Figure 6. 1. Geological map of the Makrygialos area (after Krahtopoulou 2001)

- Holocene: alluvial deposits
- Holocene: Talus cones, scree and torrential terraces
- Pleistocene: volcanic rocks
- Neogene: fluviolacustrine and terrestrial deposits
- Postflysch tectonic nappe: crystalline limestone
- Postflysch tectonic nappe: peridotites and gabbros
- M. Senonian (?) - Maestrichtian - Paleocene (?): flysch
- Cenomanian - M. Senonian: limestones transgressive
- Preuppercretaceous tectonic nappe: serpentized peridotites - serpentinites
- Preuppercretaceous tectonic nappe: amphibole - epidote - chlorite schists
- Preuppercretaceous tectonic nappe: gneisses gneiss - schists
- Upper (?) jurassic: mica schists - phyllites
- Middle triassic - Upper jurassic: marbles
