

LIST OF CONTENTS

Abstract	i
Acknowledgements	ii
Table of contents	iv
Index of tables	viii
Index of figures	x
Chapter 1: Introduction	
1.1 Malaysia: Location and Demographics	1
1.2 A Brief Explanation of Ethnic Diversity in Malaysia	3
1.2.1 Malay women in Malaysian context	4
1.3 Recreational Forest in a Malaysian Context	6
1.4 Definition of Terms	8
1.5 The Forest Recreation Concept	8
1.6 Policies Related to Malaysian Forests	9
1.7 An Overview of Forest Benefits	11
1.8 The Impact of Personal Characteristics on Forest Use	12
1.9 Research Aims and Importance of Research	13
1.10 Research Questions	14
1.11 The Research Design	16
1.12 Thesis Structure	17
Chapter 2: Literature Review	
2.1 Physical Activity and Green Space Use	19
2.2 Human Health and Green Space Use	21
2.2.1 The biophilia hypothesis	23
2.2.2 Restoration	24
2.2.3 Stress recovery concept	27
2.3 Social Cohesion Concept	28
2.4 Social Aspects and Green Space Use	29
2.5 People's Attitudes to Green Space	31
2.6 People's Feelings When Using Green Space	34
2.7 Recreational Activities and Patterns of Green Space Use	36
2.7.1 Activities engaged in green space	37
2.8 The Impact of Personal Differences on People's Experience	38
2.8.1 Age	38
2.8.2 Gender	41
2.8.3 Cultural background and ethnicity	44
2.8.4 Education and socioeconomic factors	50
2.9 Conclusion	51
Chapter 3: Methodology	
3.1 The Rationale for Using a Mixed methods Approach	53
3.1.1 The mixed methods approach used in this study	55
3.2 Ethical and Practical Approach	55
3.2.1 Informed consent for questionnaire survey	56
3.2.2 Informed consent for interviews	56
3.2.3 Recording	57

3.2.4	Translation and transcription	57
3.3	Preliminary Data Collection	58
3.4	Questionnaire Pilot Study	62
3.4.1	Drawing the final sample for survey	63
3.5	Questionnaire	63
3.5.1	Self-administered questionnaire	63
3.5.2	Questionnaire items	64
3.5.3	Response rate and questionnaire completion	69
3.5.4	Data analysis	70
3.5.5	Validity and reliability	72
3.6	Semi-structured Interviews	73
3.6.1	Qualitative interviewing rationale	73
3.6.2	Approach to interviewing	74
3.6.3	Obtaining interview sample	74
3.6.4	Analysis stages	76
3.6.5	Validity and reliability	78
3.7	Conclusion	80
Chapter 4: Study Site Descriptions		
4.1	Selection of Study Sites in Selangor	81
4.1.1	Factors that contributed to selection of sites	83
4.2	Conclusion	92
Chapter 5: Respondents' Characteristics and Observation Results		
5.1	General Respondent's Characteristics	93
5.2	Respondent's Characteristics for each Recreational Forest	95
5.3	Observation Results for Ampang and Kanching Recreational Forests	98
5.3.1	Days of visit by site	99
5.3.2	Gender distributions based on sites	99
5.3.3	Recreational activities observed in the recreational forests	100
5.3.4	Recreational activities and gender	102
5.3.5	Recreational activities and ethnicity	104
5.3.6	Recreational activities and the age of users	105
5.4	Maintenance Issues at Both Sites	106
5.5	Conclusion	108
Chapter 6: Forest Users' Attitudes and Experiences in the Recreational Forests		
6.1	General Patterns of Use of the Recreational Forests	109
6.1.1	Frequency of visits	109
6.1.2	Mode of transport to the recreational forests	110
6.1.3	Length of stay in the recreational forests	111
6.1.4	Time of visit	113
6.1.5	The social preferences of visitors to the recreational forests	115
6.2	Variations in Use between Ampang and Kanching Recreational Forests	117

