1. Language Acquisition and the Development of Grammar ................................ 9
   1.1. Introduction................................................................................................. 9
   1.2. What is Grammar? ......................................................................................... 9
   1.3. Chomsky’s Universal Grammar...................................................................... 10
   1.4. The First Empirical Study of Language Acquisition................................. 11
   1.5. The Role of Formulaicity in Language Acquisition .................................... 12
   1.6. Research on Analytic Versus Holistic Learning Styles in Language Acquisition | 16  
   1.7. Usage-Based Models of Language Acquisition............................................ 30
   1.8. A Usage-Based, Constructivist Approach to the Acquisition of Grammar ... | 31  
   1.9. Summary and Conclusions............................................................................. 39

2. The Phonology and Acquisition of Auxiliary Syntax ....................................... 41
   2.1. Introduction................................................................................................. 41
   2.2. The Phonetic and Phonological Nature of Auxiliary Verbs.......................... 41
   2.3. The Phonological Development of Auxiliary Verbs...................................... 48
   2.4. Summary of Research on the Phonology of Auxiliary Verbs.......................... 50
   2.5. The Developmental Trajectory of Auxiliary Emergence ................................ 51
   2.6. The Acquisition of Auxiliary Syntax: Research within a Usage-Based Constructivist Framework .............................................................. | 54  
   2.7. Summary of Research on the Acquisition of Auxiliary Syntax .................... 67
   2.8. Summary and Conclusions............................................................................. 70

3. The Development of Phonology ........................................................................ 71
   3.1. Introduction .................................................................................................. 71
   3.2. What is Phonology? ...................................................................................... 72
   3.3. Typical Phonological Development .............................................................. 72
       3.3.1. The Acquisition of Segments and Syllable Shapes ................................ 72
       3.3.2. The Acquisition of Stress ..................................................................... 73
   3.4. Phonological Versus Phonetic Approaches to Speech .................................. 75
Development……………………………………………………………….... ................................. 75
3.4.1. Phonological Approaches……………………………………………………………... 75
3.4.2. Articulatory Phonology…………………………………………………………... 77
3.5. Usage-Based Phonology…………………………………………………………... 78
3.6. The Development of Multi-Word Speech…………………………………………... 79
3.7. Word Juncture Behaviours and Connected Speech Processes………………….. 81
3.8. The Development of Connected Speech Processes………………………………… 90
3.9. Phonological Characteristics of Child-Directed Speech………………………….. 100
3.10. Summary and Conclusions…………………………………………………………... 1 08

4. Impressionistic Phonetic Transcription as a Methodological Tool ........................... 110
4.1. Introduction………………………………………………………………….. 110
4.2. What is Perceptual Phonetic Transcription?.……………………………………... 110
4.3. Arguments For and Against Transcription………………………………………… 111
4.4. Audio and Video Recording……………………………………………………….. 113
4.5. Listening to the Data……………………………………………………………. 115
4.6. Transcribing the Data……………………………………………………………. 119
4.7. Transcribing Spontaneous Speech………………………………………………… 120
4.8. Reliability and Validity in Phonetic Transcription………………………………… 121
4.8.1. Defining Reliability and Validity……………………………………………... 122
4.8.2. Transcription Agreement……………………………………………………… 122
4.8.3. Inter-Rater Reliability………………………………………………………… 124
4.9. Summary and Conclusions…………………………………………………………... 1 27

5. Aims and Method of the Current Study ........................... ................................. 129
5.1. Aims of the Current Study…………………………………………………………... 129
5.2. Method……………………………………………………………………….. 131
5.2.1. Participant and Data…………………………………………………………... 131
5.2.2. Ethical Considerations………………………………………………………… 132
5.2.3. Data Sampling………………………………………………………………... 133
5.2.4. Phonetic Analysis of Potential Assimilation Sites……………………………… 134
5.2.5. Segmental Phonological Analysis………………………………………... 137
5.2.6. Syntactic Analysis…………………………………………………………….. 138
5.2.7. Investigating the Role of Maternal Input and Interactional Context in Thomas’ Assimilation Development…………………………………………………………………... 139
5.2.8. A Test of Inter-Rater Transcription Agreement……………………………… 142

