A THESIS SUBMITTED FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

DECEMBER 2014

## ABSTRACT

Viking overwintering camps of late 9<sup>th</sup> century England have been excluded from most recent dialogues regarding Viking Age England. Although overwintering camps are directly mentioned in historical records such as the *Anglo-Saxon Chronicle*, these sites have remained archaeologically elusive. The recent identification of the Viking overwintering camp at Torksey, now under investigation by the Torksey Project, has provided a key opportunity to fill the gap in the current literature about the relation between environment, landscape, and Viking winter camps. This thesis uses geoarchaeological techniques, including palynology, sediment analysis, and optically stimulated luminescence to determine that the location was defined by a waterlogged landscape with aeolian sediments. The landscape evaluation has identified sites within the surrounding area that would have been integral in shaping the physical and political form and long-term effects of the winter camp, including a royal estate, a burhdyke associated with Torksey, an intermittently active canal at the Foss Dyke, and historical documents linking the site with the Mercian royal family. The methods employed during this have produced results that definitively demonstrate that the character of the environment was largely responsible for the Viking's choice of site for their overwintering at Torksey, and how the early medieval population would have interacted with the environment in the Lower Trent Valley.

## ACKNOWLEDGEMENTS

First and foremost, thank you to my supervisors Prof Dawn Hadley and Dr Gianna Ayala for all their help, support, input, comments, and late-night email exchanges. Also a huge thank you to Prof Mark Bateman, for always believing in my excel capabilities, and for never failing to cheer me on. I am also grateful for the honour and opportunity to work with all the brilliant archaeologists on the Torksey Project, especially Prof Julian Richards Dr Gareth Williams, and Dr Gareth Perry, for all their insightful discussions that opened my eyes to new ideas and ways of understanding Torksey. Thank you to the landowners at Torksey, especially Robert Brownlow, Derek Smalls, and Pete and Linda Johnson, for their enthusiasm, and patience with archaeologists crawling over their land.

I am incredibly honoured to have been able to attend a university with a group of intelligent colleagues, with whom I always felt welcome to discuss anything. Thank you to Rob Ashurst, Jessie Slater, Rachel Sites, Andrew Reid, Kate Orgill, Clare Burke, Lenore Thompson, Alex Schmidt, and Jose Cristobal Carvajal Lopez. Also, a special thank you to Alison Leonard, David Knight, Colin Baker for your insightful views, and especially Paul Goldberg, without whom I would not be writing this today.

An especially heartfelt thank you goes to Colin Merrony for all his help, discussion, wisdom, interest, patience, and all that. Thank you Mum, for listening to me on the best and worst of days, Dad, for your never-ending support and encouragement, Grammy, for being my light, and Pop-pop, for knowing I'd be here before I ever did. And thank you to Beezle and Sparkle, for making me smile every day.

## TABLE OF CONTENTS

<b>ABSTRACT .....</b>	i
<b>ACKNOWLEDGEMENTS .....</b>	ii
<b>LIST OF FIGURES.....</b>	vi
<b>LIST OF TABLES.....</b>	ix

### CHAPTER 1: INTRODUCTION

<b>1 GENERAL INTRODUCTION.....</b>	1
<i>1.1 Aspects of the Torksey Project.....</i>	5
<i>1.2 Palaeoenvironmental, geoarchaeological, and landscape survey.....</i>	10
<b>2 AIMS AND OBJECTIVES OF THIS THESIS .....</b>	12
<i>2.1 Geoarchaeology and the Torksey Project.....</i>	13
<b>3 THESIS STRUCTURE.....</b>	14

### CHAPTER 2: VIKING OVERWINTERING CAMPS IN ENGLAND AND ABROAD

<b>1 INTRODUCTION .....</b>	19
<i>1.1 Terminology.....</i>	20
<i>1.2 Preconceptions and ‘definitions’ of Viking winter camps .....</i>	21
<i>1.3 Camps in the Anglo-Saxon Chronicle and other historical sources.....</i>	22
<i>1.3.1 The Vikings and their campaign .....</i>	22
<i>1.3.2 Torksey and Repton: early winter camps.....</i>	24
<i>1.3.3 The late 9<sup>th</sup> and early 10<sup>th</sup> centuries: winter camp or fortification .....</i>	25
<i>1.3.4 Interpretation of Anglo-Saxon Chronicle etymology: locations and constructions.....</i>	27
<i>1.4 Antiquarian views of Viking winter camps .....</i>	34
<i>1.4.1 The size of the Viking Great Army .....</i>	38
<b>2 REPTON .....</b>	40
<i>2.1 Heath Wood.....</i>	49
<b>3 RECENT STUDIES ON OVERWINTERING CAMPS IN VIKING AGE ENGLAND.....</b>	50
<i>3.1 Possible Viking overwintering camp sites: recent studies .....</i>	52
<i>3.1.1 McLeod: Feeding the micel here .....</i>	52
<i>3.1.2 Raffield: Viking fortifications in the British Isles .....</i>	55
<i>3.1.3 Tempsford .....</i>	56
<i>3.1.4 ARSNY .....</i>	60
<i>3.2 Woodstown and Irish longphuirt.....</i>	62
<b>4 CONCLUSIONS: TORKSEY AS A MODEL FOR LANDSCAPE RECONSTRUCTION.....</b>	64

