

## Map 2: Subglacial bedforms of Britain

### South Sheet

Scale: 1: 525 000 (when displayed at ISO A0 size)

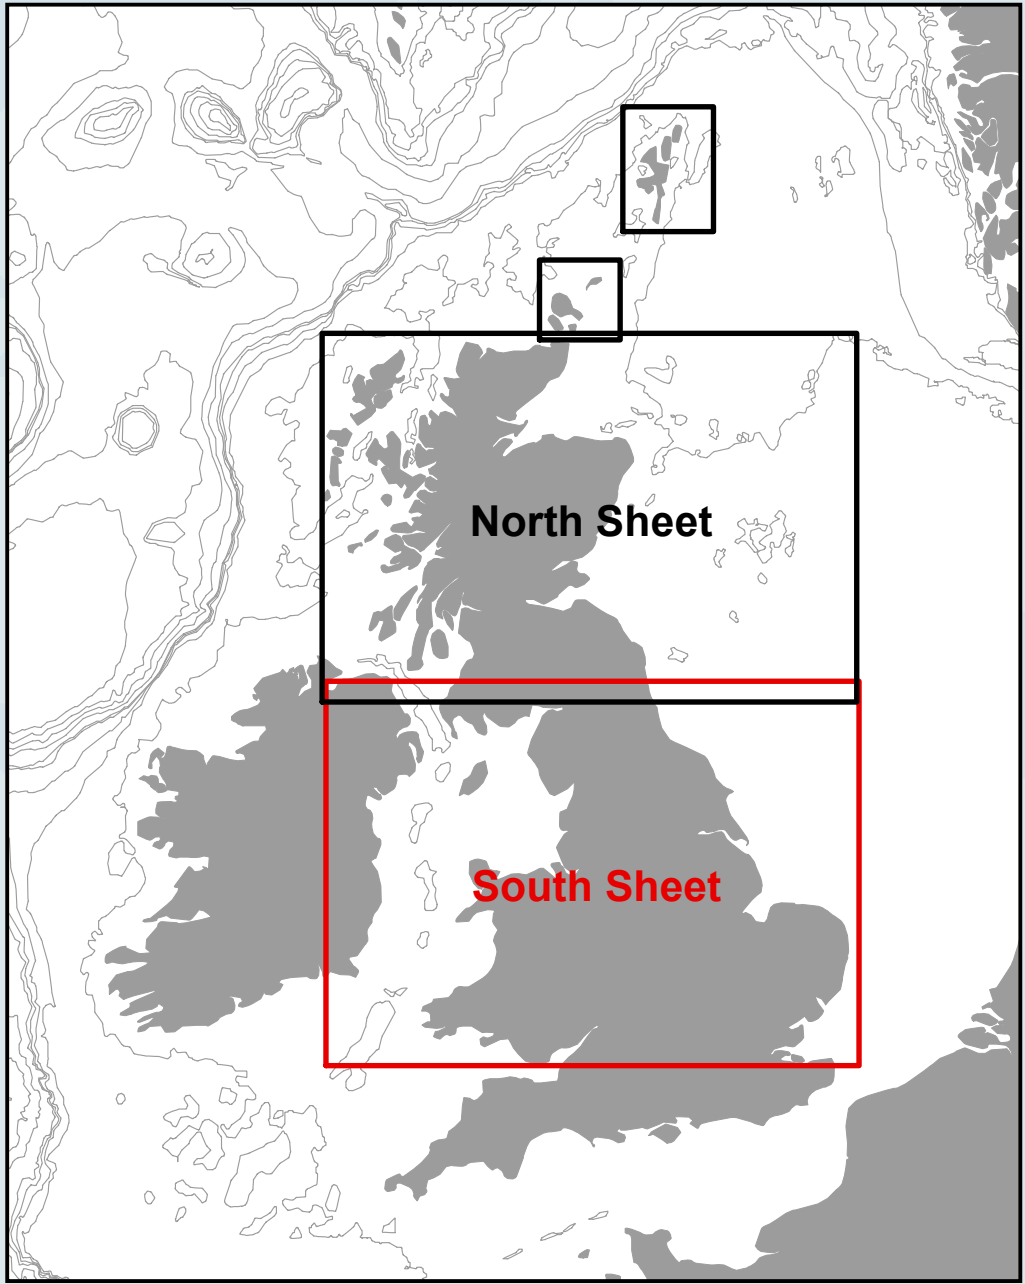

01020406080100

km

Coordinate System: British National Grid  
Datum: Ordnance Survey of Great Britain, 1936  
Projection: Transverse Mercator  
Spheroid: Airy  
Units: metres

Elevation data from Ordnance Survey Land-Form PANORAMA DEM ©Crown copyright/database right 2004. An Ordnance Survey/EDINA Digimap supplied service.Bathymetric data from GEBCO One Minute Grid. Reproduced from the GEBCO Digital Atlas published by the British Oceanographic Data Centre on behalf of IOC and IHO, 2003.

All data mapped (2004-2007) from relief shaded visualisations of the NEXTMap digital terrain and surface models and Landsat TM imagery. Datasets were obtained under licence from British Geological Survey (NERC). The Isle of Man is not covered by the NEXTMap Britain (2004) dataset. This area was mapped from lower resolution data (Ordnance Survey Land-form PANORAMA DEM). Mapping was conducted by on-screen digitisation of individual features within a Geographic Information System.

### Legend

Drumlin

Outline of individual drumlins representing size and orientation

Mega-scale glacial lineation (MSGL)

Crestline of individual MSGLs indicating length and orientation

Crag and tail

Line represents the orientation and length of individual crag and tail. Arrow indicates direction of drift ridge in relation to bedrock bump.

Minor ribbed moraine

Crestline of individual minor ribbed moraine ridges

Ribbed moraine ridge

Outline of individual ribbed moraine ridges

Elevation (m.a.s.l.)

1346
