17
### 11.1. Definition of grave-types

<table>
<thead>
<tr>
<th>Grave-Type</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>A.</td>
<td>A grave containing male gender-specific object-types only.</td>
</tr>
<tr>
<td>AB. 1.</td>
<td>A grave containing male gender-specific and neutral object-types, including weapons.</td>
</tr>
<tr>
<td>AB. 2.</td>
<td>A grave containing male gender-specific and neutral object-types, including no weaponry.</td>
</tr>
<tr>
<td>B.</td>
<td>A grave containing neutral object-types only.</td>
</tr>
<tr>
<td>BC.</td>
<td>A grave containing female gender-specific and neutral object-types.</td>
</tr>
<tr>
<td>C.</td>
<td>A grave containing female gender-specific object-types only.</td>
</tr>
<tr>
<td>D.</td>
<td>A disturbed grave (excluded from analyses).</td>
</tr>
<tr>
<td>E. 1.</td>
<td>An unfurnished grave of an adult.</td>
</tr>
<tr>
<td>E. 2.</td>
<td>An unfurnished grave of a child.</td>
</tr>
<tr>
<td>Ax.</td>
<td>A grave containing one object-type, a male-specific object-type.</td>
</tr>
<tr>
<td>Bx.</td>
<td>A grave containing only one, neutral, object-type.</td>
</tr>
<tr>
<td>Cx.</td>
<td>A grave containing only one, female-specific, object-type.</td>
</tr>
<tr>
<td>X.</td>
<td>A grave containing only objects excluded from the analyses (because never found in more than one grave with more than one grave-good).</td>
</tr>
</tbody>
</table>

Object-type = Type of artefact included in the analyses of patterns of artefact-association (i.e. found in more than one intact grave containing more than one object-type).
Chaouilley 'Aux Écailles'.

Not to scale.

After Voinot 1904, opp p.72

Dieue-sur-Meuse.

Distribution of Grave-types.

After Pépin 1980, fig. 84.
Dieue-sur-Meuse: Grave-type compared with Grave-size.

The sample comprised all intact adult burials. These were arranged in a series from the most strongly male to the most strongly female, as in diag.11.39.

The E.1 graves were inserted into this series after the B graves.
Dieue-sur-Meuse: Grave size compared with Number of Object-types.

Sample = Intact adult graves
Phase-Plan:
Seventh Century.

After Périn 1980, fig. 84.

**A = Predicted sex; B = Sex according to Simmer; C = Predicted age; D = Age according to Simmer.** See diag. app. 2.d.2 for the key to age-group numbering system.
Audun-le-Tiche: Grave-type compared with Grave-size.

General pattern expected if grave size corresponded directly with the strength of the gender-related message of the grave-good assemblage.

The sample comprised 26 burials of adults containing 2 or more object-types. These were arranged in a series from most strongly female to most strongly male and the 7 E. graves were inserted into this series after the B graves.
Expected Grave-Good Distribution for Rank- & Class-Based Societies.

Symbols:

- Boss.
- Spur/Horse Harness.
- Bucket.
- Bronze Bowl.
- Angon.
### 12.3 Differences between the sixth and seventh centuries.

<table>
<thead>
<tr>
<th>Sixth century.</th>
<th>Seventh century.</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. <strong>Archaeological cemetery evidence.</strong></td>
<td>Grave-goods now seem to reflect social differences based upon wealth and rank.</td>
</tr>
<tr>
<td>The grave-goods lay stress upon gender and age differences and appear to reflect a social organisation based upon a form of role theory.</td>
<td>More cemeteries, frequently quite small.</td>
</tr>
<tr>
<td>Fewer, larger cemeteries.</td>
<td>New forms of artefact appear.</td>
</tr>
<tr>
<td>Grave-goods are very common, numerous and appear to have important social meanings.</td>
<td>Grave-goods become less significant, less common and less varied.</td>
</tr>
<tr>
<td>2. <strong>Urbanism in Metz.</strong></td>
<td>Metz recovers and begins to expand dramatically.</td>
</tr>
<tr>
<td>The town of Metz continues to stagnate for much of the century.</td>
<td>Many churches are founded in Metz.</td>
</tr>
<tr>
<td></td>
<td>A nobility defined by family and birth is established.</td>
</tr>
<tr>
<td>3. <strong>The leaders of society.</strong></td>
<td>The monarchy slides into decline by the mid-century and politics becomes dominated by rivalries between great families.</td>
</tr>
<tr>
<td>Society led by an aristocracy very much defined by de facto prestige.</td>
<td>Indications of more institutionalised social hierarchy and community-leadership begin to appear, though they are still far from clear.</td>
</tr>
<tr>
<td>Community leadership is very insecure and open to challenge.</td>
<td>Seventh-century society gives every impression of being far more complex than its sixth-century predecessor.</td>
</tr>
<tr>
<td>The kings are usually strong and retain complete control over their magnates.</td>
<td></td>
</tr>
<tr>
<td>4. <strong>Law.</strong></td>
<td></td>
</tr>
<tr>
<td>An impression is given of a society based upon gender and age with the only other forms of power based around the royal service.</td>
<td></td>
</tr>
<tr>
<td>5. <strong>General.</strong></td>
<td></td>
</tr>
<tr>
<td>An impression is given of a somewhat undeveloped form of social organisation.</td>
<td></td>
</tr>