6.2.1	First or repeat visit at Ampang and Kanching Recreational Forests	117
6.2.2	Frequency of visits to Ampang and Kanching Recreational Forests	117
6.2.3	Frequency of visits to local and non-local visitors to Ampang and Kanching Recreational Forests	118
6.2.4	Mode of transport	119
6.2.5	Length of stay	120
6.3	Forest Amenities that Influence the Use of the Recreational Forests	121
6.3.1	Level of agreement related to forest amenities	122
6.4	Motives for Recreational Forest Use	122
6.5	Feelings Experienced in the Recreational Forests	126
6.6	Personal Characteristics and Other Variables (in both recreational forests)	129
6.6.1	Frequency of visit and personal characteristics	129
6.6.2	Personal characteristics and the social preferences of visitors to the recreational forests	133
6.7	Expectations towards the Recreational Forests	135
6.8	Conclusion	138
 Chapter 7: Underlying Patterns in the Questionnaire Data		
7.1	Overall Factor Analysis	140
7.2	Choosing the Number of Factors Retained	140
7.3	Reliability Test	148
7.4	Analysis of Variance (ANOVA)	149
7.5	Conclusion	151
 Chapter 8: Qualitative Results		
8.1	Use and Experience in the Recreational Forest	152
8.1.1	Pattern of recreational use	152
8.1.2	Motives for forest use	156
8.1.3	Feelings experienced in the recreational forest	159
8.2	Value of the Recreational Forest	163
8.2.1	Function of recreational forest	163
8.2.2	Benefits	165
8.3	Forest Culture and Memory Regarding the Environment	167
8.3.1	Human interaction with the forest	167
8.3.2	Cultural memory	170
8.3.3	First exposure related to forest environment	172
8.4	Issues of Concern and Expectations towards the Recreational Forest	173
8.5	Impact of Gender and Ethnicity on the Recreational Forest	178
8.6	Conclusion	192

Chapter 9: Discussion		
9.1	Typology of Recreational Forests Users	194
9.2	Factors that Motivate People to Use Recreational Forests	199
9.3	Activities in the Recreational Forests	209
9.4	Recreational Patterns of Forests Use	213
9.5	Perceived Restorative Experience	216
9.6	Childhood and Earlier Stage of Life Experience related to Forest Environments	217
9.7	Cultural Significance related to Forest Experience	219
9.8	Natural Threats and Incivilities in the Recreational Forests	220
9.9	The Similarities and Differences between Recreational Forests Use in Malaysia and Woodland and Forest Use elsewhere	222
9.10	Conclusion	225
Chapter 10: Conclusions		
10.1	Conclusions from the Quantitative and Qualitative Data	228
10.2	Policy Implications and Research Contributions	231
10.3	Future Research	235
10.4	Limitations of the Study	236
10.5	Concluding Comments	237
Literature cited		239
Appendices		
Appendix 1: Articles related to the Kanching Recreational Forest		257
Appendix 2: Questionnaire		261
Appendix 3: Semi-structured interviews questions		269
Appendix 4: Participant consent form		270
Appendix 5: Background characteristics and social preferences groups of visit		272
Appendix 6: Factor analysis results		274

TABLES AND FIGURES

Table Contents

Chapter 1

- 1.1 Comparisons between recreational forests and urban forests in Malaysia 10

Chapter 3

- 3.1 Interviews with forest officers and a manager 60
3.2 Population of forest users during three days observation 62
3.3 Questionnaire structure 64
3.4 Demographic questionnaire items 68
3.5 Respondents were surveyed 70
3.6 Statistical tests used and their functions 71
3.7 Characteristics of interviewees at Ampang and Kanching Recreational Forests 76

Chapter 4

- 4.1 General information about the recreational forests in Selangor 85

Chapter 5

- 5.1 Age group distribution 93
5.2 Gender distribution 94
5.3 Ethnicity distribution 94
5.4 Marital status distribution 94
5.5 Employment status 94
5.6 Educational distribution 95
5.7 Age group and gender distribution (both recreational forests) 96
5.8 Ethnicity distribution (both recreational forests) 96
5.9 Employment status and educational distribution (both recreational forests) 98

Chapter 6

- 6.1 Frequencies of type of visit, childhood visits and residence in a rural area 117
6.2 Relationships between length of stay and motives for forest use 121
6.3 Correlations between frequency of visit and forest amenities items 122
6.4 Motives for recreational forest use 123
6.5 Correlations between frequency of visit and motives for recreational forest use 124
6.6 Gender and forest use motives 124
6.7 Ethnicity and forest use motives 125
6.8 Correlations between motives for recreational forest use and age groups 126
6.9 Items related to feelings while in the recreational forests 127
6.10 Gender and three items related to feelings in the recreational forest 128
6.11 Correlations between feelings in the forest and age groups 128
6.12 Personal characteristics and the social preferences 134
6.13 Rating of expectations (mean across all respondents) 136
6.14 Expectations towards the recreational forests 137
6.15 Correlations between expectations towards the recreational forest and 138

age groups	
6.16	Percentage agreement with “increas[ing] entrance fee” and “[having] more recreational forest[s] in urban areas” 138

