# Occulta scientia siderum

(2021)

*for*

solo bass clarinet in B-flat

Duration: c.6 minutes

The title, *Occulta scientia siderum* (tr. secret knowledge of the stars), alludes to what was found written on the epitaph of English composer John Dunstaple (c.1390-1453) at St Stephen, Walbrook, the place he was also buried. Unfortunately, the original epitaph was destroyed in the Great Fire of 1666 but was reinstated in 1904.

John Dunstaple has been an influence on my music for a number of years as I find many nuances and aspects of his musical style and process being integral to the way I continue to develop my compositional style. *Occulta scientia siderum* contains three rather specific subjects that relate to Dunstaple in one way or another. First, the material for the piece is directly derived from Dunstaple's motet *Ascendit Christus super coelos* (15th century) from using implemented quotations, to using hidden references. The quotations and derivations of the Dunstaple material are 'hidden' by the use of constantly fluctuating levels of texture within a monophonic polyphony. This means that the quotations and references are always somewhere in between being quotations and not being quotations: they fluctuate within a middle ground between the two contrasts. Second, when constructing material for the piece, I utilised the use of the interval of a third as one of Dunstaple's stylistic traits was triadic harmony. *Occulta scientia siderum* exposes the interval of a third throughout the piece and these moments of exposure. Finally, as the title translates to 'secret knowledge of the stars', the intention behind aurally obscuring quotations and references of Dunstaple's material relates to the concept of secrecy as the quotations are never quite tangible, and are hidden as secrets throughout the piece.

# Performance directions:

Very dry & percussive articulation: 

Overblown notes\*\* (let upper harmonics ring): ◆

Quartertines: 

Multiphonics\*: 

Slightly dry & percussive articulation: 

Slap tongue: 

Breath tone\*\*: ◇

Cancels out previous direction: ord.

Change from one state to another: 

Flutter tongue: flz. + tremolando

All **gracenotes** before the beat  
All **trills, tremolandi and**  
**gracenotes** as fast as possible

**SCORE IS TRANSPOSED**

Accidentals are only valid for the note  
they precede, unless that note is  
immediately repeated

No vibrato

\* Multiphonics are derived from Harry Sparnaay, *The Bass Clarinet: A Personal History*  
(Barcelona: Periferia, 2010)

\*\* overblown notes and breath tones last as long as the bracket succeeding the symbol

## Vocalisations (on ossia):

Transposed into B-flat

**Top line of 3-line stave (e.g. bb.61-64):** high vocal register

**Middle line of 3-line stave:** middle vocal register

**Bottom line of 3-line stave:** low vocal register

**Between lines:** between vocal registers

**Follow the basic line of the curve dependent on own vocal register**

Return to determinate vocalisations (in any comfortable register) on  
5-line vocal staves

**Vocal dynamics** depend on the dynamics on the bass clarinet line
