

TOM SISSONS

RIVERS

for cello and live electronics

PERFORMANCE NOTES

CELLO

Bars marked with repeat signs can be repeated as many times as the player chooses. During these passages, experiment with altered dynamics/position of bow/use of vibrato etc.

In rehearsal, experiment with the structure through use of multiple repeats and altering the duration of graphic-score sections. These varied durations will allow the improvised cello and fixed electronic parts to produce a different outcome each time.

A small portion of the piece uses graphic notation. In each case the contour of the line drawn affects the pitch, whether played nat. or as a harmonic gliss. The line should be used as the basis of this improvised passage.

The tape part includes excerpts of a pre-recorded cello. These do not in any way have to synchronise with the live cello part.

The second half of the piece requires the cellist to perform five actions, detailed in the score, against the same electronic backdrop as the first half.

The actions take place at the same moments that important material is introduced in part 1. These should be performed slowly and deliberately.

ELECTRONICS

SET UP:

Mic on cello, running into attached Reaper project. The cello signal is affected live.

A second mic in front of glass bowl on stage. The signal from this mic is affected in the same manner as the cello.

The markers in the Reaper project attached are cues that ensure the tape and cello parts can be synced at necessary points. These cues are shown in the score. Tape cues follow the cellist's lead.

J Extremely slow

While reverb decays, walk back over to glass bowl.

Tape

Perform the following actions, **a - e** over glass bowl (**x 2 - 4 approx.**), allowing all artefacts to fall into it.
Tape part runs as from the beginning: all sounds are treated in the same manner as cello part.

II.

118 **K** **L** **M** **N**

Vc. a) Drop a large pebble into bowl. b) Slowly release handful of small pebbles a) b) a) a) c) Clap two large stones together, held over top of bowl.

Tape

This section contains four measures of music, labeled K through N. The Vc. part features actions: a) Drop a large pebble into bowl, b) Slowly release handful of small pebbles, a), b), a), a), and c) Clap two large stones together, held over top of bowl. The Tape part includes Synthesizer and Melodica notation.

122 **O** **P** **Q**

Vc. b) b) a) b) c) c) d) Snap dry twigs. d) a) b) c) d)

Tape

This section contains three measures of music, labeled O through Q. The Vc. part features actions: b), b), a), b), c), c), d) Snap dry twigs., d), a), b), c), and d). The Tape part includes Keyboard and Melodica notation.

125 **R** **S**

Vc. e) Slowly release handful of sand. e) a) b) c) d) d) b) Allow reverb to decay.

Tape

This section contains two measures of music, labeled R and S. The Vc. part features action e) Slowly release handful of sand., followed by e), a), b), c), d), d), and a box labeled "Allow reverb to decay." The Tape part includes Synthesizer and Melodica notation.
