

Bawn, Rosanna (203056079) - PhD Thesis (When should careers guidance happen?
Associations between Theory of Mind, Vocational Interests and Career Aspirations)

Errata sheet

The uploaded thesis is the same as the one examined following corrections, except for a small number of changes.

Following guidance from the Library Open Research team, copyright information was added into the Figure captions for the following figures: Figure 1.2, 2.1, 3.1, 4.7, 6.1, 6.2, 6.3 and 6.4.

In the process of updating these figure captions three small mistakes were noticed:

- The DOI for the Barclay et al (2017) paper linked to the working paper, and not the published paper. This has been updated in the References section (p. 337).
- The referencing for Figure 6.1 required further information – the Figure had been obtained from Gottfredson (2002a), which was replicated from Gottfredson (1981) – the same figure but with slightly different formatting. The referencing description for the figure has been clarified in more detail.
- Figures 6.3 and 6.4 were left off the List of Figures page. These have now been added.

A typing error was also spotted on the caption for Table 4.7 (the error has been deleted).

The Contents, List of Tables and List of Figures fields were all updated to ensure the correct page numbers are listed.
