

Plate 03: General Introduction to English Sceats

Romanitas in secondary phase sceatta portraiture of Series K and T,¹ (coin right, found south Humberside).

Rare Series J variant: the defeat of evil in two acts.²

Rare Series J variant: the defeat of evil in three acts.³

Series QII: the defeat of evil in two acts (*SL* group 64)

Series B: syncretic imagery - apotropaic Uroboros
Found Castle Acre, Norfolk (*SL* group 16)

Series E: intentional anonymity
'from France' (*SL* group 97)

¹ Abramson, (2012a) p. 73-104, *SL* p. 249.

² Finds evidence from a probable hoard, offered at auction by cgb.fr in June 2013, suggests that the variety on the right was possibly minted in Quentovic.

³ Abramson, 2012d 249 for an explanation of the iconography.

Progression l-r through Series A (rare Valdobertus variety, found at Thwing)⁴, C (MCF) to early R (Sledmere)

Deterioration l-r in late Series R (Tilberht, $\uparrow\text{N}\text{E}\text{M}\text{E}\text{N}\text{T}$), saltire cross reverse (found Rotherham) to geometric loss of identity (type 70, found Adwick-upon-Deane, Doncaster).

Metrological variations in circulating coinage, Series E and U.⁵

a-d: Northumbrian Series Y (a & c, 737-58) and East Anglian Series Q (b, 740s & d, 725-45).

Sceatta reverses compared.

Findspots a-d: '4 miles east of York', Norfolk/Cambridgeshire, South Newbald and Harwell.
