$\text{squeezeBox}^2$

for two Accordions

Edward Caine
Performance Notes

The piece explores the use of bellows. Bellow movements should be dramatic and emphasised. Bellow sound should have equal prominence with pitched material.

The notated bellow directions represent an ideal and can, to a certain extent, be revised for performance, with the exception of certain rules:

in bars 1-6 the bellows must be as notated.

in bars 6-23 the bellows should have the appearance of being connected i.e. when one performer's bellows are expanding, the other's should be contracting. The effect of the air sound should be as if the performer is gasping for breath, and where possible bellows should be in opposite directions for pitch and air.

from the end of bar 25 - bar 31 the bellows must be as written. Pause for as long as you need on the pitched notes to allow time for getting back into position.

bar 31 - 46: the rhythm is more important than the effect of the bellows contracting and expanding. For preference, keep the starting direction of each bellow as written, but change direction during pitched notes or air tone as needed.

[squeezeBox]$^2$
for two accordions

by Edward Caine

duration: 5-9'

[squeezeBox]$^2$ was commissioned by Sound and Music in collaboration with the Cheltenham Festival in 2010.

First performance by TOEAC accordion duo in the Cheltenham Festival, 14th July 2010.
Air, unless there is an accent, try to mask the sharp accent of the air button itself.

Air button with accent - audible attack on pressing the button.

Air button with accent - audible attack on pressing the button.

An exponential increase in frequency (refers to vibrato and beating) when the line is straight, there is no vibrato/beating.

Vibrato

Beating - caused by a tone glissando of up to a semitone on the right hand, offset against a stable note in the left.

Bellows out

Bellows in

Bellows shake

Rhythmic bellows shake

Bellows shake all the way out (as far as it can go with the left manual still accessible)

Bellows shake all the way in

Legato bellow change (mid-note or air)
[squeezeBox]
poco accelerando, if possible, or a growing sense of urgency
* optionally add air button to close quicker increase dynamic or just finish with bellows open