6. Thomas’ Assimilation Development in Constructions Containing Can and Can’t ........................................... 146
6.1. Introduction………………………………………………………………….. 146
6.2. A Control Analysis of Thomas’ Segmental Phonological Development…….. 146
6.2.1. Thomas’ Realisations of Target Alveolar and Velar Plosives .......................... 147
6.2.2. Thomas’ Realisations of Word-Final Target Nasals .................................. 149
6.3. Quantitative Trends in Thomas’ Assimilation Development .......................... 149
   6.3.1. The Development of Bilabial Assimilation .............................................. 150
   6.3.2. The Development of Velar Assimilation ............................................... 153
6.4. Specific Phonetic Phenomena Occurring at Potential Assimilation Sites ....... 157
   6.4.1. Emerging Phonetic Forms of Can ....................................................... 157
   6.4.2. Emerging Phonetic Forms of Can’t ..................................................... 160
   6.4.3. Possible Progressive Alveolar Assimilation ........................................ 162
   6.4.4. Progressive Nasal Assimilation and Gemination .................................... 162
   6.4.5. Partial Assimilation and Gradual Assimilation .................................... 163
   6.4.6. Assimilation and Pauses ................................................................. 163
   6.4.7. Assimilation in False Starts and Revisions ........................................ 164
   6.4.8. Summary of Specific Phenomena Observed at Potential Assimilation Sites ................................................................. 166
6.5. Conclusion .................................................................................................. 169

7. Thomas’ Syntactic Development in Constructions Containing Can and Can’t 170
7.1. Introduction ................................................................................................. 170
7.2. Typical Syntactic Development from Age Two to Four Years ....................... 170
7.3. Quantitative Analyses of Thomas’ Syntactic Development .......................... 171
    7.3.1. Mean Length of Utterance ................................................................. 171
    7.3.2. Maximum Length of Utterance ........................................................ 175
7.4. Thomas’ Syntactic Development of Constructions Containing Can and Can’t at Age Two ................................................................. 177
    7.4.1. Frequency of Occurrence of Can and Can’t ...................................... 177
    7.4.2. Emergence and Usage of Can and Can’t ........................................... 178
7.5. Thomas’ Syntactic Development of Constructions Containing Can and Can’t at Ages Three and Four ................................................................. 180
    7.5.1. Frequency of Occurrence of Can and Can’t ...................................... 181
    7.5.2. Usage of Can and Can’t from Age 3;0 to 3;6 ................................... 181
    7.5.3. The Development of Complex Sentences ........................................... 183
    7.5.4. The Emergence of Tag Questions ..................................................... 183
    7.5.5. The Emergence of Interrogative Constructions ................................... 186
    7.5.6. Summary of Thomas’ Syntactic Development at Ages Three and Four ................................................................. 187
7.6. The Syntactic Development of Potential Assimilation Sites in Constructions Containing Can and Can’t ................................................................. 188
    7.6.1. The Syntactic Development of Potential Bilabial Assimilation Sites ...... 188
    7.6.2. The Syntactic Development of Potential Velar Assimilation Sites ....... 191
    7.6.3 Summary of Thomas’ Syntactic Development at Potential Assimilation Sites ................................................................. 194
8. The Role of Maternal Input and Interactional Context in Thomas’ Assimilation Development