### CHAPTER 3: HISTORY AND ENVIRONMENT OF THE STUDY AREA

<b>1 INTRODUCTION .....</b>	68
<b>2 REVIEW OF THE HISTORY AND ARCHAEOLOGY OF TORKSEY.....</b>	68
<i>2.1 Early medieval Lincolnshire .....</i>	68
<i>2.2 Previous reviews of the archaeology of Torksey .....</i>	70
<i>2.3 Historical records regarding Torksey .....</i>	71
<i>2.4 Excavations at Torksey .....</i>	74
<i>2.4.1 Pottery kilns .....</i>	75
<i>2.4.2 Cemeteries .....</i>	76
<i>2.4.3 Settlement remains.....</i>	77
<i>2.4.4 Small finds .....</i>	77
<i>2.4.5 Other investigations at Torksey .....</i>	78
<b>3 ENVIRONMENT AND CLIMATE IN THE TRENT VALLEY AND BEYOND .....</b>	80
<i>3.1 Holocene climate in Britain .....</i>	81
<i>3.2 Features and geological deposits of the Trent Valley study area .....</i>	86
<i>3.2.1 The River Trent .....</i>	87
<i>3.2.2 Solid geological formations .....</i>	88
<i>3.2.3 Superficial geology .....</i>	90
<i>3.2.3.1 Holme-Pierrepont Sand and Gravel .....</i>	91
<i>3.2.3.2 The Lincolnshire Coversands .....</i>	92

3.2.3.3 Peat and alluvium .....	101
3.3 Vegetation, sedimentation, and hydrology of the Lower Trent Valley.....	104
3.3.1 Mesolithic: 9500-4000 cal BC.....	104
3.3.2 Neolithic: 4000-2200 cal BC .....	107
3.3.3 Bronze Age: 2200-800 cal BC .....	109
3.3.4 Iron Age: 800 cal BC-AD 43 .....	109
3.3.5 Romano-British: AD 43-410.....	111
3.3.6 Medieval: AD 410-1485.....	112
3.3.7 Post-Medieval and modern: AD 1485-present .....	114

## CHAPTER 4: METHODOLOGY

1 INTRODUCTION .....	117
1.1 Methodology background .....	117
1.2 Methodology application .....	120
2 THE PALAEOENVIRONMENTAL RECONSTRUCTION: METHODOLOGY AND PROCEDURES.....	121
2.1 Reconnaissance phase .....	122
2.2 Coring and test pitting .....	122
2.3 Sampling methods.....	124
2.4 Sediment analysis .....	125
2.4.1 Magnetic susceptibility .....	125
2.4.2 Calcimetry .....	126
2.4.3 Organic content .....	127
2.4.4 Particle size analysis .....	128
2.5 Palynological analysis.....	129
2.5.1 Radiocarbon dating .....	130
2.6 Luminescence dating .....	131
2.6.1 Optically stimulated luminescence dating .....	131
2.6.2 Portable optically stimulated luminescence dating .....	134
2.7 Palaeoenvironmental reconstruction.....	136
2.7.1 Problems and biases .....	136
3 LANDSCAPE RECONSTRUCTION.....	137
3.1 Defining the study area.....	137
3.2 Maps and spatial data .....	138
3.3 Catalogued data .....	139
3.4 The analysis .....	141
3.5 Potential problems and compensations .....	142
4 SURVEYING THE WINTER CAMP AT TORKSEY: RESULTS AND DISCUSSIONS .....	143

## CHAPTER 5: INVESTIGATING THE PHYSICAL ENVIRONMENT OF TORKSEY

1 INTRODUCTION: GEOARCHAEOLOGY AND PALAEOENVIRONMENT AT TORKSEY .....	147
1.1 Previous archaeological work within the winter camp site .....	150
1.2 Aims and objectives of this survey .....	153
1.3 LiDAR and mapping .....	155
2 SUMMARY OF FIELDWORK SESSIONS.....	155
2.1 Walkover survey .....	158
2.1.1 The floodplain.....	158
2.1.2 The higher ground .....	159
2.1.3 Peat.....	160
2.1.4 Bunker's Hill Warren .....	160
2.1.5 Environmental observations .....	161
2.1.6 Walkover survey results outside the overwintering camp site .....	162
2.2 Coring programme and peat sampling .....	168
2.3 Test pitting .....	170
2.4 Fieldwork as part of the Torksey Project .....	170
3 SEDIMENT ANALYSES .....	171
3.1 Solid geology .....	172
3.1.1 Branscombe formation.....	172
3.1.2 Blue Anchor formation .....	173
3.1.3 Solid geology conclusions.....	174
3.2 Superficial geology.....	175

