CONSENT FORM

Title of Project: Listening test for evaluating the similarity between artificial reverberation algorithms and real reverberation

Name of Researchers: **Huan Mi, Gavin Kearney**

Thank you for agreeing to participate in this study. We are working to evaluate the similarity between different reverberation algorithms and real reverberation. Your participation is key to our research success.

1. We will be querying your response to a number of different audio stimuli played back over headphones.
2. You understand that your participation is voluntary and you are free to withdraw at any time without giving any reason. If you choose to withdraw, data collected up to the point of withdrawal may still be used in the study.
3. You understand that data collected during the study, will be accessed by researchers employed or in formal collaboration with the University of York in their research in audio engineering. You give permission for these researchers to have access to your data.
4. You understand that data collected during the study may be published. You give permission for open access to your data provided the data is anonymised.
5. You agree to take part in the above study and receive the £10.00 Amazon voucher.