8.1. Introduction

8.2. The Occurrence of Assimilation in M’s Speech

8.2.1. Overall Proportions of Assimilations

8.2.2. Bilabial Assimilation

8.2.3. Velar Assimilation

8.2.4. A Comparison of Assimilation in M’s and Thomas’ Speech

8.3. Other Phonetic Phenomena Occurring at M’s Potential Assimilation Sites

8.3.1. Non-Assimilation Close Junctures

8.3.2. False Starts and Revisions

8.3.3. Phonetic Forms of Can

8.4. A Comparison of Thomas’ and M’s Most Frequent Constructions Containing Can and Can’t

8.5. The Occurrence of Assimilation in Thomas’ and M’s Speech in the Context of Interaction

8.5.1. Thomas’ Repetitions of M

8.5.2. Segmental Matching and Non-Matching in M’s Repetitions of Thomas

8.5.3. A Comparison of Segmental Matching with Matching of Prosodic Phenomena in M’s Repetitions of Thomas

8.5.4. A Comparison of Segmental Non-Matching with Matching of Prosodic Phenomena in M’s Repetitions of Thomas

8.5.5. The Relationship between Segmental and Prosodic Matching Over Time in M’s Repetitions of Thomas

8.6. Summary and Conclusion

9. Discussion

9.1. Thomas’ Acquisition and Usage of Can and Can’t

9.2. The Relationship between Thomas’ Assimilation Development and his Acquisition of Syntax in Constructions Containing Can and Can’t

9.3. A Phase Model of Thomas’ Assimilation Development

9.4. A Comparison of the Current Study with Previous Research on Assimilation Development

9.5. The Relationship between Assimilation in Thomas’ Speech and Assimilation in the Maternal Input

9.6. Pauses, False Starts and Revisions at Potential Assimilation Sites in Thomas’ Speech

9.7. Phonetic Forms of Can In Thomas’ Speech

9.8. A Comparison of Thomas’ Data with Phonological Research on Auxiliary
Verbs…………………………………………………………………………………… 259
9.9. Phonetic Forms of Can’t in Thomas’ Speech……………………………….. 259
9.10. Evaluation of the Current Study………………………………………….... 260
9.10.1. Strengths and Weaknesses of the Dense Database and the Longitudinal Case Study………………………………………………………… 260
9.10.2. Strengths and Weaknesses of the Methods Employed in Data Analysis……………………………………………………………. 263
9.11. Conclusion………………………………………………………………….. 267
References………………………………………………………………………… 274

Appendix 1. Ethical Approval for the Current Study 284
1.1. University Research Ethics Application Form 284

1.2. Letter of Approval 291

1.3. Conditions of Use of the Dense Database ………………………………… 292

Appendix 2. Thomas’ Realisations of Target Alveolar and Velar Plosives 293
2.1. Tables Showing Thomas’ Realisations of Target Alveolar and Velar Plosives Sampled at Age 2;3;10 ………………………………………. 293
2.2. Tables Showing Thomas’ Realisations of Target Alveolar and Velar Plosives Sampled at Age 2;6;12 ………………………………………. 295
2.3. Tables Showing Thomas’ Realisations of Target Alveolar and Velar Plosives Sampled at Age 2;9;15 ………………………………………. 298
2.4. Tables Showing Thomas’ Realisations of Target Alveolar and Velar Plosives Sampled at Age 3;0;2 ………………………………………. 301
2.5. Tables Showing Thomas’ Realisations of Target Alveolar and Velar Plosives Sampled at Age 3;3;3 ………………………………………. 304
2.6. Tables Showing Thomas’ Realisations of Target Alveolar and Velar Plosives Sampled at Age 3;6;6 ………………………………………. 307
2.7. Tables Showing Thomas’ Realisations of Target Alveolar and Velar Plosives Sampled at Age 3;9;3 ………………………………………. 311
2.8. Tables Showing Thomas’ Realisations of Target Alveolar and Velar Plosives Sampled at Age 4;0;7 ………………………………………. 316

Appendix 3. Thomas’ Realisations of Can and Can’t at Age Two 320
3.1. Tables Showing Thomas’ Realisations of Can and Can’t Sampled at Age 2;3 …………………………………………………………………… 320
3.2. Tables Showing Thomas’ Realisations of Can and Can’t Sampled at Age 321
Appendix 4. Thomas’ Realisations of *Can* and *Can’t* at Potential Assimilation Sites at Ages Three and Four