3.2.1 Terrace sands and gravels.....	175
3.2.2 Fluvial sands and peat deposits.....	178
3.2.3 Results of palynological assessment.....	181
3.2.4 Aeolian deposits.....	196
3.2.4.1 Particle size analysis on aeolian sediments.....	203
3.2.4.2 Aeolian-derived sediments.....	207
3.2.5 OSL dating.....	209
3.2.6 Portable OSL dating.....	220
3.2.7 Alluvium.....	227
4 CHRONOLOGICAL INTERPRETATION.....	229
4.1 Pre-Holocene.....	233
4.2 Early Holocene.....	234
4.3 Bronze Age.....	240
4.4 Iron Age.....	243
4.5 Romano-British.....	243
4.6 Early medieval.....	247
4.7 Medieval.....	253
4.8 Post-medieval.....	263
5 CONCLUSIONS .....	268

## CHAPTER 6: CHARACTERISING THE LANDSCAPE OF TORKSEY

1 INTRODUCTION .....	271
2 THE ROMAN PERIOD .....	276
2.1 Archaeological and environmental evidence for Roman activity .....	276
2.2 The Roman landscape: Maps, descriptions, and analysis .....	287
2.3 The Roman landscape: Conclusions.....	298
2.3.1 The transition from the Roman to early medieval period .....	300
3 THE EARLY MEDIEVAL PERIOD .....	302
3.1 Archaeological and documentary evidence for early medieval activity .....	303
3.2 The early medieval landscape: Maps and descriptions .....	314
3.3 Landscape development in the early medieval period .....	319
3.4 The early medieval landscape: Conclusions.....	339
4 THE LATER MEDIEVAL PERIOD .....	341
4.1 Archaeological evidence for later medieval activity.....	343
4.2 The later medieval landscape: Maps and descriptions.....	348
4.3 Analysis of the later medieval landscape.....	354
4.3.1 Torksey in the later medieval landscape.....	361
4.3.2 Static sites in the later medieval landscape .....	370
4.3.3 Nucleation, deserted villages, and parish formation .....	376
4.4 The later medieval landscape survey: Conclusions.....	387
5 CONCLUSIONS .....	394

## CHAPTER 7: DISCUSSION OF RESULTS

1 INTRODUCTION .....	401
2 RELATIONSHIP OF ENVIRONMENTAL AND LANDSCAPE SURVEY .....	401
2.1 Pre-Viking camp environment of the island.....	401
2.1.1 The Romano-British period landscape and environment.....	403
2.1.2 The end of the Roman period.....	404
2.2 The early medieval landscape and environment.....	406
2.3 The medieval landscape and environment.....	410
3 THE VIKING WINTER CAMP OF 872-3: SURVEY INTERPRETATION.....	413
3.1 Torksey: early medieval hub and industrious island .....	413
3.2 The island camp site .....	414
3.3 The winter of 872-3.....	416
3.3.1 Choosing a temporary physical and political fortress.....	420
3.4 After the winter camp.....	423
4 TORKSEY: CONCLUSIONS .....	425

## CHAPTER 8: CONCLUSIONS

1 CONCLUSIONS IN RESPECT TO THE PRIMARY AIMS AND OBJECTIVES.....	431
--	-----

2 CONCLUSIONS IN RELATION TO ONGOING DISCUSSIONS OF VIKING WINTER CAMPS.....	432
2.1 <i>Similarities at Athelney</i> .....	435
2.2 <i>Results within the Torksey Project: the landscape of a Viking winter camp</i> .....	437
3 CRITIQUE OF METHODOLOGY AND PROPOSED FUTURE WORK .....	438
<b>BIBLIOGRAPHY .....</b>	<b>445</b>
<b>APPENDICES.....</b>	<b>485</b>
I PROCEDURES .....	485
II CORING PROGRAMME.....	489
III TEST PITTING PROGRAMME.....	513
IV SEDIMENT ANALYSES .....	521
V PORTABLE OSL DATA.....	523
VI POLLEN TAXA DICTIONARY .....	524
VII RESULTS OF MAGNETOMETER SURVEY.....	525
VIII HISTORIC MAPS .....	529
IX CROPMARKS .....	544
X LIDAR .....	563
XI HISTORIC ENVIRONMENT RECORD ENTRIES .....	565
XII GREY LITERATURE RECORD .....	569
XIII PLACE NAMES .....	571