Chapter 7

7.1	Items retained under Factor 1 (“Forest amenities”), loadings ≤ 0.30 not shown 142
7.2	Items retained under Factor 2 (“Restorative experience”), loadings ≤ 0.30 not shown 143
7.3	Items retained under Factor 3 (“Inter-generational values”), loadings ≤ 0.30 not shown 144
7.4	Items retained under Factor 4 (“Self-actualisation”), loadings ≤ 0.30 not shown 145
7.5	Items retained under Factor 5 (“Incivilities”), loadings ≤ 0.30 not shown 145
7.6	Items retained under Factor 6 (“Natural threats in the forest”), loadings ≤ 0.30 not shown 146
7.7	Items retained under Factor 7 (“Younger activity preference”), loadings ≤ 0.30 not shown 146
7.8	T-test results 147
7.9	The overall means and standard error of the items loading onto the seven factors 148
7.10	Reliability results according to Nunally (1978) 148
7.11	Summary of associations between socio-demographic variables and factor component items 149
7.12	Factor score “Self actualisation” by frequency of visits 151

Chapter 9

9.1	Typology of recreational forest users 195
-----	---

Figures

Chapter 1

1.1	The states and federal territories of Malaysia (indicated in pink)	1
1.2	Flowchart of the research framework used in the study	15
1.3	Map of Selangor State	16

Chapter 3

3.1	The qualitative-quantitative continuum of educational research methodology conceptualised	54
3.2	Examples of quotations and keywords	77

Chapter 4

4.1	Locations of recreational forests in Selangor	82
4.2	Ampang Recreational Forest site plan	87
4.3	Kanching Recreational Forest site plan	89
4.4	Some examples of individual land uses near Ampang Recreational Forest (Clockwise from top left: a quarry area, low-cost flats, a scenery of Bukit Belachan, fish ponds)	91
4.5	Some examples of individual land uses surrounding Kanching Recreational Forest (Clockwise from top left: a high school, the entrance to Templer Park's golf course area with a view of Bukit Takun in the background, high-cost housing areas and high-cost housing constructions)	92

Chapter 5

5.1	Observed results for days of visits in the recreational forests	99
5.2	Observed gender distributions in the recreational forests	100
5.3	Recreational activities observed in the recreational forests	101
5.4	Some activities at Ampang Recreational Forest (Clockwise from top left: swimming, fishing, playing with a ball and bird watching)	101
5.5	Some activities at Kanching Recreational Forest (Clockwise from top: feeding monkeys, outdoor programmes and jungle trekking)	102
5.6	Recreational activities based on gender in Ampang Recreational Forest	103
5.7	Several children cycling in the Ampang Recreational Forest and a man doing volunteering work in Kanching Recreational Forest	103
5.8	Recreational activities based on gender in Kanching Recreational Forest	103
5.9	Recreational activities engaged in by ethnic groups in Ampang Recreational Forest	104
5.10	Recreational activities engaged in by ethnic groups in Kanching Recreational Forest	105
5.11	Recreational activities engaged in by age groups in Ampang Recreational Forest	106
5.12	Recreational activities engaged in by age groups in Kanching Recreational Forest	106
5.13	A few issues in Ampang Recreational Forest (Clockwise from top left: poor maintenance play equipment for children, an uncovered manhole poses a danger to forest users, and a concrete rubbish bin located on a walkway)	107

5.14	Some issues occurred in Kanching Recreational Forest (Clockwise from top left: burnt tree stump, monkeys searching for food in the trash, untreated tree trunk and damaged walkway)	108
------	---	-----

Chapter 6

6.1	Frequency of visits to the recreational forests	110
6.2	Mode of transport to the recreational forests	110
6.3	Social preferences by mode of transport to the recreational forests	111
6.4	Length of stay and recreational forest visits	111
6.5	Duration of recreational forest visits and age of respondents	112
6.6	Duration of recreational forest visits and ethnicity of respondents	112
6.7	Time of visit to the recreational forests	113
6.8	Time of visit to the recreational forests and age of respondents	114
6.9	Time of visit to the recreational forests and ethnicity of respondents	114
6.10	Social preferences of visitors to the recreational forests	115
6.11	Social preferences during recreational forest visits and age of respondents	116
6.12	Social preferences during recreational forest visits and gender of respondents	116
6.13	Frequency of visits to the Ampang and Kanching Recreational Forests	118
6.14	Frequency of visits of locals and non-locals respondents to Ampang and Kanching Recreational Forests	119
6.15	Modes of transport used to travel to the Ampang and Kanching Recreational Forest	119
6.16	Length of stay in the Ampang and Kanching Recreational Forests	120
6.17	The importance of recreational forest amenities by rank	121
6.18	Frequency of respondents' recreational forest visits by ethnicity	129
6.19	Frequency of visits by ethnicity of respondents at Ampang Forest	130
6.20	Frequency of visits by ethnicity of respondents at Kanching Forest	130
6.21	Frequency of visits according to age of respondents	131
6.22	Frequency of visits according to respondents' age in Ampang Forest	132
6.23	Frequency of visit by respondents' employment status in Ampang Forest	133

Chapter 7

7.1	Scree plot	141
-----	------------	-----

Chapter 8

8.1	Themes and sub-themes of both recreational forests	153
-----	--	-----