4.1. Tables Showing Thomas’ Realisations of *Can* and *Can’t* at Potential Assimilation Sites Sampled at Age 3;0 ................................................. 345
4.2. Tables Showing Thomas’ Realisations of *Can* and *Can’t* at Potential Assimilation Sites Sampled at Age 3;1 ................................................. 346
4.3. Tables Showing Thomas’ Realisations of *Can* and *Can’t* at Potential Assimilation Sites Sampled at Age 3;2 ................................................. 347
4.4. Tables Showing Thomas’ Realisations of *Can* and *Can’t* at Potential Assimilation Sites Sampled at Age 3;3 ................................................. 350
4.5. Tables Showing Thomas’ Realisations of *Can* and *Can’t* at Potential Assimilation Sites Sampled at Age 3;4 ................................................. 355
4.6. Tables Showing Thomas’ Realisations of *Can* and *Can’t* at Potential Assimilation Sites Sampled at Age 3;5 ................................................. 359
4.7. Tables Showing Thomas’ Realisations of *Can* and *Can’t* at Potential Assimilation Sites Sampled at Age 3;6 ................................................. 362
4.8. Tables Showing Thomas’ Realisations of *Can* and *Can’t* at Potential Assimilation Sites Sampled at Age 3;7 ................................................. 368
4.9. Tables Showing Thomas’ Realisations of *Can* and *Can’t* at Potential Assimilation Sites Sampled at Age 3;8 ................................................. 376
4.10. Tables Showing Thomas’ Realisations of *Can* and *Can’t* at Potential Assimilation Sites Sampled at Age 3;9 ............................................... 379
4.11. Tables Showing Thomas’ Realisations of *Can* and *Can’t* at Potential Assimilation Sites Sampled at Age 3;10 ............................................... 382
4.12. Tables Showing Thomas’ Realisations of *Can* and *Can’t* at Potential Assimilation Sites Sampled at Age 3;11 ............................................... 386
4.13. Tables Showing Thomas’ Realisations of Can and Can’t at Potential Assimilation Sites Sampled at Age 3;11 ............................... 389

4.14. Notes on Transcription Discrepancies ........................................... 392

4.15. Frequency Counts for Can and Can’t at Ages Three and Four ................ 402

4.16. Summary of Frequency Counts for Can and Can’t at Ages Three and Four 406

Appendix 5. M’s Realisations of Can and Can’t at Potential Assimilation Sites 407

5.1 M’s Realisations of Can and Can’t at Potential Assimilation Sites at T1 (Thomas aged 2;6) ................................................................. 407

5.2. M’s Realisations of Can and Can’t at Potential Assimilation Sites at T1 (Thomas aged 3;3) ................................................................. 411

5.3. M’s Realisations of Can and Can’t at Potential Assimilation Sites at T1 (Thomas aged 4;0) ................................................................. 415

Appendix 6. Adjacent and Near-Adjacent Pairs of Utterances Occurring in Interactions between Thomas and M 418

6.1. Thomas’ Repetitions of M ............................................................... 418

6.1.2. Pairs Matched for Assimilation and All Prosodic Phenomena ........ 419

6.1.3. Pairs Non-Matched for all Segmental and Prosodic Phenomena ...... 419

6.2. M’s Repetitions of Thomas .............................................................. 420

6.2.1. Pairs Matched for All Segmental and Prosodic Phenomena .......... 420

6.2.2. Pairs Matched for all Phenomena, Except for Overall Stress Pattern .. 420

6.2.3. Pairs Matched for all Phenomena Except Nuclear Tone ............... 421

6.2.4. Pairs Matched for Segmental Realisation of the Potential Assimilation Sites and Stress Pattern, but Non-Matched for Locus of Tonic Syllable and Nuclear Tone ................................................. 423

6.2.5. Pairs Matched for Segmental Realisation of the Potential Assimilation Sites, but Non-Matched for Prosodic Phenomena ......... 424

6.2.6. Pairs Non-Matched for all Segmental and Prosodic Phenomena ...... 425

6.2.7. Pairs Matched Only for Stress Pattern ....................................... 425

6.2.8. Pairs Matched Only for Locus of Tonic Syllable .......................... 426

6.2.9. Pairs Matched for Stress Pattern and Locus of Tonic Syllable, but Non-Matched for Segmental Realisation of Potential Assimilation Site and Nuclear Tone ................................................. 427
